GENERAL REMARKS. The cheerful aspect of national affair The encertul aspect of matoma that is a subject for congratulation. A prudent and patriotic administration has given to the country the substantial fruition of the victorics obtained in the late struggle-for freedom and the Republic. The dissevered States have been restored to the Union: peece refers triumphent to the Union; peace reigns triumphant through all our dominions; the national credit is established beyond the possibility of successful assault, and return ing prosperity abounds in every State and department of the government. The dectrine of free trade, so beneficial to foreign interests and so inimica to American industry, if carried out to s legitimate results, would soon cause American labor to be absolutely impoverished, reduce the free and happy mil lions of toilers to the degraded con of the down-trodden population of Europe, and capital would no longer seek enterprises thus rendered unremuneraerprises thus rendered unremunera-e. Protection to our products and nufactures, when rightfully viewed, protection to labor against con nnetition ad Labor in the United States commands higher wages than in any other country. Consequently our workother country. Consequently our work-ing men are the more elevated. Labor s the foundation of individual and naional wealth, and those nations that have most thoroughly protected it from foreign competition have been most During the late war the and capital invested, were obvious in developing and raising them from their paralyzed condition to the substantial prosperity which has since pervaded the country. And now, when it has been so country. And now, when it has been so a forced construction of this law that are not only able to defend ourselves, will justify the presence of armed nabut what is equally important, "to de-pend upon and live upon our own re-sources;" and when the advocates of sources;" and when the advocates of free trade are endeavoring to persuade us to adopt the absurd theory, that "tariffs hinder the development of industry and the growth of wealth;" why should not the wisdom of the grown next was a proper of a bad man, governed by the content of a bad man, governed by the content of the grown next was a proper of a bad man, governed by the content of the grown next was a proper of the grown next w nent make available the teachi experience and at once legislate for the good of the people? Why should it not protect American labor, maintain its compensation, give the producer a home market, and develop the unbounded re sources of the country? The duty on ten, coffee, and tropical productions, and all inquisitorial and other taxation under the revenue laws, except upon luxuries. Pennsylvania there is but little, if any, lifference of opinion on the subject of a reasonable protective policy. You can-not legislate upon this subject, but you can, and you should instruct your Senators, and request your Representatives in Congress to use their best exertions to preserve us from the baneful influence of free trade, to which the emissaries of

Great Britain are now, with syren songs, so anxiously and industriously endeavoring to lure us to destruction.

After a satisfactory adjustment of duties on foreign productions, so as to prevent the possibility of undue competition from abroad, and a thorough revi sion and modification of our system of internal taxation, a limit may safely be placed to the annual reduction of the National debt, say to fifty million dollars, except when great prosperity should make the treasury over plethoric, and then the occasional unexpended balances. might be used in the purchase of addi-

The introduction of "Chinese Coolie," telligent workingmen. It is a new species of slavery, equal in all its injurions tendencies to that, the extinguishment of which cost the nation such immense treasures and so many thousands, or valuable lives. It should not be tole rated for a single moment, as its results will virtually be to debase and force our workingmen into unnatural rivalry with the dregs of the Chinese popula Restrictive laws against the importation of this kind of labor, such as would stay its further progress, should be enacted without any unnecessary delay.

The claims against Great Britain for

depredations upon the commerce of our citizens, by the piratical steamship Alabama, and other vessels, and the disputed rights of our fishermen in the eastern waters, are yet unsettled. The import ance of these issues have caused mucl bitterness of feeling, and, to a consider able degree, involve the peace and hone of the country. The alleged cruel treatment, by England, of American citizens charged with complicity in some of the Fenian movements, equaled only by the historic horrors of Dartmouth and Andersonville, loudly call for the prompt and humane attention of our Govern-ment. These three subjects, I am informed, are now under the consideration of the National Administration, who of the National Administration, whose intention it is to settle them with as little delay as possible, and in such manner as will meet with general acquies-

cence and approval.

While two heroic nations in Europe have been engaged in deadly strife, shocking to civilization, our country has been but little affected by it in a physical sense. But our sympathies are deeply excited for both people, and in the name of humanity we carnestly hope their differences may soon be satisfacto rily adjusted and peace restored.

