Godey's Lady's Book, for January, 1851, is a brilliant number. It contains 72 pages, 22 engravings, and thirty-nine contributors! Several of the engravings are very beautiful, and are alone worth the subscription to the Book for a year. The number before us exceeds any one that has yet been issued. Godey has never yet been equalled, and it seems from this number that he is determined not to be. This being the proper time to subscribe for periodicals, we take pleasure in recommending the Lady's Book to our triends as being decidedly the best magazine now published.

Portage Rail Road. Editor of the Keystone:

DEAR SIR-Now that the heat of political excitement has more or less subsided and men are left to a calm and dispassionate reflection, I beg leave to lay before the democracy of the state, through the medium of the Keystone, a few remarks upon a single incident of the recent past and its unjust distortion to a base use. 1 am more particularly induced to do this from a reason I very much regret, and that reason is furnished by a democratic paper I have been in the constant habit of reading since 1835, and which paper I of about the time of the election.

from participating in the formation of transporting passengers on board the election, if ratified by a majority of thousands, would not make us believe him the

facts in the present matter, enable me to form one of my own-one, too, which has been pretty well sustained by "thousands," as you have seen. That Cambria sinister motives on the part of one of the delegation, has never been contradicted. Thus the infliction of wrong has a prior date, and exhibits the fact that the vociferous now have more than half intent in covering their own sins. In brief, (to avoid recapitulation.) there was a mutual agreement to abide the decision of the Ligonier convention. The obligations were

Whatever Messrs, Snodgrass and Smith may be considered. Mr. Campbell should not be held responsible for. In that event, of his responsibility,) there would be a sad digression from the democratic golden rule of "equal and exact justice to all," by who ever might be disposed to so operate. The standard of approbative excellence has been wisely thus: "is he honest, is he capable?" Of these qualities no honest man can interpose a doubt in the case of Mr. C. Then if the party and the board will act in acquiesence will the characteristic fixed principle of wis dom and judiciousness, they will not at in opposition to this rule, but will reward merit by countenance, and not permit to be sacrificed at the shrine of factions selfish aggrandizement. For the correct ness of my-position, I appeal to the de mocracy of the state.

Than Mr. Campbell, I venture the assertion there lives not a man in the commonwealth who could have conducted its affairs in his present sphere, better than place or person under his supervision, b has performed their functions with alaenty, correctness and precision. He has been active, prompt and vigilant, faithi decapitation for the gratification of tap tionists at the end of one year, then I am party, and their high functionaries-ult canal board.
