

MOUNTAIN SENTINEL.

GETTING AN APPOINTMENT.

The following good thing was related to us a few days ago, by a friend, as an undoubted fact: Under the Tyler administration, the office of Daniel Webster, then Secretary of State, was besieged for some time by a party, handsome specimens of humanity from St. Louis, who, keenly scenting an office, and not fastidiously particular as to what it was, posted himself at the elbow of the "god-like" at an early hour of the morning, and remained there nearly all day, determined to wear him out. Mr. Webster noticed his pertinacity—of course he could not well do otherwise, even though absorbed in business, and he entertained a kind of remote hope that the silent applicant would be ultimately disgusted with his attention to the evident purport of his daily visits, and leave.

But our Missouriian had no such idea of vacating the fort when once in it; he had come all the way from Pukedum for an office, and he was not "going to give it up so." And so it went on for a week or ten days—the applicant looking quietly over the papers, counting the flies on the ceiling, taking aim at the smallest speck on the fireplace, in short, doing every thing to pass the time, but talking. He had a list of applications, and to the great dispenser of official good things, and now it was the other's turn to speak out. Meanwhile the case with Webster grew desperate; he had evidently mistaken his customer; he wasn't the kind of a man to be put down by such tactics; he wouldn't be snubbed; he was good for a month or six weeks in just that same position, counting the same flies, spitting at the same mark and leisurely sipping the news out of the same newspaper. Something must be done; to get of him without an office of some kind was seemingly as difficult as to fabricate a chowder without a codfish. But the time came at the expiration of about fourteen days of incessant companionship.

One morning, Mr. Webster came into his office rather riled on some official matter, and there, as usual, sat the pertinacious Luke, at perfect ease with himself and the world. Webster went to his desk, and looked over the papers, and then, like the crater of a volcano just before the breaking of the fire. Forbearance ceasing to be a virtue, he turned and looked at his tormentor, but Missouri was firm as a rock, not to be moved by a look, even though it came from the "god-like." He clutched the small Missouriian with the crisis was at hand, and read the paper, or seemed to read, more intently than ever.

The bell rung and the chief clerk appeared. "Is there any vacant place on this side of Hell?" thundered Webster, pointing to his horror. The chief clerk understood the whole matter at a glance, and replied laconically—"There is a special messenger wanted for Mexico."

"Then send him to Mexico or Hell! but never let him come here." The applicant bowed gracefully to the Secretary, and walked out, as Mr. Webster sank into his arm chair, exclaiming, "Thank Heaven, he is gone at last!"

The Missouriian went to Mexico, as a special messenger, in a steamer expressly provided for him.

A THRILLING INCIDENT.
The first settlers in Maine found, besides the red-faced owners, other and abundant sources of annoyance and danger. The majestic forests, which then waved where now is heard the hum of business, and where a thousand villages stand, were the homes of innumerable wild and savage animals.

Once at night was the farmer's family aroused from sleep by noise without, which told that brain was storming the sheep pen or pig sty, or was laying violent puns on some unlicked calf—and often, on a cold winter evening, did they roll a larger log against the door, and with bestial force, "throw" the door around the fire as the usual bowl of the wicker, which recoiled through the woods.

As was the most notorious blood-thirsty, but cowardly of all, rarely attacking man, unless driven by severe hunger, and seeking his victim with the utmost pertinacity.

The incident which I am about to relate occurred in the early history of Dixfield.

A man who then lived on the farm now occupied by Mr. H— was one autumn engaged in felling trees at some distance from his house. His little son, eight years old, was in the habit, while his mother was busy with the household duties, of running out into the fields and woods around the house, and often going where the father was at work. One day after the frost had robbed the trees of their foliage, the father left his work sooner than usual, and started for home. Just by the edge of the forest he saw a very curious pile of leaves.

Without stopping to think that had made it, he cautiously removed the leaves, when what was his astonishment to find his own darling boy lying there fast asleep! "Twas but the work of a moment to take up the pile of leaves, and put in his place a small log, carefully replace the leaves, and conceal himself among the nearest bushes, there to watch the result.

