MARK TWAIN AS AN AGRICULTURIST. Mark Twain in the July *Galaxy*, says he was temporary editor of an agricultural paper once. His editorials were rather marked by his unusual overflowing humor, rather than by any exhibition of knowledge of the subject. The following extracts will serve as specimens of his style and matter in agricultural writing:

"Turnips should never be pulled: It injures them. It is much better to send a boy up, and let him shake the tree.

* * * * * * *

"The guano is a fine bird, but great care is necessary in rearing it. It should not be imported earlier than June, nor later than September. In the winter it should be kept in a warm place, where it can hatch out its young.

"It is evident that we are to have a backward season for grain. Therefore, it will be well for the farmer to begin setting out his corn-stalks and planting his buckwheat cakes in July instead of August.

"Concerning the Pumpkin.—This berry is a favorite with the natives of the interior of New England, who prefer it to the goosberry for the making of fruit-cake, and who likewise give it the preference over the raspberry for feeding cows, as being more filling and fully as satisfying. The pumpkin is the only esculent of the orange family that will thrive in the North, except the gourd and one or two varieties of the squash. But the custom of planting it in the front yard with the shrubbery is fast going out of vogue, for it is now generally conceded that the pumpkin, as a shade-tree, is a failure.

HOW GOOD FARMERS SAVE MONEY.—They take good papers and read them.

They keep account of farm operations.

They do not leave their implements scattered over the farm, exposed to snow, rain and heat.

They repair their tools and buildings at a proper time; and do not suffer a subsequent threefold expenditure of time and money. They use their money judiciously, and they do not attend auction sales to purchase all kinds of trumpery because it is cheap.

They see that their fences are well repaired, and that their cattle are not grazing in the meadows, or grain fields, or orchards.

They do not refuse to make correct experiments in a small way of many new things.

They plant their fruit trees well, care for them, and of course get good crops.

They practice economy by giving their stock good shelter during the winter; also good food, taking all that is unsound, half rotten or mouldy out.

They do not keep tribes of cats, or snarling dogs around their premises who eat more in a month then they are worth in a whole lifetime.

Lastly, they read the advertisements, know what is going on, and frequently save money by it.

Successful farming is made by attention to little things. The farmer who does his best, earns his money with best appreciation, and uses it with best results. Such men are the salt of the earth.

THE CELERY CROP.—We hold to the same opinion now that we have for twenty-five years, that as a rule the transplanting of celery is deferred to too late a period. In nine cases out of ten there is not time enough allowed to fully develop the crop. Will not the experience of nearly every one affirm this; another mistake is shown in setting the plants too near the surface of the ground, rendering the banking up difficult and deficient. We greatly prefer the old way in vogue since the first cultivation of celery in this country; it is to dig trenches full ten inches deep; stir up the subsoil thoroughly; mix with plenty of short, well rotted yard manure; set the plants; water twice a day; cover with boards to protect from sun, six or seven hours a day, say from 9 to 4, until the plants are well established; then apply manure daily, in the absence of rain, until filling in and banking up of the earth begins.

The plants for early use—for the latter part of November and through December—should be set the last week in June; and all the rest by the middle of July.

Many persons cultivate celery in double or tripple rows. This does well enough were ground is scarce; but where there is plenty of room single rows are to be preferred, even though the plants are set closer together than usual. We have had celery by the single row system three feet and a half in length by the end of September.—*Germantown Telegraph.*

HOW TO MAKE A CALF DRINK MILK.—About the first of April I had it my possession (from a choice cow) a very fine calf, which I was desirous of raising, but it was so obstinate that it was utterly impossible for me to make it drink without first putting my finger in its mouth, and then my hand in the milk, and then as soon as the hand was withdrawn, it would not drink a drop. I kept it in this manner for two weeks, giving it during this time sufficient milk to keep it from starving, and had made up my mind to kill it, when I tried the following plan: I took a piece of corn cob, put one end in the calf's mouth, the other in the milk. This it would suck, and as soon as the cob fell from its mouth, it went diving around the pail to find it, and in a few minutes began to drink. I repeated this operation but twice, when I took the cob away, and it drank alone, and has done so ever since. The calf is now doing well, and growing finely. If any one is bothered in the manner I was, I would advise them to try the plan I did, and I will guarantee it to be very effective.—*Country Gentleman.*

WEANING COLTS.—A correspondent sends the following on this subject: I think as good a way as any is to take them from the dam and tie them in a table by themselves, with strong halters, and give them milk from the cow, which they will take the second or third time it is offered to them, if they get no water. You may give them milk or water as suits. Afterwards, give a few oats, and all the hay or green clover they can eat, when it can be got. At the end of seven or eight days, lead them out to the field at noon, and take them in at night; there must be good fences to keep them in. By doing, so, you will soon have them to lead like old horses.—*Stock Journal.*

THE hay crop in Maine is estimated to be worth $14,000,000, and $4,000,000, more than all the grain crops, including the potato crop also, in the State.

MANGERS should be low, and stables well ventilated and well lighted. Many horses are made blind by being kept in the dark.

DRY GOODS, &c.

SPECIE PRICES.

REDUCTION IN PRICES EXTRAORDINARY,

AT

GREENFIELD'S,

NO. 4 EAST MAIN STREET.

THE GREAT CAUSE

OF HUMAN MISERY.

JUST PUBLISHED IN A SEALED ENVELOPE.

Price, Six Cents.

A lecture on the nature, treatment, and radical cure of Seminal Weakness, or Spermatorrhœa, induced by Self-Abuse; Involuntary Emissions, Impotency, Nervous Debility, and Impediments to Marriage generally: Consumption, Epilepsy and Fits; Mental and Physical Incapacity, &c., by Robert J. Culverwell, M. D., author of the "Green Book," &c.

