

THE HERALD OFFICE prints the best colored bills in the county. The latest novelty—the Union Company's new steam fire engine.

The time for the holding of the public school examinations is fast approaching. LIXEN suits and straw hats will soon be in demand.

The soldiers' monument is not yet completed. What is the cause of the delay? Will the husbands go down to "The Office" at night should be informed that that is the name of a saloon.

Our streets have been thoroughly cleaned recently. This is right; but where will the Council get the money to pay for it?

The prettiest public grounds in Pennsylvania—the two squares in the centre of this borough, on the north side of Main street.

The most useful public grounds in the whole planetary system—the two squares in the centre of this borough, on the south side of Main street.

FRIDAY.—The alarm of fire on Tuesday evening was occasioned by the burning of one of the outbuildings attached to the College.

HAVESTICK BROS.'s have soda water in abundance and of the best quality. If the lovers of this delightful beverage think they can drink that fountain dry, they are invited to make the effort.

QUARTERLY MEETING SERVICES will be held in the Emory M. E. Church, on Sabbath next. The Rev. T. Mitchell, D. D., President of the Board of Christian Education, will preach at 7 1/2 p. m. The Pastor will preach in the morning.

We are requested to state that St. John's Lodge Room will be open on next Monday evening for the inspection of visitors. We would advise each of our citizens who have not yet seen it, to take advantage of this opportunity.

Mr. J. C. Morgan, organ grinder, is again in our midst. Their melodious instruments can be heard on every street corner, while a throng of interested boys greatly drink up every note as it issues from the "music box."

The Grand Lodge of Pennsylvania, I. O. O. F., met in Philadelphia, on Monday, and the Grand Encampment met on Tuesday. The Lodges and Encampments of this county are fully represented by Past Grand and Past Chief Patriarchs.

We have a magnificent "Asylum for the Insane of the County of Cumberland" on the "Horse Neck" overlooking a beautiful bay. We don't hear of any new bridges to build. How are the Commissioners of the County to invest the people's money during the present season?

Don't be in a particular hurry to throw off your underclothes, though some days are uncomfortably warm. Better suffer a little from the heat than suffer a great deal from catarrhs, colds and chills.

FATAL RESULT.—Our readers will remember that some two years ago, an accident at the new building, which seriously injured James K. Straley. We have now to record the death of this young man, which occurred at Chambersburg, on the eighth instant, from the injuries he received at that time.

PROPOSALS.—Under the head of "Proposals" it will be seen that sealed proposals will be received at the office of the Acting Commissary of Subsistence, at Carlisle Barracks, until ten o'clock a. m., of Monday, May 23, for furnishing the command with good fresh beef, for six months from the first of June next.

Under the head of "New To-Do" it will be noticed that proposals for fuel, forage and straw will be received at the office of the Acting Commissary of Subsistence, at Carlisle Barracks, until ten o'clock a. m., of the twentieth day of June, 1870, for supplying the post for the year ending June 30, 1871.

FIRE.—LIVE STOVE BURNED.—About nine o'clock on Monday evening last, flames were seen issuing from the stable of John Kramer, on the alley in the rear of Pitt street, and the alarm quickly given. Owing to the structure being frame and the wood perfectly dry, the fire had gained such headway before the arrival of the engines, that nothing could be done but protect the surrounding property. Two fine cows were consumed with the stable. The stable of M. Handshaw, immediately adjoining, had to be removed to prevent the fire from spreading. It was only by great effort that the dwelling of John B. Noble was saved, the roof having been on fire several times.

The Cumberland was the first to play on the fire, and rendered most efficient service.

MANOR.—St. John's Lodge, No. 209, A. Y. M., (Masonic) of this place, will dedicate their new Hall on Tuesday, the twenty-fourth instant, with appropriate ceremonies. The procession, in full Masonic dress, will form from the old hall on West Main street, at ten o'clock a. m., and move through portions of the principal streets of the town, headed by the Garrison Band, until eleven o'clock a. m., when the entire brotherhood will assemble in the Old Methodist Church, on the corner of Main and Pitt streets, to hear an oration delivered by Rev. Dr. R. H. Patton, of Philadelphia. The public are generally invited to the exercises in the church, which will continue until twelve o'clock. After the oration the procession will form again, and march to the new Hall, on South Hanover street, where the ceremonies of dedication will be performed. The Lodge will be closed at about one o'clock, and a meeting again held in the evening, after which the friends of the new Hall will be invited to a banquet. The lino having been formed on the square, from the old Hall, the route of procession will be as follows: Down Hanover to Louthier; up Louthier to West; West to Main; down Main to Bedford; up Bedford to West Main; West Main to Pitt; down Pitt to Old Methodist Church; After services in church down Main to Hanover; down Hanover to new Hall.