After waiting a short time, he heard a wolf's distant howl, quickly followed by another and another, till the woods seemed alive with the fearful sounds.

The howls came nearer, and in a few minutes a large, gaunt, savage-looking wolf leaped into the opening, closely followed by the whole pack. The leader sprang directly upon the pile of leaves, and in an instant scattered them in every direction. Soon as he saw the deception, his look of fierceness and confidence changed to that of the most abject fear. He shrunk back, covered to the ground, and passively awaited his fate; for the rest, cowered by the supposed cheat, fell upon him, tore him in pieces, and devoured him on the spot.

When they had spoiled their comrade, they wheeled around, puffed into the forest, and disappeared; within five minutes from their first appearance, not a wolf was in sight. The excited father pressed his child to his bosom, and thanked the kind Providence which led him there to save his boy.

\$500 CHALLENGE.

WHATEVER concerns the health and happiness of a people is at all times of most valuable importance. I take it for granted that every person will do all in their power, to save the lives of their children, and that every person will endeavor to promote their own health at all sacrifices. I feel it to be my duty to solemnly assure you that *Scrofa*, according to the opinions of the most celebrated Physicians, are the primary causes of a large majority of diseases to which children and adults are liable; if you have an appetite continually changeable from one kind of food to another, Bad Breath, Pain in the Stomach, Picking at the Nose, Hardness and Fullness of the Belly, Dry Cough, Slow Fever, Pulse Irregular—remember that all these denote *Scrofa*, and you should at once apply the remedy:—

Hobensack's Worm Syrup.

An article founded upon Scientific Principles, compounded with purely vegetable substances, being perfectly safe when taken, and can be given to the most tender Infant with decided beneficial effect, where *Dowel Complaints* and *Diarrhoea* have made them weak and debilitated. The Tonic properties of my Worm Syrup are such that it stands without an equal in the catalogue of medicines in giving tone and strength to the Stomach, which makes it an infallible remedy for those afflicted with *Diarrhoea*, the astonishing cures performed by this Syrup after Physicians have failed, is the best evidence of its superior efficacy over all others.

THE TAPE WORM!

This is the most difficult to destroy of all that infect the human system, it grows to an almost indefinite length, becoming so coiled and fastened in the Intestines and Stomach effecting the health so sadly as to cause St. Vitus Dance, Fits, &c., that those afflicted seldom if ever suspect that it is *Tape Worms* hastening them to an early grave. In order to destroy this Worm, a very energetic treatment must be pursued, it would therefore be proper to take 6 or 8 of my Liver Pills so as to remove all obstructions, that the Worm Syrup may act direct upon the Worm, which must be taken in doses of 2 Tablespoonfuls 3 times a day these directions followed have never been known to fail in curing the most obstinate case of *Tape Worms*.

Hobensack's Liver Pills.

No part of the system is more liable to disease than the Liver, it serving as a filter to purify the blood, or giving a proper secretion to the bile; so that any wrong action of the Liver effects the other important parts of the system, and results variously, in Liver Complaint, Jaundice, Dyspepsia, &c. We should, therefore, watch every symptom that might indicate a wrong action of the Liver. These Pills being composed of *Roots & Plants* furnished by nature to heal the sick: Namely, 1st. An *Ez-purgant*, which augments the secretion from the Pulmonary membrane, or promotes the discharge of secreted matter. 2nd. An *Alterative*, which changes in some imperceptible and insensible manner the certain morbid action of the system. 3rd. A *Tonic*, which gives tone and vigour to all parts of the body. 4th. A *Cathartic*, which acts in perfect harmony with the other ingredients, and operating on the Bowels, and expelling the whole mass of corrupt and vitiated matter, and purifying the Blood, which destroys disease and restores health.

TO FEMALES.

You will find these Pills an invaluable medicine in many complaints to which you are subject. In obstructions either total or partial, they have been found of estimable benefit, restoring their functional arrangements to a healthy action, purifying the blood and other fluids so effectually to put to flight all complaints which may arise from blood irregularities, as leucorrhoea, giddiness, dimness of sight, pain in the side back, &c.

