

FROM OUR EXCHANGES.

Of one hundred and fifty convicts in the Western Penitentiary, only one is a female.

Gen. ROBERT ANTHONY has been seriously ill at Washington, but is recovering.

Hon. A. GRANT, of Penna., has positively declined the Consulship at Bordeaux.

DANIEL E. STICKNEY, of New York, is appointed Secretary of Legation of the United States at London.

RE-SUMMATION.—John Bigler has been re-nominated as the Democratic candidate for Governor in California.

Hon. R. J. WALKER has recovered from his late severe illness, and is now making active preparations for his departure to China.

The Russian Minister at Washington, annoyed at the tone of the Washington Union on the Russo-Turkish question, has "stopped his paper."

The Harrisburg Telegraph urges the nomination of John P. Pearson, Judge of the Dauphin and Lebanon judicial district, as the Whig Candidate for the Supreme Bench.

A WAG suggests that the stationer who furnished the post office with his gaudy and gilded flap, was anxious for notoriety and desirous of having "his name upon everybody's tongue!"

Somebody has gone to the trouble of ascertaining that there are seventeen persons now under sentence of death in the States of New Jersey, Pennsylvania, Georgia, and New York. They are to be hung during the next six weeks.

A SMASH.—On Monday, as Mr. Stevens, a jeweler of New York, was leaving town, his horse became frightened and jumped off the bridge into the tail-race of the Huntington mill, taking with them the carriage and Mr. Stevens. The carriage was broken to pieces, but neither Mr. Stevens or his horses were the least injured.—Huntington Globe.

The Japanese porcelain is remarkable. A late writer on Japan says:—"The tea-cups are especially worthy of attention. I have seen tea-cups, a dozen of which, with the saucers, would weigh three ounces. They are really transparent and so thin and delicate that one would believe the dropping of a piece of sugar would break them; nevertheless this very thinness gives them an extraordinary elasticity."

DROVSTYKS put a man to death for dreaming he had killed him. That looks harsh; but the King was philosophically just to the law of dream which always follows the tenor of our waking thoughts, however wildly and imperfectly.—When a young lady, a Neapolitan princess, was told by a courier that he had kissed her in a dream, she ordered him a smart bastinado, and she acted very properly. The rebuke was calculated to be a sole-felt one, and must have done him good.

Marshall Swartzwelder, a well known Pittsburgh lawyer, formerly member of the Legislature, has been missing for some time, and fears are entertained that he has been drowned. He was on a visit to St. Paul, Minnesota, and left his baggage at the hotel on the 2d July, since which he had not been heard of.

A later date says he went out on the river in a canoe, and the canoe was afterwards found upset.

The Scientific American says that teeth, in the form of purified white India rubber, have been patented in England. It adds:—"The adhesion is complete; it can be moulded with perfection to suit every inequality of the gums and teeth, and supplies an artificial peristome, as it were, to the teeth, when they become painful by the wasting away of the gum. Added to this is the elasticity of the material, which completely obviates the inconvenience that arises from any motion with artificial teeth made by other means."

Demerit State Convention. HARRISBURG, July 28, 1853.

William L. Hirst, of Philadelphia, took the chair, as chairman of the State Central Committee, and as President of the late Democratic Convention, after alluding in proper terms, to the death of Judge Gibson, and stating the reasons for the re-assembling of the Convention called that body to order.

The names of delegates to the last State Convention were called—it appearing that as large number being absent, their places were filled by substitutes. William Curtis and Robert Nevins acted as Secretaries.

Mr. Hill, of Franklin, moved that the counties of Franklin, Erie, Warren and Mercer, be permitted to be represented by delegates not residents of the respective counties named. This motion was advocated by its mover, and opposed by Messrs. J. W. Guernsey and A. Plumer, and finally voted down by a large majority.

Mr. Frailey, of Schuylkill, moved to proceed to the election of a temporary chairman; this motion was amended by Mr. Fulton, to substitute the words, "That we now proceed to the nomination of a candidate for Judge of the Supreme Court." To this amendment Judge Barrett moved an amendment, that the Convention now proceeds to business under its previous organization, and that the former officers of the same take their seats.

These various amendments were discussed by Messrs. Frailey, Horn, B. Knacas, Black, Hill and Judge Barrett, and the amendment of Judge Barrett to the amendment was finally adopted by a vote of yeas 77, nays 27.

On motion of John N. Guernsey and Joel B. Danner, the Hon. John C. Knox was unanimously nominated as a candidate for Judge of the Supreme Court.

A resolution was now offered to adjourn sine die, which was voted down by a large majority. The President appointed Messrs. McDowell, Lowry and Guernsey a committee to inform Judge Knox of his nomination.

After filing several vacancies on the committee appointed at the last convention, to draft resolutions, the Convention took a recess till seven o'clock, to hear the report of that Committee.

