RAISE PLENTY OF TOMATOES

Nothing else, except potatoes, supplies a better standard article of food through the whole year. Cooked with plenty of bread crumbs they furnish a very palatable and nourishing table dish, especially from December to June, when fresh garden vegetables are not abundant. Having sometimes failed with glass jars, we now use tin cans ten inches long and four and a half inches in diameter (cut from a sheet of tin ten by fourteen inches and cheaply made). A hole, say one and a-half inch in diameter, is left in one end. The tomatoes, in large quantities at a time, are cooked well, as for the table, but without salt. They are poured into the cans hot, and a bit of tin well soldered on. We put up fifteen to forty cans at a time, and call in a tinman to do the soldering, as we have a large number of cans ready at a time. Thus closely sealed they will keep perfect a month, a year, or five years. To provide against a poor year and insure a full supply always, we put them up for one or two years in advance. Scald the emptied cans and set them away dry, and they can be used several times with a little help from the tinman to smooth the heads.

GRAPE WINE.—A correspondent of *The Germantown Telegraph* gives the following recipe for making five gallons of wine: Press the juice from twenty pounds of grapes and rinse the pulp and skins in as much water as will cover them, mash them and strain through a coarse cloth, add this to juice and put it in two pounds of brown sugar to each gallon; when the sugar is dissolved, pour the whole into a keg having the bung open, and let it stand where the temperature will be about 70 degrees until fermentation ceases; then bung tight, and let it rest a month to settle, when it should be drawn off quietly, the keg well washed, and the wine returned to it, adding one pound good raisins—and if the wine does not seem sweet enough, add two pounds sugar to the whole. The necessity of doing this depends upon the kind and quality of the grapes.

The wine should remain until the keg is wanted the next season, when it may be bottled for use.

TURNIPS AMONG CORN.—A correspondent says: "It is frequently the case that in passing through cornfields in autumn, we find the space between the rows occupied with sturdy weeds sometimes the spurious vegetation completely overtops the maize, and "casts it into the shade." Now, I would inquire, is it not much better and more prudent, in every sense of the word, for the farmer to occupy the soil monopolized by the exhausting weeds with some crop that will contribute to his resources, than to have it filled with such productions, and which will not only "sap the land" most wretchedly, but foul it by the dissemination of their minute and multitudinous seeds? Certainly no farmer can doubt the affirmative. By sowing the purple-top turnip seed at the last dressing of the corn crop, and "scuffing" it in or sowing just before a rain, and allowing that to cover it, he can have a hundred bushels of good turnips per acre, if the soil be rich and well cultivated, instead of a host of worthless and pestilent weeds.

TO PREVENT HOGS FROM BITING EACH OTHER.—A correspondent of *The Prairie Farmer* says: Fifteen years ago I began feeding a large number of hogs on floored pens around a flouring mill, and they commenced biting each other. One hog would give another a bite, when he would run and squeal, and each hog he passed near, would give him a bite, and thus they kept the poor animal going until he died. I would go to the pen and stop them, but they would soon commence again. I concluded they were feverish, which made them restless, and they just bit each other for want of something to cool their fever. I tried a variety of remedies, and at length tried feeding stove coal, which I found a complete remedy. I have continued ever since to feed my hogs all the coal they would eat, and have never had any more trouble with their biting each other.

TO DESTROY THE STRIPED OR CUCUMBER BUG.—A correspondent writes to *The Maryland Farmer*.

"I send you an item, if you think it worth publishing, which effectually protected my melon, squash, cucumber and other vines from that destructive pest, the "striped cucumber bug," the past, season, with only one application, viz: A strong solution of henhouse manure say one peck of the manure to one and a half gallons water, let it stand twenty-four hours, and sprinkle the plants freely with it after sunset.

The above was suggested to me by a negro woman living on my place, who has some practical experience in gardening, and says she has used it for years, and has never known the first application to fail to drive them off, and they never return."

WHEN TO WEAN PIGS.—Eight weeks old is the best age. Seven will do. They should become accustomed to food such as is ordinarily given to hogs before weaning, and then there will be no need of any loss in growth by the loss of the mother's milk. If they are at all inclined to scour, one of the best preventives is an occasional day's feed of whole corn, or a few kernels with their other food each day. They should have all they will eat, and even if the farmer is under the necessity of buying corn to keep them along till his own harvest is ready in the fall, the growth will generally pay at least fifty per cent over the above cost.

GARDEN REFUSE.—Green stuff, such as cabbage leaves, radish and beet tops, and the like, should not be allowed to dry. Let them go, while fresh, to the pig pen or to the compost heap. Young weeds—and old ones ought not to be found in the garden—should have the same destination. By saving all the refuse of the garden in a heap by itself, or putting it in the pig pen, a surprising accumulation of valuable compost will be found at the end of the season.

CERTAIN timbers of great durability when framed together, act upon each other so as to produce mutual destruction. Experiments with cypress and walnut, and cypress and cedar, prove that they will rot each other while joined together, but on separation the rot will cease, and the timbers will remain perfectly sound for a long period.

AMONG the agricultural implements now manufactured in Great Britain are large numbers of elephant plows, which are forwarded by way of the Mediterranean, the Isthmus of Suez, and the Red sea and Indian ocean.

THE GREAT CAUSE

OF HUMAN MISERY.

JUST PUBLISHED IN A SEALED ENVELOPE.

Price, Six Cents.

