The Carlisle Heruld.

VOI, 71. NO. 1.

THE GOVERNOR'S MESSAGE. We invite the special attention of ou readers'to the Fourth Annual Messag of Governor Geary, which we furnish them to-day in our supplement. It is a very well considered and exhaustive State paper, and the views and recom mendations contained will meet the hearty approval of the people. It embraces the entire field on which the Leg-

islature will be called to act, and those who desire to make themselves familiar with the workings of the State government may study the Message with profit. the bonds now held by the Sinking Fund Commissioners, and the application of the proceeds to the payment of the State maturing within the next year. With this recommendation the people will concur heartily. The presence of nine and one-half millions of securities is too strong a temptation for the politiclans of the State, and the sooner this amount can be credited on the debt the better it will be for all. " After this payment, the balance of debt remaining i about twenty-one millions, which, with the present revenues and expenditures, could be paid in about eight years. It is, however, considered a wiser policy to reduce the payment of the debt to a million of dollars yearly, and to diminish the taxation now resting on manufacturing, railroad and mining interests correspondingly.

The necessity of Constitutional reform is strongly advocated. Minority representation, an increase of the number of members of the General Assembly, the ent of Common Schools, and the creation of the office of Lieutenant Governor are among the principal changes suggested. The Legislature is earnestly recommended to make provision for the calling of a Constitutional Convention.

The Governor also recommends the adoption of the Civil Code, the continuation of liberal support to the common schools and the soldiers' orphans, and the encouragement of military organization and discipline among the people. A new geological survey of the State is quiring immediate attention. The importance of collecting statistical information concerning the resources, and the inconvenience that arises constantly from the want of them is forcibly set forth. The Message strongly enforces the

necessity of profession to American inominends the repeal of the dustry, fe taxation under the wonue laws, except on luxuries, whisky, and tobacco. The introduction of "Coolie" or "contract evils that can befal the toiling millions labor should be enacted without delay. and will commend itself to the great | may dictate. mass of the people. It is a platform on which the Republican party in the State may stand with the certainty that the fear that these most important meas his game. He forms acquaintances ac of laborers and tradesmen.

Mr. Haldeman is charged with having behotel a short time afterwards. We do kind. not propose to give the details of the occurrence as they were published, as they are correct but in the main, we hold unless it can be made gertain that his on the District which he represents We hope our Republican friends, who contributed directly or indirectly to reelect Mr. Haldeman, by an increased majority, may now see the great practi cal good they have accomplished in the endorsement of such a public officer, and profit by the lesson. The Democrats, also, who denounced him so furiously during the campaign, and then allowed themselves to be whipped into his support at the election, have the great satisfaction of seeing their Representa tive make good their worst prediction concerning him, and know that he hold the place a better man should have held through their unmanly and contemptible submission to the tricks of the trading politicians of their party.

The great tax case of the Commonwealth, vs. Credit Mobilier of America. was decided last week by a verdict in favor of the Commonwealth for \$636,-000. This was a very rightcous finding, and compels the speculators who bought up that corporation to pay the taxes that fairly accrued to the State on the profits of their speculations. Greateredit is due to the State officials who labored so carnestly to put this large" sum into the siderable portion of the State debt.

THE result of the election for State Senator in the First District, gives the control of the Sonate to the Democracy, This is a deplorable state of things, and more especially so, as it is a consequence State. Horace Greeley says, very truly, of the Republicans of New York, that "they are strong enough to make own State.

ness of the apportionment for Senators in still. is not very apparent.

THE Harrisburg Morning Patriot begins the new year considerably enlarged, itused bus wen fo thus a ni besserb bun. ful type. The Patriot is, decidedly, the ablest Democratic journal in the State. and we are glad to know that it receives the encouragement from its party that it creased interest and churacter to his paper impossible. This lock if it should occur, and especially for young French soldiers,

THE LEGISLATURE.

The Legislature of 1871 convened and rganized on Tuesday. The proceedings hus far, of course, amount to nothing, nor will they effect anything of importnce for a month to come. There is, owever, more important labor in. tore for our Legislature than has fallen

o the lot of any session for many years. There is a very wide-spread convicion among the best men of both parties, broughout the State, that the present Constitution requires revision to a reater degree than can be attained by n amendment. The election of the tailment of local and special legislation, right thinking men have reached the their will on these important questions. The apportionment of the State into without board; wages of female domesegislative and Congressional districts ties, \$4.25 a week without board ; board also a work of great importance, and of laboring men, \$3.25 a week. although the two branches of the Legiscontrol of the Legislature from the business have been swingled out of over

party that has a majority on the popular | \$10,000 vote. _ It is impossible to guard against an occasional misfortune of this kind, but care should be taken to guard against its frequent occurrence. Whilst no attempt should be made to prevent the minority, at the time the apportionment is made, from having its just representation, care regarded as of great-importance, and region rise to much scheming and inthem into political position.

labor" is deplored as one of the greatest tion. The necessity for a revision of of our country, and restrictive laws work of the Commissioners has been the end of their first, but each newly against the importation of this kind of performed with great care and dis | made lawgiver is fully convinced that The Message will, doubtless, be re- duty of the Legislature to adopt it with sion or commission on their part which ceived with favor throughout the State, whatever alterations their judgment he is wise enough, and great enough to

Advises Consumptives to go to Florida in Winter.

Having for the last thirty-five years devoted my whole time and attention to the study of lung diseases and consumption, I feel that I understand fully the course that ought to be puralled togestorea tolerably bad case of diseased lungs to healthy sounders. The first and most insportant step is for the patient to avoid taking cold, and the best of all places on this confinent for this purpose in whiter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as in mole Northern Institudes. Pointals is noint I can recommend. A good lated is kept there by Peterman. Last whiter I raw several persons there whose lungs had been hadly diseased, but who, under the healing influence of the climate and my melicines, were getting well.

One hundred-miles further down the river is a point which I would prefer to Palatka, as the tomperature is more even and the nit div and bracing. Mellowithe and Enterprise are located there. I should give a decided preference to Mellowithe. Mellowithe and Enterprise are located there. I should give a decided preference to Mellowithe and Enterprise are located there. I should give a docided preference to Jetelowithe. In that is a good sign, as it indicates a return of apposition, and when this is the case they generally increase in fiesh, and then this last the case they generally increase in fiesh and then this lungs must heal.

Jacksonville, Hibernia, Grein Cove, and many other places in various parts of Fordid, can be safely recommended to consumptives in winter. My reasons or saying so are that patients are less linble to take cold there than where there is a test even temperature, and it is not necessary to say that where a consumptive person exposes himself to frequent colds he vertain, old en hereity. Therefore my advice is, go welf-flown into the state out of the reach of prevailing cast winds and fogs. Jacksonyille, or almest any other of the localities I have issued, will benoit tho