I have observed with pleasure that

Congress is about to provide, by legisla-tion, for the building up and protection of the commercial marine of our country, and for postal facilities to and from foreign countries by American vessels. These measures should, and no doubt These measures should, and no doubt will, receive the approval of the people. It is also gratifying to find the mercantile, manufacturing, railway and other interests of our great commercial, city of Philadelphia, moving with vigor, and, I am assured, with success, in providing the means necessary to establish a first-class line of American iron steamships to run between that city and European ports. The Legislature will, no doubt, grant liberal franchises to effect a result grant liberal franchises to effect a result grant liberal franchises to effect a result that will place our Commonwealth in advance of all others, in the construction and use of such vessels for ocean navigation. With the aid and facilities which the National and State Governments may find it their duty and interest to extend, it is hoped that this enterprise will be successful. The construction and monitonages of stampers with ble for the maintenance of steamers sured to the purposes indicated, would consume large amounts of our greatstaples—iron, steel, coal and lumber—and also give employed to thousands of our mechanics and ment to thousands of our mechanics and citizens, and vastly benefit all branches of trade and industry.

* All good citizens will rejoice when the

last disagrecable vestiges of the recent civil war shall have been obliterated. civil war shall have been obliterated, Since the cessation of open hostilities, the nation has set the whole world a noble example by its unprecedented magnanimity in forgiving the offenses and restoring to citizenship the great masses of those who warred against its peace and safety. In this regard, we have been invincible in war; and now but comparatively fow of these others. nave been invited in war; and now but comparatively few of those who sought to dissever the Union remain as aliens and strangers to its government. The supremacy of the laws has been maintained, and their power is no longer disputed. The passions that excited and protracted deadly strife have sub-sided, and we are again, practically sided, and we are again, practically, a homogeneous people. There are doubt-less, here and there, some disaffected spirits, but their numbers are too few and their power too insignificant, to give serious cause for uneasiness or alarm and their power consiness or alarm. Serious cause for uneasiness or alarm. And even towards these, conciliation will be more productive of good results than the avenging force of triumphant power. It is greatly to be desired that universal peace, amity and national followship and brotherhood should again may be a produced by the production of the produ prevail throughout our country. And the time is, I trust, close at hand, when this grand and porfect consummation will be effected by universal amnesty. It would efface the lingering distinctions which are festered by punishment of the

ts nower. It will accord with enlightened and progressive civilization, and harmonize with the tested might and grandeur of free institutions. It will sent, too, the noblest govern ipon the virtue and intelligence of a

The employment of United States troops at elections, without the consent of the local and State governments, has, recently received considerable attention and reprehension. It is regarded as an interference with the covariant interference with the covariant interference with the sovereign rights of the States, which was not contemplated by the founders of the general government, and, if persisted in, must lead to esults disastrous to peace and harmony The practice is one so serious in its character, and so injurious in its tendencies, as to merit prompt consideration, and decisive action, not only by the General Assembly but by Congress. One of the complaints of the colonists against the British King was the oppression growing calculated to carry on, successfully, a business of this kind, not only from the They said, "He has kept among us in times of peace, standing armies, without the consent of our Legislature; and what is especially pertinent to the case in point, "He has affected to render the and has made experimental and chemica

military independent of, and superior to the civil power." The alleged authority for the use of troops, at our State elec-tions, is derived from the tenth section of an act of Congress, approved May 31, 1870, entitled "Any Act to enforce the right of citizens of the United States of the Union, horses are able to cut and bind a field of and for other purposes," which authorizes United States marshals to call to their assistance, "such portion of the land and naval forces of the United We wish the enterprise of Mr. Isett States, or of the militia, as may be necessary to the performance of the duty with which they are charged, and to in-sure a faithful observance of the Fifteenth Amendment to the Constitution of the United States." But it, must be

tional forces at our places of election when no necessity exists therefor, and in the hands of a bad man, governed by personal ambition, it might prove ex-ceedingly calamitous. Unconsciously a good President might be induced to employ it wrongfully; a bad one would be almost certain to use it for his own ad-vancement. Under any circumstances, in my opinion, it is unsafe, and antagonistic to the principles that should govern our republican institutions. At the last October election United States troops were stationed in Philadelphia for the authorities of either the city or the State, avowed purpose of enforcing the election laws. This was done without the consent, or even the knowledge of the civil

reservatined, without existing necessity. From a conscientions conviction of its importance, I have called your attention to this subject. A neglect to have done so-might have been construed as an endorsement of a measure that meets my unqualified disapproval. The civil authorities of Pennsylvania have always been, and are still, competent to protect its citizens in the exercise of their elect-ive franchise, and the proper and only time for United States military forces to intervene, will be, when the power of the Commonwealth is exhausted, and their aid is lawfully required. The celebration of the Centennial

Birthday of American Independence is exciting much public attention. It will be an important era in the history of the Nation. Congress has already agitated the subject, and will, doubtless, soon take action in relation thereto. The The introduction of "Chinese Coolic," or "contract labor," is one of the great.

