

HARRISBURG LETTER.

THE CITY AWAKENING—THE LOCAL HOUSE—THE HOUSE OF REPRESENTATIVES—ELECTION OF OFFICERS—THE SENATE—THE SPEAKERS—THE SENATE TALKING.

HARRISBURG, January 5, 1870. The dullness of the summer months has disappeared and in its stead has come the excitement and bustle consequent on the assembling of the Legislature.

The hotels are crowded daily and nightly with politicians who are arranging plans, and fixing up candidates. Newspaper men and curiosity seekers are also abundant and they seem determined to understand and know everything that is going on, and in the absence of certain information are not slow to give their own guesses for actual knowledge. The crowd being arriving on Thursday last week, and has increased daily since. The local House, being the acknowledged headquarters of the Republican party, and that party having considerable influence just now in the management of State affairs, is the center where all combinations are formed, and where all the influences that are to control the Legislature of the present session, its halls and reception rooms are constantly crowded with an eager throng of people, and its more private apartments are the scene of many excited and important conferences. Persons who are familiar with it only during the fall and winter days of summer, would hardly imagine, that during the winter months, business of great importance to the entire people of the Commonwealth is transacted within its walls, as within those of the Capitol itself.

It would be difficult to give beyond all reasonable limits to either an outline of the caucusing done here since the commencement of the year. The whole of it has as yet resulted in the organization of the Legislature. At noon yesterday the House of Representatives was called to order by Chief Justice Seligman, and after prayer and the opening of the election returns of the members, the election for speaker took place. Hon. Butler B. Strang, of Tioga, was named as the Republican candidate, and Hon. R. B. Brown, as the Democratic nominee. The election was simply the call of the respective parties—the Republicans members voting solidly for Strang, and Democratic members displaying the same undivided preference for Brown.

Each candidate, however, gave the other the compliment of his vote, which was doubtless appreciated on account of the certainty that it would have been given under no other conceivable circumstances. After the clerks had announced the result, Mr. Strang was conducted to the chair by Messrs. Brown and Johnson, and after a short, but able and well considered speech, took the oath of office, and the House proceeded to the election of the other officers, of which the following is the principal:

Chief Clerk—J. L. Seligman. Resident Clerk—John A. Smull. Assistant Clerk—Ed. G. Lee. Sergeant-at-Arms—Thomas Wilson. Doorkeeper—J. H. Hall. Secretary—W. W. Williams. Postmaster—Augustus Beckert. Superintendent Printing Department—James Reems.

The Senate at 3 p. m. was called to order by Hon. Charles H. Stinson, who had been chosen speaker at the last adjournment. As two-thirds of the Senate held over yearly, there were but eleven new members to be received. After the returns for these were reported, the difficulty growing out of the Somerset District election came up. The seat is claimed both by Findlay the Democratic candidate and Scull the Republican; each presenting a certificate of election and each claiming admission. Senator Wallace of Clearfield, opened the ball by offering a resolution declaring that Findlay was entitled to the seat as Senator from that district, to which Senator Harry White, offered an argument referring the papers to a select committee of three to report as soon as practicable. The resolution and amendment gave rise to a debate of course, in which Senators Wallace, White, and Lowry participated. The amendment finally carried, and thus the Somerset case is at rest until the committee report.

After this matter was disposed of, an election was held for officers, which resulted in the choice of the following gentlemen: Speaker, Hon. C. H. Stinson; Assistant Speaker, George W. Himmery; Chief Clerk, L. Rogers; E. Williams; Secretary, Charles W. B. Bagley; H. Cowan; J. Doline, Thomas H. Hestand.

Both branches of the Legislature adjourned as soon as the organization was effected, until to-day, when the annual message of the Governor, as well as a large number of veto messages was presented.

It is scarcely necessary to speak of the gentlemen who were elected to preside over the Legislature during the present session, as they are well known throughout the State. Mr. Stinson has served two terms as speaker in New Jersey, and is one of the ablest and most distinguished of his position. He is a gentleman of fine ability and attainments, and enjoys the respect and confidence of all who know him. Mr. Strang has been for the last three years the acknowledged leader of the House of Representatives, and is a gentleman of ability and a thoroughly consistent Republican. He has been abused much violently by Democratic papers, but this fact is by no means conclusive that he is lacking in any of the qualities of an upright and able legislator, in fact it almost of itself raises a presumption in his favor. Mr. Strang will doubtless receive this sort of attention from them in long as he succeeds in retaining the confidence, and receiving the honors of the Republican party.

