We seldom behold children at their play without being carried back to the ays of our childhood, when we were one of those "wee things," and loved to zambol on the greensward, and gather lowers in the fields, and build play ouses in the woods, and churches also, und preach ! How light were our hearts. without trouble, care or sorrow; how blithe our spirits, with scarce a tint f care with what speed and rapture we bounded to join our merry playfellows; how we shouted and ran and leaped for joy! Sweet days of our childhood ! why passed ye so soon away? In depressed and sorrowful moments, when care sits gloonnily on our brow, and a weight of sadness lies on our heart, w can cast an eye back to the morning of our life and from its unclouded sunshine a cheering ray steals, into our soul and dispels, for a time all gloom. What flitting back and forth upon the landing would we not give to be a child once more, spotless, blameless glorified.

Professor Pumpelly, in his admirable ook of travels round the world, gives

"As I was about to pass my first night in a Japanese house, I watched, anxionsly, the preparations for sleeping. They were simple enough : a mattress in the form of a very thick guilt, about seven feet long by four wide, was spread on the floor; and over it was laid an ampie robe, very long, and heavily padded, and provided with large sleeves. Having put on the night dress, the sleeper covers himself up with another

quilt, and sleeps, that is if he has some years' practice in the use of his bed. "But the most remarkable feature about a Japanese bed is the pillow. This is a wooden box, about four inches high, eight inches long, and two inches wide at the top. It has a cushion of folded papers on the upper side to rest the neck upon, for the elaborate manner of dressing the hair does not permit the Japanese, especially the women, to rest the head upon the pillow. Every mornsome part of the physical substance that ing the uppermost paper is taken off the produces the phenomena of intelligence cushion, exposing a clean surface, with

out the expense of washing a pillow. "I passed the greater part of the night in learning how to poise my head in this novel manner; and when I finally closed my eyes, it was to dream that I was being Blowly beheaded, and to awake at the crisis to find the pillow bottom side up, and my back resting on the sharp lower edge of the box. During my stay in the country I learned many of its customs, mastering the use of chopsticks, and accustoming my palate to raw fresh fish ; but the attempt to balance my head on a two inch pillow I gave up in despair,

after trying, in vain, to secure the box. average. If one requires a little more or by tying it to my neck and head." We clip the following from an exhange, and give it to our readers because

of its truthfulness. It is rather a queer piece of poetic prose, and yet contains nore truth than poetry. We commend it to the notice of all business men :