CONSUMPTION DISMISSED OF ITS TERRORS!!

HASTINGS' COMPOUND SYRUP OF NAPHTHA. A quick and positive Cure for Consumption, decline, asthma, spitting of blood, night sweats, husky throat, wasting of the flesh, bronchitis, coughs, colds, and all diseases of the chest and lungs. This celebrated preparation is pleasant to the taste, and is so speedy in its operations that patients plainly feel its good effects in a few hours after taking the first dose.

Hastings' Compound Syrup of Naphtha is now acknowledged by all the ablest physicians of both hemispheres, to be a quick and positive remedy for arresting the formation of tubercles on the lungs; and removing those already formed; and also to be the speediest and most effective of all medicinal agents in the cure of all other diseases of the throat, chest and lungs. Language cannot express the value of Hastings' Naphtha Syrup in these diseases. It not only cures them effectually, but it gives immediate evidence of its ability to do so; for in a few minutes after the first dose has been taken, the patient feels that a powerful agent is in the system, strongly working for his good. Its operations are never delayed:—It at once dies to, and attacks the root of the disease with an energy unknown to other medicines; and that disease must be completely sealed indeed which can resist its unrivalled influence. Hence it has frequently cured a painful cough in a day, which had defied other popular remedies for a month; and has removed difficulty of breathing and pain in the throat and chest, in a few minutes, by the surprising energy of its action in clearing the passages of bile and phlegm. It is believed that no person has given Hastings' Naphtha Syrup a trial, who has not felt benefit from it, and acknowledge its virtues. And this conviction is further established by the opinions of the London Lancet, London Medical Times, and most other responsible publications, devoted to the same interests. Until the appearance of the Naphtha Syrup, the medical faculty had always regarded Consumption as an incurable disease, and the records of medical science exhibited no authenticated case that weighed seriously against that opinion. Since Dr. Hastings' discovery, however, of the new and greatest property of Naphtha, when united with other ingredients, nearly a thousand cases of absolute phthisis positively cured through its merits successively made of its virtues by the ablest physicians of Europe, clearly prove that three of the main causes of this property of Naphtha have been discovered. They are its extraordinary ability, strength, and pervasiveness for the moment it is received into the system, it extends itself throughout, making a passage every pore, no matter how much clogged up they may have previously been by foreign substance. Hence it operates on the diseased lungs by dislodging the particles of corruption in the stragth of its ascent to the upper regions of the frame land thus producing thorough ventilation; and hence it is a never failing remedy in oppression of the chest and difficulty in breathing; persons thus affected, feeling after taking it, as if it had forced a passage through some channel which their disease had stopped up, and the re-opening of which was the only result necessary to the restoration of health. Such indeed, are the promptness of action and energy of Hastings' Naphtha Syrup, in all the diseases for which it is recommended, that from the time they commence taking it patients know

WHAT IT IS DOING THEM!

An effect nearly the reverse of that which attends the earlier use of every other known medicinal remedy. For Coughs, Colds, Sore Throat, Night Sweats, Pains in the Breast, Back, &c., spitting of blood, bilious and catarrhal Affection, it is also admitted to be the speediest and most vigorous and effective remedy extant; and in effect in all Asthmatic complaints is equally decided and remarkable. Lassitude of the mind, flabbiness and wasting of the flesh; and all disposition to inactivity and melancholy forebodings, are also quickly corrected by the Naphtha Syrup; which, in a wonderful manner, revives the spirits, corrected by the flesh and muscles—braces the nerves and increases the weight. Thus, those who use it according to directions, generally increase its weight about a pound a week; and may take it for no other purpose than the dissipation of melancholy, or the increase of bodily strength. In fine, a single trial of Hastings' Compound Syrup of Naphtha, is all that is required to secure the confidence of patients, and cause them to forego all other remedies in its favor. The Syrup is made up in six ounce bottles, each accompanied with a pamphlet, containing directions, certificates, &c. Price one dollar each, or six bottles packed up in a box, and ready for transportation to any part of the world, can be had for five dollars.