The organization of the Legislature was made without any reference to the contest for the Speakership and consequently that interesting little struggle is still going on and will continue until the meeting of the caucus, which is left to the discretion of the House. Hon. W. W. Mackey the present Treasurer, and Gen. W. W. Irwin, who is his predecessor, are the only candidates, and each is supported by active, energetic and skillful workers.

As the writing of both parties are so diligent and the interest in the fight increases hourly. The experience of last year showed that predictions based on outside appearances were not reliable, and therefore it is best to wait patiently for the result. It may be assumed however, that the contest for the Speakership of the present winter will materially change the elements which are now supposed to pertain to that office.

The British Post-office Department made \$3,000,000 net profit last year, while ours ran behind, \$5,000,000. No country in the world has so many letters. The Queen even may write a letter by another hand, must put her own hand on it, to send it by mail.

The present production of the White Pine mines is about \$86,000 per week, for the whole district about \$100,000 per week. In a couple of months the production will be increased to the rate of \$2,000,000 a year, and the yield for 1870 it is believed will reach \$10,000,000.

St. Louis is now moving in the matter of a World's Fair at that city in 1871. A committee of five gentlemen, who have passed resolutions urging the formation of a World's Fair Association, with a capital of \$1,000,000; and other preliminary arrangements have been entered into. St. Louis is in earnest in the matter.

A kind state of things is reported in New Orleans. Last year the total population of 70,000, the births compare that there are 13,000 entirely idle; the same number only nominally employed. Only 5000 are employed the year through, and the remaining 85,000 do, on an average, only about half the labor and business of the year.

It is stated that Ohio is the second State in the Union in regard to the manufacture of iron, being next to Pennsylvania. The pig iron made in Ohio in 1867 was—Raw cast and coke iron, 128,878 tons; charcoal iron, 95,025 tons; total, 223,903 tons. This production of iron, about 600,000 tons of raw ore; and the manufacture of bar, sheet and other kinds of iron, amounted to 80,000 tons.

The Western States are acquiring handsome "foundations" for educational purposes through the liberal land grants from the National Government. For instance, the sale of school lands in Minnesota so far this year has increased the school fund \$2,200,000. The sale of Agricultural College lands has increased the University fund over \$100,000. In Wisconsin, \$50,000 have been added to the State fund for the support of the State University by the sale of Agricultural College lands during the past year.

From figures furnished by the State Comptroller, it seems that the assessment of real and personal property in all the counties of California for the current year, aggregate \$358,048,339, not far from the previous year of \$21,105,880. In the thirty-two agricultural and commercial counties there was a gain of \$26,358,900 in twenty-seven, and a loss of \$1,218,985 in four, leaving a net gain of \$25,139,915. Of the sixteen mining counties only two show a gain, amounting to \$296,200; while sixteen show a loss of \$4,224,330, leaving a net loss of \$3,928,130; reducing the net gain for the whole State as above.

The young ladies of Tippecanoe, Indiana, have committed themselves to eternal obliquity, by resolving that they will hold no intercourse with any young man who uses tobacco in any shape; plays billiards or cards; utters profane language of any kind; drinks whiskey or lager; or stays out late at night.

During the past year, seven hundred and thirty-one children were taken through the mails of the United States, being an increase of forty millions over any previous year. This is about twenty letters per head for every man, woman, and child in the United States.

An assistant assessor in New Jersey says that he feels so sleepish when called upon to tax a lady for her gold watch, that he often pays the amount himself. He says that while it is nominally a tax, it is really a bribe upon which is to many teachers, workmen, etc., an indispensable necessity.

Zanesville, Ohio, rejects in debating society. One of its promising members thus relieved himself of the other night: "Why, Mr. Chairman and gentlemen, America is the father of Robinson and Robert Fulton is the father of steam and steam engines." He built the boat upon which the Puritans came to this country."

The number of pupils attending the public schools in New Jersey is reported to be 1,028,675. The rate of the school population to the entire population of Ohio, has been placed at 37 per cent, but a careful analysis of the statistics of the State, it is asserted, will now reach 52.00 per cent.

A paper out in Illinois talks in this way: "If you owe one but a single dollar, go and pay him; when there is so little money we ought to keep it moving around lively. Jim owed Jim and we owed Bill, and Bill owed Jim. Jim got his money, and we paid him, and Bill paid Jim, and Jim went to bed that night happy as a clam, with just as much money as he had in the morning, and three men out of debt."

The following is the address of Hon. B. B. Strang, on taking the chair, as Speaker of the House of Representatives at Harrisburg.

Mr. Strang said: Gentlemen of the House of Representatives: Permit me to express my thanks for the high honor you have done me in your selection to preside over your deliberations during the present session.