The world renowned author, in this admirable lecture, clearly proves from his own experience that the awful consequences of self abuse may be effectually removed without medicine, and without dangerous surgical operations, bougies, instruments, rings, or cordials, pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself, cheaply, privately, and radically. This lecture will prove a boon to thousands and thousands.

Sent under seal, in a plain envelope, to any address, on the receipt of six cents, or two postage stamps. Address the publishers,

MEDICAL.

DRS. D. FAHRNEY & SONS'

celebrated preparation for

CLEANSING THE BLOOD.

The long and favorably known preparation of Drs. D. Fahrney & Son for cleansing the blood, needs at this day no recommendation at our hands, its virtues having been established by the thousands of cases where it has given relief in the

Most Difficult Forms of Chronic Diseases

during the last sixty years. So highly indeed is it esteemed, that the demand is constantly increasing, not only at home, but we are daily receiving applications for it from the most remote sections of the country—North, East, South, and West. To meet this demand, as well as to prevent the public from being imposed upon, we have determined to put this

PREPARATION

in such a form that it may be within reach of everybody everywhere.

Other preparations, far inferior to the genuine, having been put out by certain parties, may have mistaken by some for our own, and as a matter of course the old Preparation of D. Fahrney & Son has been made to suffer some in reputation; therefore to prevent the mistake, as well as to meet the increasing demand mentioned above, we have concluded to send the medicine out in

LIQUID FORM.

We will also at the same time put out the original in package form for the benefit of some of our old customers and others who may yet prefer the medicine as first prepared. Not recommending it to cure all diseases the human body is heir to, but as a family medicine, and for all diseases originating from impure blood and deranged liver, it has no equal; and will cure the following diseases:

Scrofula, cutaneous diseases, erysipelas, boils, sore eyes, scald head, pimples on the face, tetter affections, old and stubborn ulcers, rheumatic affections, dyspepsia, costiveness, sick headache, jaundice, acid stomach, general debility, uncurable diseases, foul stomach, together with all other disorders arising from impure blood, and disordered liver, &c., &c., prepared by Drs. D. Fahrney & Son, Boonsboro', Maryland; and Dr. D. Fahrney, Keedysville, Md. Sold by all druggists and merchants generally. None genuine unless signed D. Fahrney & Son. Sold by W. F. Hora, druggist, Carlisle; S. S. Huber, druggist, Newville; James A. Clark, Iron Cross Roads; John C. Attick, druggist Shippensburg.

WILCOX & GIBBS'

SEWING MACHINE

We have secured the Agency of the Wilcox & Gibbs' Sewing Machine, a little family arrangement no one seems willing to do without after having seen one in operation. The Wilcox & Gibbs' is a Single Thread Machine and claims superiority over all Double Thread Machines in the following particulars. It is simpler and less liable to get out of repair. It is cheaper. It runs with less noise. It runs easier. It runs faster. It has the best device for preventing the wheel from running backward. It requires less mechanical skill to operate it. It requires less time and instruction to learn to use it. It is the most certain and reliable in its operations. Its needle is straight and less liable to be broken than a curved one. The needle is secured in its place by an ingeniously patented device which renders it self adjusting so that neither skill nor experience are required in arranging it. It sews directly from the spool thus doing away with the tedious operation of rewinding the thread for adjustment in the shuttle. It makes the Wilcox & Gibbs' or "twisted loop stitch," a stitch original with this machine and made by no other, the seam is more elastic and stronger than the Lock Stitch. The seam is the most even and beautiful, the seam is always self-fastened thus rendering a reversible feed. Its tension is more simple and more easily adjusted, it is more speedily changed from one kind of work to another, it does beautiful embroidery, it has the best hemmer, it has the best filler, it has the best braider, it has the best belt. The Wilcox & Gibbs has been in the market for a little more eight years, during which time upwards of sixty thousand have been made and sold, a number by fifty per cent. larger than were sold of any Double Thread Machine in the same number of its earliest years. Such success is sufficient to warrant the sale of this Machine wherever it has an Agency without the doubling evidence of testimonials, of which there are enough to fill up the columns in the land.—These Machines are on exhibition at our store, No. 26, North Hanover street, Carlisle, where they may be examined, and they will take great pleasure in explaining anything relating to it.

Respectfully &c.,

MILLER & BOWERS,

No. 26, North Hanover St., Carlisle, Pa.

CHEAP JOHN has just returned from the Eastern market, where, as usual, he got the biggest bargains in

CLOTHING,

NOTIONS,

FURNISHING GOODS,

BOOTS AND SHOES,

HATS AND CAPS, etc., etc.,

which he can sell now at Gold par prices.

ALL WOOL SUITS at $9 00, and no questions asked.

His goods are neater than the neatest,
And cheaper than the cheapest,
And when he lives and does his bles,
I am now going to tell.

He lives in the building attached to the Franklin House, (Bossy Wetzel,)

In rear of the Court House.

He is the fellow that used to have auction.

P. S.—We have a splendid stock of

BOYS' CLOTHING.

We can suit any boy between the age of four and seventy-nine. We intend to make

BOYS' CLOTHING A SPECIALTY.

DON'T FORGET

POOR CHEAP JOHN.

Landscape Lawn Mower.

LAWN MOWER.

THE "LANDSCAPE,"

of this little Hand Mower we are prepared to assert that it is the

BEST,

SIMPLEST,

AND MOST EFFICIENT

MACHINE

now in the market. We challenge all others. It is compact, cheap, and durable, and warranted to perform its work with ease and satisfaction. A small boy can operate it as well as a man. It has the double advantage of a Roller attachment, which will be found useful in the rolling of walks, &c.

Call and see it.

W. H. JONES,

Philadelphia Central Agricultural Implement and Seed Warehou