Agents—Hastings' Naphtha Syrup, being very expensive preparation, cannot be left with Agents on sale, or return, as is the case with the majority of the quack nostrums of the day, which cost little more than the price of the bottles. Persons who want it to sell again must pay cash for it, with the usual commission of 5%. Therefore patients who cannot obtain it in the places where they reside, should write us direct for a supply, and we will forward it to them without delay (packed up in a manner to secure its safe delivery) provided they can be reached by Express, Stage, Route, or any other mode of conveyance. All letters must be post paid—contain the price of the number of bottles ordered, and be directed to C. V. CLICKENER & CO., No. 81 Barclay Street, New York, who are Dr. Hastings' general Agents for America.

LYON'S MAGNETIC POWDERS,
FOR THE DESTRUCTION OF COCKROACHES, BED BUGS, MOLES, ANTS, FLIES, &c., AND ALL THE VARIOUS KINDS OF VERMIN, IN LESS THAN FIVE MINUTES AFTER BEING THROWN IN THEIR VICINITY.

This preparation is a powder compounded of Plants, Herbs, and Flowers, free from any substance which could possibly injure man or domestic animals, and is devoid of any disagreeable odor. It is now recommended by the medical faculty of Prussia, Russia, Sweden and Denmark, from all of whom ample testimony of its efficacy can be produced.

ALSO,
LYON'S MAGNETIC PILLS
For the destruction of RATS and MICE, within five minutes after being thrown in their vicinity.

Read the following Letters:

New York, October 1, 1850.
I have made a chemical examination of the Vegetable Powder prepared by Mr. Emanuel Lyon, for the purpose of destroying insects. I do not find it to contain anything deleterious to health, or what might be considered poisonous to the human species; but it is very destructive to insects, wherever they are forced to inhale the fine particles of dust occasioned by throwing the Powder forcibly in places where they frequent.

I have analyzed Emanuel Lyon's Magnetic Powders for the destruction of insects, and certify that it is entirely free from mineral or other corrosive poison. As the result of my examination I would say that it is a combination of various vegetable substances having a peculiar influence on the insect kingdom, and that it may be used with perfect safety. In reference to its utility, its effects are astonishing. I believe it to be a skillfully prepared substance by which a valuable result is obtained, which does not affect what Mr. Lyon says, and is well deserving of public patronage.

LAWRENCE REID, Professor of Chemistry, New York Hospital, June 9, 1850.

ENAMUEL LYON, Esq.
Dear Sir:—It affords me great pleasure in stating that I have extensively used your Powder for the destruction of insects of all kinds, (especially Bed Bugs and Roaches) and unhesitatingly pronounce it the best and only article so effectual in its operation. I have also experimented with your Pills, and find them equal in all respects with your Powders. Hoping that you may prosper, I remain your friend.

JOHN L. ROOME, Sup't. N. Y. Hospital.

GIBSON HOUSE, Cincinnati, October 9, 1850.
We procured from Mr. R. H. Meekings, some of Lyon's Magnetic Powder and Pills, and cheerfully certify as to its perfect efficacy in destroying Roaches and Rats within a few minutes after its application. It is the most simple, yet perfect remedy we have ever seen.

I. K. & D. V. BENNETT, New York, Irving House, April 21, 1849.
I have used Emanuel Lyon's Magnetic Powder and Pills for the destruction of insects and vermin, and I have found the most happy result, and cheerfully recommend them to those who may be troubled with these insects, as a sure method of destroying them.

WYER'S CHERRY PECTORAL

For the Cure of COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

To cure a cold, and the soreness of the body, take the Cherry Pectoral on going to bed, and wrap up warm, to sweat during the night. For a cold and cough, take it morning, noon, and evening, according to directions on the bottle, and the difficulty will soon be removed. None will long suffer from this trouble when they find it can be so readily cured. Persons afflicted with a seated cough, which breaks them of their rest at night, will find, by taking the Cherry Pectoral on going to bed, they may be sure of sound, unbroken sleep, and consequently refreshing rest. Great relief from suffering, and an ultimate cure, is afforded to thousands who are thus afflicted, by this invaluable remedy.