REMEMBRANCE.—Three members of the Junior class of Pennsylvania College at Gettysburg, having been suspended from attending school, the class have, on the 15th inst., held a public meeting at the residence of the Rev. Mr. Patton, at Carlisle, to raise a fund for the relief of the suspended students. The proceeds of the meeting were \$100.00, which was distributed to the students.

LECTURES ON PHYSICAL CULTURE.—Our past week has been favored, during the past week, with a series of lectures by Dr. Gleason, on "Physical Culture." The lectures are illustrated by a large collection of costly and wonderful models, paintings, and diagrams, which greatly aid the audience in understanding the anatomy and physiology of the human body. The apparatus is very extensive and complete, and is said to have cost over \$25,000. The doctor has devoted many years to lecturing and illustrating his subject, and is a most successful lecturer. He has been invited to lecture at various places, and has been successful in directing public attention to this most important of all subjects, is certainly a benefactor to his race. Disregard of the laws of health should be regarded, by all, as a positive evil, and all should be thoroughly instructed in the wonderful structure and uses of their bodies. We know no lecturer who is better able to instruct on this subject, or who shows himself more thoroughly in earnest to do good, than Dr. Gleason.

MILITARY SERVICE.—It may be of interest to many of our readers to learn that previous to adjournment the Legislature passed an act relating to the militia organization of the State and militia tax. The bill provides as follows: "Each and every person not now, or who never has been, or hereafter becomes a member of some military organization shall pay to the collector of taxes in this county, borough, or township in which he shall reside, the sum of fifty cents annually, the payment of which sum shall exempt him from liability to perform military service except under orders to prevent, or repel invasion, or riot, or suppress insurrection, tumult, or riot; the proceeds to be devoted to sustaining volunteer military organizations; and in any county in which there shall be no such military organization, the money received into the brigade fund, as aforesaid, shall be paid by the county, at the close of each year, to the school board of the several school districts in said county, in proportion to the number of taxable inhabitants in said district, to be used for school purposes."

LUMBER MARKET.—The Harrisburg Topic states that nearly every foot of lumber floated down, or past that city, has been disposed of at good prices. It may be safe to estimate the average price at about \$14 per 1000 feet, for hemlock; \$18 for pine, and \$15 for logs. No round logs have been sold at the Harrisburg market. Over three million feet of lumber have been sold in Harrisburg during the present trading season. One firm, alone, has bought eleven hundred thousand feet.

REMEMBRANCE.—Three members of the Junior class of Pennsylvania College at Gettysburg, having been suspended from attending school, the class have, on the 15th inst., held a public meeting at the residence of the Rev. Mr. Patton, at Carlisle, to raise a fund for the relief of the suspended students. The proceeds of the meeting were \$100.00, which was distributed to the students.

THE NEW STEAMER "UNION"

IT IS PROHOUNDED A DECIDED SUCCESS. THROWS A BOLD STRAIGHT 201 FEET. On Thursday, of last week, the new steamer built for the Union Fire Company of this place, by Messrs. Sibley & Co., of New York, was launched, and was christened by Mrs. J. P. Taylor, practical engineer, and a committee of the Union, who had met the machine at Harrisburg. The contract under which this machine was made, specified that it should be brought to Carlisle, and thoroughly tested before a committee selected by the Union Fire Company, when, if its performance proved entirely satisfactory, it was to be formally received by the company; otherwise, the manufacturers were to take it away, without any expense whatever to the fire company.

On Saturday and Monday the engine was thoroughly tried at the Letort Spring, foot of East Front street, in the presence of the members of the company, and a large number of spectators. In the incredibly short space of three minutes enough steam was generated to blow the whistle; in four minutes the engine indicated a speed of twenty miles in six minutes it began to throw water, and in a few moments reached the distance of 200 feet, through an inch and an eighth nozzle. Streams were thrown in every direction, perpendicularly and horizontally with the greatest gratifying effect. All present could not but acknowledge that the performance of the steamer exceeded their most sanguine expectations. A number of mechanics were present, who remarked that the working of the steamer was superior to any they had ever seen.

The disintegrating power of the Sibley engine is the rotary pump in contradistinction to the piston pumps used, we believe, by all other fire engine manufacturers. Amongst the advantages claimed for the rotary over the horizontal or vertical principle are the equal pressure upon the pistons, the absence of the frequent burstings of hose, and the general wear and tear of machinery incident to the thumping action of piston machines. Another prominent result of the rotary pumping apparatus is the perfect quietness of the machine while in service; indeed, the pumps being enclosed, if it were not for the noise of the numerous exhaustings of steam, it would be difficult for a bystander to tell when the steamer was in operation, so little motion is visible. Numerous other points were claimed for the rotary principle, and received by all who saw the machine in operation, but we have not space in this notice to enumerate them.

