They are now offering, at reduced prices, a choic stock of AMERICAN AND SWISS WATCHES. MUSLINS, a few of the invaluable qualifies, (not possessed by any other washing machine yet invented,) are not enumerated.

It is the smallest, most compact, most portable, most simple in construction, most early operated.

A child ten years old, with a few hours' practice, can thoroughly comprehend and effectually use it. There is no adjusting, no serows to annoy, no delay in adapting! It is always ready for use! It is a perfect little wonder! It is a ministure siant, doing more work and of a better quality, than the most elaborate and cosity. One high of the labor is mility savet by its use, and the clother will last one-half langer than by the old plan! of the rub board. It will wash the largest blanket. Three shirts at a time, washing thofoughly! An aword, the ablution of any fabric, from a Quilt to a Lace Curtain or Cambric Handkerchied, are equally within the capacity of this LITTLE GEM! It can be fastened to any tub and taken off at will

No matter how deep rooted a prejudic may exist against Washing Machines, the moment this litter machine is seen to, perform its wonders, all doubts of ils closuring efficacy and utility ere tanished as in the doubter and detractor at once become the fast friends of the machine.

We have teatimoulals without end, setting forth its numerous advantages over all others, and from hundreds who have thrown saide the unwieldy, useless machines, which have signally failed to accomplish the object promised in prominent and iond sounding advertisements.

It is as perfect for washing as A wringer is for wringing. The price, an ther piranjount induce mont to purchasors, has been placed so low that it is no article of domestic economy that will repay the small investment as soon. distance.
