tor of <i>The Horticulturist</i> says: "We have known quite a number of instances —indeed, so often as to make it quite a nue—that old örehards apparently dy- ing out have been brought back to fruit- fulness by the liberal use of wood ashes, and stirring the soil: Potash is the most important element in the success- ful growth of all kinds of fruit trees. An old gentleman told a club not long age, that he has known a man to make and preserve an orchard of apple trees in a flourishing and productive condi- tion, originally placed on very poor ground, by sprinkling every year around ach, tree, to the circumference of its branches, half a bushel of ashes. We consider this a very important item. ————————————————————————————————————	LACE POINTSI A splendid assortment at low prices. DOMESTIC JOODS selling at greatly reduced prices.