It was built by the Sibley manufacturing company of Seneca Falls, New York, and is a third class steamer. Two gentlemen connected with the engine, Robert Right and J. P. Taylor, explained all its workings to those present. The steamer is a model of beauty, and an ingenious piece of workmanship and skill, and from its simplicity is not liable to get out of repair, and will, if rightly managed, last for many years. Its weight is about 3,200 pounds, and cost \$5,000, which was paid by the fire company, without outside aid.

In conclusion we extend our congratulations to the members of the Union Fire Company, and thank them, in the name of the citizens of Carlisle, for the great benefit conferred upon this city by the Department. In the past they have always done their duty, and stood high in the estimation of the people, and we are confident that now, with the help of improved apparatus, they will add to their already well-earned reputation.

KNOW YE THE PRINTER'S HOUR OF JOY?

Know ye an hour more fraught with joy than ever felt the Mind of Greece when blessed by Venus' loving boy? This and when news of solemn note, his columns all with address fill, nor when brother printers quote the effusion of his blunt worn quill, but O, 'tis when the vapor, of gold, or clad in rain, or hail, or sleet, "I've come to pay for your paper."

MONS. FINE CATTLE.—We've noticed some fine cattle the other day being weighed on the scales attached to the National Hotel. There were fourteen in number, and averaged 1,200 pounds each. They were fattened by E. J. Craighead, of South Middleton township, and were a fine lot of cattle. They were purchased for the Philadelphia market, by Messrs. Swigert & Korn, of this place.

ABANDON.—Between eleven and twelve o'clock on Saturday night loud cries of "help!" "murder!" startled the citizens residing in the lower end of North street. On proceeding to the place the night-watch discovered a soldier from the garrison who had been attacked, when he was lying on the ground, and very badly beaten by some unknown persons.

DECORATION DAY.—The decoration of the soldiers' graves will be performed by Post No. 114, G. A. R. of this place, on the thirtieth of May. It is hoped that all persons who have flowers will present some, but we acknowledge that the performance of the steamer exceeded their most sanguine expectations. A number of mechanics were present, who remarked that the working of the steamer was superior to any they had ever seen.

On proceeding to the place the night-watch discovered a soldier from the garrison who had been attacked, when he was lying on the ground, and very badly beaten by some unknown persons.

OUR CITIZENS SHOULD BE IN MIND THAT

the Fair of the American Mechanics will commence on the eighteenth of June. It will be held at the residence of Hon. Richard J. Halbert, member of Congress from this District, was married, on Thursday last, to Miss Agnes Cameron, daughter of Hon. Sillgo Cameron.

THE "LANDSCAPE"—A little Hand Mower. "The best, simplest, and most efficient machine in the market for mowing lawns, etc." For sale by Messrs. Jones, 1621 Market street, Philadelphia. Read advertisement.

REMEMBER THAT we are prepared to execute all kinds of job work, in the best manner, and with the utmost dispatch. We have, within the past week, added considerably to our already large stock of job work, and do not hesitate to say that we have now one of the largest and most complete job offices in the Cumberland Valley.

ANOTHER COAL OIL DISASTER.—A few days ago, at La Crosse, Wis., a terrible calamity occurred, which resulted in the death of three hundred thousand dollars worth of property and the loss of four lives. This disaster was caused by criminal carelessness. A cooper undertook to mend a leaky barrel filled with coal oil, and to enable him to prosecute his work at night, he placed the barrel under the beam of a steam boiler, a freight depot and some houses were burned, and four people were drowned. This was most emphatically not a casualty. It was the result solely of a piece of criminal carelessness, for which the perpetrators should be severely punished. We daily chronicle accidents which would never occur but for this species of insanity, with which some people seem endowed. To a man in his sober senses to put a lighted lantern on a barrel of coal oil, which is as dangerous as gunpowder, would seem more like an earnest desire to commit suicide, and murder those about him. These "accidents" are most frequent in the West. If the persons who occasion them were to be arrested and tried for manslaughter it would prove the most efficacious remedy possible of application.

THE GETTYSBURG COMPILER says we have long believed in the fact that some day would be found in Adams county, and the belief may not be far from verification. It is said that a New York pair has leased the farm of Mr. John Cullings, on Opossum creek, Bondersville, and that in the short hour being taken they are receiving additional encouragement day after day. Prospect is also going forward near Mr. Henry Eppelman's mill, where a small vein of genuine coal has been found.

AN AMERICAN.—The Company, held Wednesday evening, May 13, 1870, for the purpose of raising a fund for the relief of the suspended students of Pennsylvania College at Gettysburg. The proceeds of the meeting were \$100.00, which was distributed to the students.