From its agreeable effect in these cases, many find themselves unwilling to forego its use when the necessity for it has ceased.

From two eminent Physicians in Fayetteville, Tenn., April, 16th, 1851.

Sir:—We have given your Cherry Pectoral an extensive trial in our practice, and find it to surpass every other remedy we have for curing affections of the respiratory organs.

DRS. DIEMER & HAMPTON.

T Singers and public speakers this remedy is invaluable, as they act on the throat and lungs, when taken in small quantities, it removes all hoarseness in a few hours, and wonderfully increases the power and flexibility of the voice.

Asthma is generally much relieved, and often wholly cured by Cherry Pectoral. But there are some cases so obstinate as to yield entirely to no medicine. Cherry Pectoral will cure them, if they can be cured.

Bronchitis, or irritation of the throat and upper portion of the lungs, is cured by taking Cherry Pectoral in small and frequent doses. The uncomfortable oppression is soon relieved.

Rev. Doct. Lansing, of Brooklyn, New York, states:—

"I have seen the Cherry Pectoral cure such cases of Asthma and Bronchitis as leads me to believe it can rarely fail to cure such diseases."

For Croup. Give an emetic of antimony, to be followed by large and frequent doses of the Cherry Pectoral, until subsides the disease. If taken in season, it will not fail to cure.

Whooping cough may be broken up, and soon cured by the use of Cherry Pectoral.

The influenza is speedily removed by this remedy. Numerous instances have been noticed here, where families were protected from any serious consequences, while their neighbors, without the Cherry Pectoral, were suffering from the disease.

SALM. Oe., 11th, June 1851.
Doct. J. C. AYER:—

I write to inform you of the truly remarkable effect of your Cherry Pectoral in this place, and in my own family. One of my daughters was completely cured in three days of a dreadful Whooping Cough, by taking it. Dr. Means, one of our very best physicians freely states that he considers it the best remedy we have for pulmonary diseases, and that he has cured more cases of Croup with it than any other medicine he ever administered.

Our clergyman of the Baptist Church says that during the run of influenza here this season, he has seen cures from your medicine he could scarcely have believed without seeing.

Yours respectfully, J. D. SINCLAIR, Deputy Postmaster.

From the distinguished Professor of Chemistry in the Medical College, New York City.

I have found the Cherry Pectoral, as its ingredients show, a powerful remedy for colds, and coughs, and pulmonary diseases.

PARKER CLEVELAND, M. D. Brunswick, Me., Feb. 2, 1852.

DR. VALNTINE MOTT, The widely celebrated Professor of Surgery in the Medical College, New York City.

"It gives me pleasure to certify the value and efficacy of 'Ayer's Cherry Pectoral,' which I consider peculiarly adapted to cure diseases of the Throat and Lungs."

Cures of severe diseases upon the Lungs have been effected by Cherry Pectoral in such extreme cases as warranted the belief that a remedy has at length been found that can be depended on to cure the Cough, Colds and Consumption, which carry from our midst thousands every year. It is indeed a medicine to which the afflicted can look with confidence for relief, and they should not fail to avail themselves of it.

DR. HOOPLAND'S CELEBRATED GERMAN BITTERS, PREPARED BY DR. C. M. JACKSON,

At the German Medicine Store, 120 Arch Street, Philadelphia.

Their power over the above diseases is not equalled by any other preparation in the United States, as the cure attests, in many cases of the skilful physicians had failed.

These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of diseases of the Liver and lesser glands exercising the most searching powers in weakness and affections of the digestive organs, they are withal, safe, certain and pleasant.

That this medicine will cure Liver Complaint and Dyspepsia, no one can doubt after using it as stated. It acts specifically upon the stomach and liver; it is preferable to calomel in all bilious diseases—the effect is immediate. They can be administered to female or infant with safety and reliable benefit at any time.

Look well to the marks of the Genuine. They have the written signature of C. M. JACKSON upon the wrapper, and his name blown in the bottle, without which they are spurious.