Evening Session. Convention met at 7 o'clock. Mr. Guernsey offered a resolution relative to the future organization of Conventions, providing that the Chairman of the State Central Committee act as Chairman ex officio of all future Conventions until permanent officers are appointed.

Col. Black, Chairman of Committee on resolutions, reported several short resolutions sustaining the administration of President Pierce and Gov. Bigler, and also regretting the death of Judge Gibson and Vice President King, which were adopted.

After the reading of the resolutions above referred to, Robert Tyler arose and offered resolutions sustaining the Pacific Railroad scheme, and re-affirming the Baltimore Platform; which Mr. Gore moved to amend by adding a resolution in favor of granting a Homestead of 160 acres to every actual settler of the Government lands.

The resolutions sustaining a strict construction of the Constitution, (Fugitive Slave Law,) and in favor of the Pacific Road were adopted. Mr. Gore's resolution was amended by arguing the next Congress to pass a law giving every soldier of the late wars 160 acres of the public lands, and in this shape it was adopted.

After a few remarks from the President, the Convention adjourned sine die.

Contemptible Meanness.

A recent number of that excellent family paper, the Home Journal, stated that the Queen of Great Britain some months ago received from a woman in Pennsylvania, an elaborately worked satin quilt, as a present, which she accepted, contrary to her usual custom, acknowledging its receipt. The donor, however, having visions of splendid gifts as returns for presents to royal personages, was indignant at not receiving thanks the value of what she had given—and so penned an indignant letter to her majesty, on the ground of her not receiving her Majesty for her present. The Queen answered by buying her off for \$20, at the same time stating that, in future, under no circumstances would she receive "presents from American ladies," of whom we fear she considers this woman a fair specimen.

When we perused this notice of the matter, we confessed that we felt somewhat annoyed, that this woman was an American, much more so that she was a Pennsylvanian; but now the meanness seems brought much nearer home, and it is strongly suspected that she is a resident of Allegheny city! A city paper states that one of our Europe Agencies recently received a note from their principals, authorizing the payment of \$20 (nearly a hundred dollars) to Mrs. ——— of Allegheny city, who (it is fair to presume) if the fair (?) donor of the bed-cover to Queen Victoria. The Agent, for Vic's security, should take a receipt in full—and we don't know but it should be published, as a caution to the other crowned heads of Europe, for who knows but the success of perseverance in this instance may not encourage her to play the same "thimble" trick upon others, or even upon our own republican President? "Times Danos et dona repertis."

Tunnelling Machine.

A very ingenious apparatus has been devised to facilitate the progress of the Piedmontese railroads, in which tunnels have been cut under mountains. The excavating machine cuts the channels in the rock, by means of several series of chisels placed one beside the other, in straight lines; these lines of cutting are so arranged as to be capable of a slight motion in the direction of the grooves after every stroke; the object of this is to bring the chisels to bear upon all the spaces lying between the several cutting tools situated in the same line, so as to produce not a succession of holes, but a continuous channel similar to a very wide saw-cut. This lateral shifting of the lines of chisels, which takes place alternately from right to left, and from left to right, is caused by a corresponding motion given to the frames in which they are fixed. Each chisel is driven against the rock by a spiral spring coiled round it. This spring, driving the chisel forcibly against the rock, obliges it to act efficaciously, notwithstanding the slight inequalities at the bottom of the channel, arising from a want of uniformity in the resistance of the stone. When the machine is in operation, the several lines of chisels are all drawn back simultaneously, by means of a species of cam or motion bar. The apparatus is arranged so as to enable each chisel to strike 150 blows in a minute. The machine at the same time sets in motion a pump, which forces a constant supply of water into a reservoir, the upper part of which is filled with compressed air. By this means the water is driven out in jets, through small pipes placed between the chisels, and is thus made to play upon the grooves, where it performs the double office of preventing the cutting instruments from becoming heated, and removing the dust and broken stones which would otherwise accumulate in the grooves, and thereby prevent the effectual operation of the excavator.

While cleaning out an old well at Lawrenceville, Ga., a few days since, two buckets of butter were taken from it, which had remained there fourteen years. The Pres says that notwithstanding its age the butter was not so strong or bad as some offered for sale in the groceries of that place.

One of the best replies that we remember to have seen to a fatuously laudatory address was made by James L. In a Shrewsbury address his royal subjects expressed a wish that he might reign over them as long as the sun, moon and stars should endure. "I suppose then," observed the monarch, "they mean my successor to reign by candle-light."

It always gives us pleasure to notice any article that confers a real benefit on the community, and it is with confidence we heartily commend Ayer's Cherry Pectoral to our readers as possessing extraordinary virtues for the cure of diseases incident to the Throat and Lungs.—This may account for our frequent reference to this article which we feel fully justified in making known to the public.—N.
