THE Mechanicsburg Journal calls up to account for not denouncing the action of the Republican county commit tee in electing a delegate to the State convention, instead of calling a county onvention. We venture to suggest that there is a considerable amount of matter in the Journal's article which could have been omitted without injury to its own side of the cause, and having said this we will furnish the information it seems to desire.

We are opposed to the action of the committee. We think it was unauthor ized and very unwise. If the delegate elected and the interest he represents was dominant in the county, a convention would have produced the result desired. If the choice of the county lay stifle that choice. Nobody pretends the Senate of the United States: that the convention authorized the committee to select a delegate. It was their ownaction. They are responsible for it. names them again for that position they. will be careful to define their duties.

question now as unwise and injurious. The Journal insists on a convention. What authority is there to call one? That is one of the functions of the committee. It determined, by an almost three-fourths vote, not to call a conven tion. If one were called by any outside authority, its regularity would be questioned, and if it named another delegate State Convention, and we would have a fight in our own organization, extending, perhaps, though the whole coming campaign, with a moral certainty all the time that the delegate chosen by the committee would be admitted. remarkable character in public life. Born a slave, and of a race which the charlatans of our earlier politics, taught us to believe were consigned to Blavery by Divine command, he has, by his own genius and force of character, brought himself to the notice and respectful consideration of the wisest and best men of this country and of Europe. To most men, even with fair advantages of birth and education, the more struggle for existence is sufficient employment, and to obtain even local reputation for any sort of superiority, unusual and exhausting effort is necessary. The man who wins in the race of life, even when he starts in advance of his fellows, and when as sisted by the influence of others, is conceded to have strength and merit. When in view of this we see a runaway slave transform himself into a man of refine ment and culture, and who, by the sheet force of his intellect becomes a power in a nation, where his race are serfs, we may be sure that in him are qualities of a high order.

SECRETARY BOUTWELL has again made his monthly statement of the financial condition of the country, and as thi completes the third year of President Grant's administration, it is well to con sider the facts it exhibits. During the month of February, the debt of the nation was reduced \$12,891,451.52, and during the three last years the reduction has been in round numbers \$300,000,000 Perhaps no country in the world has over witnessed so rapid a discharge of its indebtedness.

Our net indebtedness is now in round numbers \$2,240,000,000. Of this amount \$482,000,000 bear no interest, leaving \$1,800,000,000 as the debt which we really owe to creditors who demand and receive their interest regularly. Of this vast amount, a sum equal to the one sixth has already been paid by a Republican administration in the space of three years, thus demonstrating its ability -to wine- out the entire debt in twenty years, without imposing any unusual or some taxation. The moral effect felt for a century henceforth, in main taining the credit of the nation throughout the world, and assuring us the certainty of receiving prompt assistance and support from other nations, in any inancial difficulty, we may encounter. Its more direct effect has been to save a vast amount in our annual payment of terest, to make our currency nearly worth its face in gold, and insure at no distant day a reduction of the rate of inerest on the national loan, which will hortly be followed by a corresponding

Our cold night about New Years, a little town about seven miles from Plainfield, over the Springfield mountain, in Somerset county, New Jersey. A building over, a hundred years old was in lames. It was occupied by a German farmer named Boust. He missed one of his daughters, and ran back info the louse to save her. He had caught her in his arms and was making his way to the door, when the floor gave way and both were burned to death. Since then the ruins of the house have been to noved. The mansion was built in the old-fashioned style, with huge fireplaces in two of the rooms, the chimneys sloping toward each other, and joining life-

ore reaching the top. Walled in the cavity between the two fire places, a human skeleton in perfect preservation was discovered. An old flint-look musket stood at its side, and of this almost incredible work will be Dispatch.

LATER .- The upper portion of the Carter street front fell with a tremendous crash shortly after midnight, but the side walls still remain as firm as ever and if they continue so the Bank of Commerce and various broker offices on Chestnut street will probably escape, with the exception of damage from water.

I A. M .- The fire, which was thought to have been checked, has reached the eighth story on Chestnut street, and the flames have spread to the circular window at the corner of the building. A steady stream of water was directed to this spot from an adjoining roof into the side window and checked the progress of the fire there, but soon it extended to the cupola, which the water could not reach, and it was soon in a blaze, presenting a magnificent spectacle from its elevation, about 120 feet from the pave ment.
