

Prevention of Infection from Typhus Fever.
The London Weekly Despatch, of the 3d May, says Dr. J. C. Smith obtained £5000 from Parliament for the following recipe:
"Take six drachms of powdered nitre (saltpetre), and six drachms of sulphate of iron (oil of vitriol) mix them in a tea cup. By adding one drachm of the oil at a time, a copious discharge of nitrous acid gas will take place. The cup to be placed during the preparation on a hot hearth or a plate of heated iron, and the mixture stirred with a tobacco pipe. The quantity of gas may be regulated by lessening or increasing the quantity of ingredients. The above is for a moderate sized room; half the quantity would be sufficient for a small room. Avoid as much as possible breathing the gas when it first rises from the vessel. No injury to the lungs will happen when the air is impregnated with the gas, which is called nitrous acid gas, and it cannot be too widely known that it possesses the property of preventing the spread of fever."

CREATURES WITH THOUSANDS OF EYES.—What would be thought of a quadruped whose head, with the exception of the mouth and places of juncture with the neck, was covered with two enormous masses of eyes, numbering upwards of 12,000 in each mass? Yet such is the condition of the organs of vision in the dragon-fly. In the common bee the same structure is not less apparent. The fiery eyes of many gad-flies, (*Tabylis*), when present vivid bands of purple and green, are composed of similar lenses, and each eye contains nearly seven thousand. The ant has fifty lenses; the house fly four thousand; while above seventeen thousand have been counted in the eye of the butterfly, and more than twenty-five thousand in that of a species of beetle.—*Batterson's Introduction to Zoology.*

SINGULAR GALVANIC EXPERIMENT.—Weinhold the philosopher, cut off a cat's head, and when its arterial pulsation had ceased, took out the spinal marrow, and placed in its stead an amalgam of mercury, silver and zinc; immediately after this was done, the pulsation was recommenced, and the body made a variety of movements. He took away the brain and spinal marrow of another cat, and filled up the skull and vertebral canal with the metallic mixture. Life appeared to be instantly restored—the animal lifted up its head, opened and shut its eyes, and looking with fixed stare, endeavored to walk, and whenever it fell, tried to raise itself upon its legs. It continued in this state 23 minutes, when it fell down and remained motionless. During all the time the animal was in this state, the circulation of the blood appeared to go on regularly; the secretion of the gastric juice was more than usual, and the animal heat was re-established.

SPLENDID MIRAGE IN PARIS.—The Journal des Debats gives the following description of a mirage which occurred in Paris a short time ago. Between seven and eight in the morning the weather being cold and while the sun was rising brilliantly from the point of the steeple of the Cathedral of Versailles a narrow ray of a dark color, almost vertical, with a slight inclination to the west. Near this ray the image of the upper half of the steeple of the cathedral was designed, with its towers and all the numerous and delicate Gothic ornaments which decorated it on all sides. This image was so correct that it might have been mistaken for a representation made by the daguerotype. Eight times this phenomenon was repeated. Such an optical effect is unexampled in the country.

EDITORIAL COURTESY.—The editor of a paper in Kentucky says that a brother editor has "cooled off" in his ardor about going to Mexico since he learned that the Mexicans were not robbed. Whereupon the "brother editor," rejoins that if it should be officially announced that "the Mexican grog-shops are to be robbed," the editor of the Kentucky paper would be in Mexico in ten days.

MEXICAN TREATMENT OF PRISONERS.—While the Kentucky prisoners in Mexico are complaining of their treatment by the Mexican officers, those who fell into the hands of the people are treated with extreme kindness. Lieut. Whipple, recently captured near Vera Cruz, speaks particularly of the attention and kindness which have been shown him. He says:—"All the inhabitants of this village (Quatepec) have extended towards me more than the elegant civilities of refined life—they have given me assistance with a delicacy and propriety which no American community can excel."

HONORS OF IMMIGRATION.—The Canada papers are still recording the ravages of disease among the unfortunate emigrants; victims to crowded ships, badly ventilated and poorly provisioned, in which the filthy and the clean are indiscriminately placed. Among the passengers of one only of the hundreds of ships sent to Quebec this season, were Britons are understood to have died already than there were of Americans slain at Monterey or Buena Vista both of them bloody affairs with great armies.

NEW CALCULATOR.—Mr. W. M. Haines, of Rochester, N. Y. has invented a machine which can add and subtract columns of figures from units to billions, with the utmost accuracy. In the addition of decimals it is very valuable, for with a very limited practice a child can be made to work problems that would be very troublesome for any person to resolve. The model is a very neat machine capable of working four columns of figures. Mr. Haines has taken measures to secure a patent.

SINGULAR TREE IN NEW ZEALAND.—One of the most extraordinary trees in the forest of New Zealand is the rata, which originating in a parasite, grows to such a size as to rank among the trees of the forest. It first makes its appearance in the form of a tender vine; clasping the trunk of some large tree with its tendrils, and growing both upwards and downwards and increasing in bulk at the same time. After a while the parasite, having killed the parent trunk, establishes itself upon the root, sends forth numerous branches aloft which again send forth roots clasping the neighboring trees, and ultimately the rata occupies a larger space than any tree of the forest. It is under this tree that the vegetable caterpillar is found. The rata is the *Metrosideros robusta*, a very handsome plant, and of singular habits by no means satisfactorily explained.

PRaiseworthy.—At a meeting held at the Monongahela House, Pittsburgh, on Saturday last, resolutions were passed providing for the creation of a fund for the education of the children of Lieut. Parker. A very handsome sum was subscribed on the spot, and we trust it will be liberally added to.—*Sun.*

For the *Sun* and *Columbian*.
DEAR Sir—I noticed in the last number of the *Lancaster County Farmer*, a controversy respecting the treatment of Mr. Jacob Garber, who was struck with lightning. Now, sir, so far as I am able to judge of the allopathic system, I would consider that Drs. Rohrer and Cochran's treatment was admirable, and fully in accordance with the orthodox practice. But as the old system is fast growing out of date, and Young Physic taking its place, I take the liberty of manifesting to the public the mode we would pursue in a case of that kind. We would place the patient near a warm stove and use dry friction with capsicum, cocculus, 6th dilution, and two sponges every two hours, alternated with cantharide, 3d dilution, and perhaps it would be necessary to add belladonna; 4th dilution, continue until out of danger. SIMILIA SIMILIBUS CURANTUR.

COMPLEXION—Wright's Indian Vegetable Pills are the best cosmetic in the world; because they purify the body of those morbid humors which, lodged in the arteries, are the cause not only of yellow or sallow complexion and roughness of the skin, but of all kinds of eruptive diseases. Wright's Indian Vegetable Pills also aid and improve digestion, as well as cleanse and purify the blood, and therefore, give health and vigor to the whole frame, which, in turn, will be sure to give a clear and healthy complexion.
Beware of Counterfeits of all kinds! Some are coated with sugar; others made to resemble in outward appearance the original medicine. The safest course is to purchase from the regular agents only, one or more of whom may be found in every village and town in the State.

The genuine for sale by FRY & SPANGLER and J. D. & J. WRIGHT, the only authorized agents for Columbia. Also, by agents advertised in another column. Principal Office 169 Race Street, Philadelphia.
