REMINISCENCES OF THE RESUSCITATED .- It has been asserted by several very honest, but probably a load of hay with two brothers, and a son of incompetent persons that they have experienced a consciousness of being out of the body. The case on the back part of the head, and passed down the of Cardan and Von Helmont have been already mentioned; but perhaps the clearest and most positive testimony to the fact is that given by Dr. Adam Clarke, the learned Wesleyan, who when relating his recovery from drowning, stated to Dr. Letisom that during the period of his apparent unconsciousness, he felt a new kind of life. These are his words.-" All my views and ideas seemed instantly and entirely changed, and I had sensations of the most perfect felicity that is possible, independently of rapture, for the human mind to feel. I had no pain from the time I was submerged; a kind of green colour became visible to me; a multitude of objects were seen, not one of which however, bore the least analogy to any thing I had ever beheld before." When preaching in aid of the Humane Society, at the City road Chapel, in London, he said "I was submerged a sufficiently long time, according to my apprehension, and the knowledge I now have of physiology, for me to have been so com pletely dead as never more to exist in this world, had it not been for that Providence which as it were once more breathed into me the breath of life." Mr. Green, in his Dairy, mentions a person whohad been hung, and cut down on a reprieve, who being My spirit flutters with the ascending doveasked what were his sensations, stated that the preparations were dreadful beyond expression, but, Oh! fear not for thy child, nor let thy heart that, on being dropped, he instantly found himself amidst fields and rivers of blood, which gradually He doth but snatch me from the faithless part acquired a greenish tinge. Imagining, that if he could reach a certain spot, he should be easy, he seemed to himself to struggle forcibly to attain it, and then he felt no more. Here we find a green color again mentioned as the last impression on the mind, which perhaps may be explained on the principle mentioned in the chapter on light. The first effect of strangulation, is a re-tardation of blood which caused a red color to appear before the eye; but green always succeeds to red, unless the eye be directed to some other color. It is interesting to observe how, in the midst of the most violent struggle to which a human being can be subjected, the soul dissociates itself from the past and the present, and interprets impressions in keeping with its desire which seems ever to be capable of conferring a new world of thought according to its kind .-- The use of the Body in Relation to the Mind, by Dr.

HIEROGLYPHICAL MICA PLATES FROM THE MOUNDS by E. Geo. Squire, (in a letter to Prof. Silliman)-You have probably observed a paragraph, going the rounds of the newspapers, credited to a journal published at Lower Sandusky in this State, to the effect that a number of inscribed plates or mica were recently discovered on excavating an ancient mound near that place. These plates are represented in the account as oval in shape, measuring seven by ten inches, and covered with hyeroglyphics of different and beautiful colors, betokening a more advanced and entirely different state of the arts than has heretofore been discovered in the remains of Indian tribes." As this announcement has created some degree of interest, and elicited some inquries, it will not be out of our place to observe that one of the plates has been placed in our hands. through the kindness of a friend residing at the point mentioned. The form of the plate and their size are correctly represented, but the hieroglyphics are nothing more or less that discolorations caused either by the infiltration of a mineral solution between the laminæ, or by its presence at the period of crystallization. The material is very well complexion. Curing salt theum, ring worm, crystpelas known as graphic or hieroglyphic mica, a deposite and trash—proclaims it to be the ne plus ultra of soap. of which occurs upon the Schuykill, not far above Philadelphia. Although the discoloration, following the planes of crystallization, falls in places into right lines, it seems utterly unaccountable that they were mistaken for the work of man. This is terious admixtures; therefore, unlike all other soaps, it another illustration of the very loose manner in which facts relating to our antiquities have been do; therefore, if you wish a good article, ask for Radplaced before the world :-- a looseness, unfortunately, not entirely peculiar to newspaper statements. The plates are very pretty specimens of the mineral, and are each perforated, near one of the ends, with a small hole. They were undoubtedly used for purposes of ornament. Mica is common in the mounds, sometimes cut into the form of scrolls and other ornamental plates. I have taken a bushel of the sheets from a single mound.

THE LOUISVILLE MYSTERY .- A few days ago, a young lady walked into a clothing store at 'Louisville, purchased a suit of clothes (as she alleged) for her husband, and then walked out. Not many minutes after this transaction she was seen in the neighborhood of the store in the very garments she had purchased for her husband. Curiosity was excited-the police were on the qui vive-but the young lady some how or other, could not be found The Cincinnati Herald thus solves the mystery:

"We have at last found out the secret of the mysterious lady who was the cause of so much speculation at Louisvile. On Wednesday, as we were informed by respectable authority, a drayman on Main street, near Sixth, was accosted by a young gentleman, who asked him if he knew where a certain person lived, mentioning the name of a keeper of a house of ill fame. The drayman said that he did. Whereupon the young gentleman offered him five dollars if he would show him the house. He five dollars if he would show him the house. READ!! READ!!!

We, the undersigned, having visited Mr. Isaac Brooks, jr., at the office of Messrs. Rowand and Walton, 376 Market street, Philadelphia, consider his case the most remarkable one we have ever witnessed or heard of.

His disease was SCROFULA, and terrible must have been his twelve years' conflict with the destroyer!

have been his tweive years counict with the destroyer!

His Palate, the entire roof of his Mouth, Nese, Upper Lip, and Lower Lid of the Right Eye have been destroyed, his Face nearly eaten up, and part of the Jaw Bone carried away. And yet we can give no description of his case.

Mr. B. informs us that in January last the whole interior of his mouth, as well as most of his face, was a mass of deep and painful ulcers!

On the 14th of January last, he commenced taking Dr. Cullen's Indian Vegetable Panacea, which checked the disease in a few days, and from

mission.

New flesh has supplied the place of the deep ulcers, and though badly disfigured, his face is sound, and his general health is restored.

We are assured that in the treatment of Mr. Brooks' case, no Mercurials, Ointments, or Caustic applications have been used—in fact the Panacea alone, has wrought this wonderful change.