A lecture on the nature, treatment, and radical cure of Seminal Weakness, or Spermatorrhœa induced by Self-Abuse, Involuntary Emissions, Impotency, Nervous Debility, and Impediments to Marriage generally; Consumption, Epilepsy and Fits; Mental and Physical Incapacity, &c., by Robert J. Culverwell, M. D., author of the "Green Book," &c.

The world renowned author, in this admirable lecture, clearly proves from his own experience that the awful consequences of self-abuse may be effectually removed without medicine, and without dangerous surgical operations, bougies, instruments, rings, or cordials; pointing out a mode of cure at once certain and effectual, by which every sufferer, no matter what his condition may be, may cure himself, cheaply, privately, and radically. This lecture will prove a boon to thousands and thousands.

Sent under seal, in a plain envelope, to any address, on the receipt of six cents, or two postage stamps, by addressing the publishers.

Also, Dr. Culverwell's "Marriage Guide," price 25 cents. Address the publishers, HA & J. V. KLINE & CO.,

1,7 Bowery, New York, Post Office Box 4,586.

MEDICAL.

DRS. D. FAHRNEY & SONS'

celebrated preparation for

CLEANSING THE BLOOD.

The long and favorably known preparation of Drs. D. Fahrney & Son for cleansing the blood, needs at this day no recommendation at our hands, its virtues having been established by the thousands of cases where it has given relief in the

Most Difficult Forms of Chronic Diseases

during the last sixty years. So highly indeed is it esteemed, that the demand is constantly increasing, not only at home, but we are daily receiving applications for it from the most remote sections of the country—North, East, South, and West. To meet this demand, as well as to prevent the public from being imposed upon, we have determined to put this

PREPARATION

in such a form that it may be within reach of everybody everywhere.

Other preparations, far inferior to the genuine, having been put out by certain parties, have been mistaken by some for our own, and as a matter of course the old Preparation of D. Fahrney & Son has been made to suffer some in reputation; therefore to prevent this mistake, as well as to meet the increasing demand mentioned above, we have concluded to send the medicine out in

LIQUID FORM.

We will also at the same time put out the original in package form for the benefit of some of our old customers and others who may yet prefer the medicine as first prepared. Not recommending it to cure all diseases the human body is heir to, but as a family medicine, and for all diseases originating from impure blood and disordered liver, it has no equal; and will cure the following diseases:

Scrofula, cutaneous diseases, erysipelas, boils, sore eyes, scald head, pimples on the face, tetter affections, old and stubborn ulcers, rheumatic affections, dyspepsia, costiveness, sick headache, jaundice, salt rheum, severe debility, all complaints of diseases, foul stomach, together with all other affections arising from impure blood, and disordered liver, &c., &c., prepared by Drs. D. Fahrney & Son, Boonsboro', Maryland, and Dr. P. Fahrney, Reedyville, Md. Sold by all druggists and merchants generally. None genuine unless signed D. Fahrney & Son. Sold by W. F. Hoss, druggist, Carlisle; S. S. Hobar, druggist, Newville; James A. Clark, Iron Cross Roads; John C. Attick, druggist, Shippensburg.

WILCOX & GIBBS'

SEWING MACHINE

We have secured the Agency of the Wilcox & Gibbs' Sewing Machine, a little family arrangement no one seems willing to do without after having seen one in operation. The Wilcox & Gibbs' is a Single Thread Machine and claims superiority over all Double Thread Machines in the following particulars. It is simpler and less liable to get out of repair. It is cheaper. It runs with less noise. It runs easier. It runs faster. It has the best device for preventing the wheel from running backward. It requires less mechanical skill to operate it. It requires less time and instruction to learn to use it. It is the most certain and reliable in its operations. Its needle is straight and less liable to be broken than a curved one. The needle is secured in its place by an ingeniously patented device which renders it self adjusting so that neither skill nor experience are required in arranging it. It sews directly from the spool thus doing away with the tedious operation of rewinding the thread for adjustment in the shuttle. It makes the Wilcox & Gibbs' or "twisted loop stitch," a stitch original with this machine and made by no other, the seam is more elastic and stronger than the Lock Stich. The seam is the most even and beautiful, the seam is always self-fastened thus avoiding a reversible seam. Its tension is more simple and more easily adjusted, it is more speedily changed from one kind of work to another, it does even fine embroidery, it has the best hemmer, it has the best filler, it has the best braider, it has the best belt. The Wilcox & Gibbs has been in the market for a little more eight years, during which time upwards of sixty thousand have been made and sold, a number by fifty per cent larger than were sold of any Double Thread Machine in the same number of its earliest years—such success is sufficient to warrant the sale of this Machine wherever it has an Agency without the doubling avidence of testimonials, of which there are enough to fill up the columns in this land. These Machines are on exhibition at our store, No. 26, North Hanover street, Carlisle, where they may be examined, and they will take great pleasure in explaining anything relating to it.

Respectfully &c.,

MILLER & BOWERS,

No. 26, North Hanover st.,

Carlisle, Pa.

Landscape Lawn Mower.

LAWN MOWER.

THE "LANDSCAPE."

Of this little Hand Mower we are prepared to assert that it is the

BEST,

SIMPLEST,

AND MOST EFFICIENT

MACHINE

now in the market. We challenge all others. It is compact, cheap, and durable, and warranted to perform its work with ease and satisfaction. A small boy can operate it as well as a man. It has the double advantage of a Roller attachment, which will be found useful in the rolling of walks, &c. Call and see it.
