third generation, even if it endure so long. We must all know instances of individuals obliged to labor for their daily bread, whose grandfathers were men of fortune. The regular process of society would almost seem to consist of the efforts of one class to dissipate the fortunes which they have inherited, whilst another class, by their industry and economy, are regularly rising to wealth. We have all, therefore, a common interest, as it is our common duty, to protect the rights of the laboring man; and if I believed for a moment that this bill would prove injurious to him, it should meet my unqualified opposition.

Although this bill will not have as great an influence, as I could desire, yet, as far as it goes, it will benefit the laboring man as much, and probably more, than any other class of society. What is it he ought most to desire ?-Constant employment, regular wages, and uniform reasonable prices for the necessaries and what has been his condition under our system of expansions and contraction? From Wilson's Tales of the Borders. THE SOLDIER'S RETURN.

On arriving at humble cottage, unlamented by the friends of Abbotsford, I perceived a Highland soldier, ap- prosperity. parently fatigued as myself, leaning upon a walking stick, and gazing intently on the fairy palace of the magician, whose wand is since broken, but whose magic still remains. I am no particular disciple of Lavater's, yet the man carried his soul upon his face, and we were friends at the first glance. He wore a plain Highland bonnet, and a coarse gray coat, buttoned to the throat. His dress bespoke him to belong only to the ranks, but there was a dignity in his manner, and a fire, a glowing language in his eyes, worthy of a chieftian. His height might exceed five feet nine, and his age about comforts of life which he requires. Now, sir, thirty. The traces of manly beauty were still phere had tinged them with a sallow hue, and

Upon this point we find something very applicable in the language of Mr. Justice McLean, who in a charge delivered to the United States neath, to the astonished company, the richly Grand Jury for the District of Ohio, 1838, in reference to the then recent enterprise by citizens of the United States against the British possesions in Canada, said:

"The great principles of our republican institutions cannot be propagated by the sword. This can be done by moral force, not physical.

"If we desire the political regeneration of oppressed nations, we must show them the simplicity, the grandeur and freedom of our own Government. We must recommend it to the intelligence and virtue of other nations by its elevated and enlightened action, its purity, its justice, and the protection it affords to all its citizens, and the liberty they enjoy.

"And if, in this respect, we shall be faithful to the high bequests of our fathers, to ourselves, and to posterity, we shall do more to liberalize other Governments, and emancipate their subjects, than could be accomplished by millions of bayonets.

"This moral power is what tyrants have most cause to dread. It addresses itself to the thoughts and judgments of men. No physical force can arrest its progress. Its approaches are unseen, but its consequences are deeply felt. It enters garrisons most strongly fortified, and operates in the palaces of kings and

"We should cherish this power as essential to the preservation of our own Government; and as the most efficient means of ameliorating the political condition of our race. And this can only be done by a reverence for the laws, and by the exercise of an elevated patriotism.