More Improvements—A large Agriultural Warehouse to be erected in Carlisle.—Our ancient borough bids fair o awaken from the lethargy which has the world's history as impregnable and so long held it. With a furnace project indissoluble, because founded, without being now discussed, and which will, distinction, class, birth, or circumstances, from present appearances be consummated, we have still other large enter prises which are now under way. One of them is the erection of a large three story brick building in the "South End," 45 feet frontage on Hanover street, and for a period of 10 years, by Mr. Frank B. Isett, formerly of the firm of McLanagan, Stone & Isett of Hollidaysburg, to be used as an Agricultural Depot, fo the sale of every conceivable implement business of this kind, not only from the fact of being a practical mechanic, and

> Anniversary.-The anniversary exercises of the Sabbath School connected with the English Lutheran congregation of this place, came off on Monday evening, the twenty-sixth ultimo. It con sisted in part of addresses, dialogues, and vocal and instrumental music. The large and spacious room of worship was filled to repletion with a brilliant audi ence, and judging from the general good feeling that prevailed, and the many pleasing countenances, the evening's entertainment far surpassed their most sanguine expectations. We had intended going into detail, but where all acquitted hemselves so creditably, it would be ascless to do so. We are also pleased to learn that in a financial point of view the exhibition was a grand success.

NIGHT SCHOOL .- The night school opened on Tuesday last, in the Directors' coom, in Education Hall. Mr. Frederick Embick, teacher of day school No. 11. has been placed in charge by the Board of Directors. The school commences under the most favorable auspices, and no doubt, much good will result from the new undertaking. We have been informed that there are upwards of 40 scholars, with large additions nightly. The school is for the benefit of the children of poor people, who are unable to attend during the day, and, also for others who are desirous of obtaining an education, without respect to age. It

s the intention to keep the school open for three months at least. N. B .- Latest advices inform us that here are now 72 scholars, and it is the intention of the Directors to furnish Mr. Embick with an Assistant. Success to the night school.

THE SKATING PARK .- We regret to say that the skating park has not reeived the encouragement which we had hoped. For years we had been clamorous for an institution of this kind in town, and we expected to see it a finanial success ; but since it has been finished the patronage has been very meagre Mrs. E. D. HOOFLAND'S GERMAN BITTERS Blue, Brown, Purple and Black Bitters without Alcohol or Spirits of any kine

Is different from all others. It is composed of the pure juices of vital patientles of Roots, Herbs, and Barks (or as medicinally or med, extracts,) the worthwest of the ingredients not being the professional of the ingredients not being the professional of the ingredients not being postulated as much medicinal virtue as will be found in several gallous of ordinary mixtures. The Roots, &c., used in this Bitters are grown in Germany, their vital principles extracted in that country by a scientific Chemist; and forwarded to the manufactory in this city, where they are compounded and bottled. Containing no spirituous ingredients, this Bitters is free from the objections urged against all others; no desire for stimulants can be induced from their use, they cannot make drunkards, and cannot, under any circumstances, have any but a beneficial effect. nt from all others. It is composed of t RLANKETS! BLANKETS!

HOOFLAND'S GERMAN TONIO

Was compounded for those as linchined to extreme bilters, and is intended for use in cases when some alcoholic stimulant is required in connection with the Tonic proporties of the Bitters. Each bettle of the Tonic contains one bottle of the Bitters, combined with pure Fanta Cruz Rum, and flavored in such a manner that the extreme bitterness of the Bitters is overcome, forming a preparation highly agreeable and pleasant to the palate, and containing the medicinal vartues of the Bitters. The price of the Tonic is \$1.50 per bottle, which many persons think too high. They must take into consideration that the stimulant-used is guaranteed to beef a pure quality. A poer strice result be furnished at a cheaper price, but is, it not better to pay a little more and have a good article? A miglicinal preparation should contain none but the lost ingredients, and they who expect to obtain a cheap compound with most certainly be cheated.

Recollect that it is After an experience of over thirty years in the tove and Tinnear business, in Carlisle, the undergued feels confident that his recommendation of toves has some weight with the community. He ow offers the colebrated EMPIRE GAS BURNER, DR. HOOFLAND'S which he feels satisfied is the best Base Burner i GERMAN, REMEDIES

which he feels satisfied is the best Base Burner the market. It is handsome, throwing a cheerf light around the room; there are no clinkers eve with the worst coal; the heat is reflected, to the flow and strikes the feet instead of the face; the gas entirely consumed; all dust is carried off by a bac pipe; it has a vontilating damper by which room may be kept thoroughly ventilated; and it produce as great heat from as small a quantity of coal as any alove over offered to the public.

He also offers the "Cozy Light," and the "Beacor Light," both Base Burners, highly recommended by all who have used them. All these Base burners are insured for three years, and if they do not work satisfactorily may be returned. Also the following well known that are so universally used and highly recommended; and do not allow the Druggiat to induce you to take anything else that he may say is just as good, because he makes a larger profeson it.