That you may have no cause to regret it, is my highest ambition. That I may be able to perform my duties satisfactorily, as well as with impartiality and fidelity, is my earnest desire.

I trust that I will entertain a proper sense of the honor you have conferred on me, I have also some appreciation of the difficulties of the position—and I need hardly suggest that your generous support in the observance of those rules by which our business is governed, and that courtesy by which the aspect of our debates is moderated, will be absolutely essential to the harmony as well as the usefulness of the session.

I can not assure that, if any measures of great public importance are to be considered by us—and yet—yet—never happen otherwise than that the Legislature has become so well known by his writings and lectures, that the desire to hear him here is great. Tickets can be had and all information given by calling upon Wm. H. Ogilby, A. Blair, or to the publishers of the Standard, Havestick & Co., W. K. Piper and J. P. Noff.

It is in doing this the people demand, that we have a right to require, that we should exercise the most rigid economy and liquidation of the public debt, which has for some years constantly been made, would so afford conclusive proof that the average legislation on financial questions has been calculated to protect the interests of the people; yet it must be admitted that there is still occasion for the exercise of a sound economy in every branch of our government, and we sincerely hope our record on that subject during the coming session will satisfy even the most fastidious.

We must not forget that the people are our masters, and if we obey their clearly expressed wishes, we shall be able to perform our duty as legislators, and which shall prevent the exercise of all our official duties, we shall not only meet the approval of good men everywhere, but will be able to extract the venom from the fang of those who, seeing a motley which they can obtain in no other way, resort to such a crude and unbecoming mode of attack upon public men of the State, and commit themselves with the different political parties only to have at and tear them.

The foolish practice of shooting off the Old and shooting in the New Year, as it is termed, was carried to a reprehensible extent in this city. Soon after dark on Friday evening the crack of guns and revolvers, and the explosion of fire-crackers, could be heard almost every minute in nearly all the principal streets of the town, and this firing was kept up during the entire night, not only to the annoyance of the citizens, but also at the risk of the lives of the citizens, and on the occasion to drive in the streets and walk the pavements. And, sad to relate, many of these fire-arms were in the hands of boys not twelve years old, who loaded them heavily and fired them in the most reckless manner.

Some time during the night a colored man named Daniel Edwards, whilst standing on North Jonathan street near Church, received a fatal wound from a musket ball, fired by some unknown person, which he internally or otherwise had not been accustomed to. He died in his death on Sunday. The ball was a minute one, and passed through his hand into his abdomen, and thence into the fleshy part of his leg, where it was found. He was attended by Drs. Dorsey, Toly and others, but received no relief, and his combined skill could suggest or do sufficient to save his life. An Inquest was held by Mayor Tice, which was unable to fix the perpetration of this terrible deed upon any one, but we hope that it will serve as a warning, and that hereafter our Town Authorities will take special pains to suppress the dangerous as well as senseless practice of shooting on New Year's Eve.

The poor colored man, who has thus been murdered for the reckless discharge of a gun loaded with a ball into the public streets, as much an act of murder, as if the killing had been premeditated. We understand, however, a good character in this community, and was the support of his aged parent. We trust that the investigation will not stop, but that a full reward will be offered and every effort made for the discovery and punishment of the guilty party.—Herald and Torch.

On Christmas morning, Mr. Benjamin Penrose, a respected citizen of Drumont township, Lancaster county, awoke about two o'clock, struck a light, and on seeing what time it was, called to his wife "My dear Christmas," several times, but receiving no answer, he awoke sleeping in an adjoining room, and on going to the bedside, with a light, it was found that she was dead, and partly cold. Mrs. Penrose was about fifty-five years of age. She had been unwell for some months, but on retiring on Friday, she expressed herself as feeling better than for some time past.—Express.

DR. SCHOEPPE'S CASE.

We very reluctantly call attention to the case of Dr. Schoeppe, inasmuch as we have no doubt as to the propriety of the decision of the Supreme Court. We are sorry to see that the case does not contain a single word of comment relative to this subject. This is all wrong, and the Supreme Court should order a jury trial, if this discussion is kept up and it is necessary to form, for a trial to be had in justice to the Commonwealth or the prisoner.

No discussion of the matter, can possibly do any good, and all of them do much harm. We know the prisoner's friends would most gladly have his counsel refrain from all controversy on the subject, and we are, almost as sure as the Commonwealth does not desire it, that they cannot those who have only a remote or imaginary interest in the case, but themselves out of pocket, at least until it is certain that they can injure no one but themselves by their efforts.
