This can all be sult the sympathetic nerve, and do what changed, by taking Peruvian Syrup (a t commands us to do. We must give protoxide of Iron). Cases of twentythis child salt when it wants it; we soven years' standing have been cured must give it acid when it has a fever, by it. and anxiously craves it-not vinegar, but lemon juice, because the first-coagu

lates albumen, the latter does not, on account of the surplus of oxygen which it contains. To imitate the soothing mumous in the inlestines, which is now wanting, and to give some respiratory ood at the same time, we add some gum arabic. To restore and relieve the injured nerve, we apply moist warmth In practice we can fulfill-all this with he following simple manipulations: Unress the child and bring it to bed at the very first stage of sickness. Give it, if it has already a fever, nothing but sourish lemonade, with some gum arabic

n it. Then cover its abdomen with dr flannel. Take a well folded bed sheet and put it into boiling hot water; wring a fence, breaking an axle, when the horse of hundred bushels of ruta bagas, how it out dry by means of dry towels, and out this over the flampel on the child's bdomen. Then cover the whole and wait. The hot cloth will perhaps require repeated heating. According to the seerity of the case, and its stage of progess, perspiration will commence in the hild, in from ten minutes to two hours. The childdhen, is saved; it soon falls to leep. Soon after the child awakes, it howsslight symptoms of returning incli nation for food; help its bowels if nec essary, with injections of oil, soap and rater, and its recovery will be as steady as the growth of a green house plant, if

well treated. Of course, if the child was already dying, nothing could save it, or if it-has already effusions in the lining of the heart or brain, it is much, better that it should die. But if the above is applied in due time, under the eyes and irections of a competent physician\_ will guarantee that not one in a hundred children, will ever die of scarlet fever I know this will startle some of my readers, especially those who have lost children already, but I shall gostill further; maintain that a child will nover get searlet fever if properly treated, If a child has correctly mixed blood, it will not catch the disorder if put in bed with a

sick child. This is still more startling, the name of Mr. John Rhoads of your ment-agreement by counsel to make a but nothing is easier of proof. The same is also true of whooping cough, holera infantum, &c. I refer to Proj Von Niemeyer's treatment of whooping cough; it consists of equal temperature in a room of 75 degrees, and the regulation of appropriate digestion. He warrants, by following this simple course, Buhler vs. Watts. No. 231 Augus every case of whooping cough to disapterm, 1868-debt-referred to C. E. Ma- pear in three weeks. I think even this could be shortened. Lomon juice, salt, gum arabic, and heat, are all that are required in cholera infantum-only the

> difficult, on account of the intestinal lin ings being injured directly. "Chapman takes good pictures.
