TO PHYSICIANS.

The attention of the Medical Profession in Penn. is respectfully invited to the following important facts:

- 1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its associated complications; the result of nature's delinquency of organization; defective physical education; early marriages; the various accidents of pregnancy; and labor, and general neglect of hygienic measures.
- 2. That as Prolapsus Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundamental condition of cure in all these cases, is the application of such a Physiological brace, or supporter, as will most effectively brace the weak back and muscles in performing the natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus.

The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and outlay, now offers to them an instrument which fully meets all the above indications. This Brace invented by Dr. Banning of N. Y., has already received the approbation of the Profession, or taken rank as a permanent contribution to Medical Science. While it supports the weak back and lifts up the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in erecting the body and expanding the chest, and in relieving the lungs from the undue pressure which can be derived from mechanical support, while acting in complete harmony with the forces of nature.

Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully invited to the annexed quotations:— Fine Steel Body Brace, Retail Price, \$10.00 Silver Plated " " " " " 15.00 Fine Steel Erector Brace, Retail Price, 15.00 Silver Plated " " " " " 20.00 Twenty per cent discount of these prices to Physicians.

A Scientific, Treatise, and Descriptive Essay, will be sent to Physicians, gratuitously, by addressing Dr. H. T. COFFEY, Feb. 3, 1854—4m. Hollidaysburg, Pa.

Advantages of the Body Brace over Other Supporters. It is cool. It is light. It is safe. It can be all shifted up and down, right or left, as frequently as the necessity of the case may require. Its great and universal flexibility. It is free from straps, bandages, or compresses, acts in harmony with nature, and defies scientific objection. For those who have weak backs, stooped shoulders, nervous or flatulent chests, or distended lungs it is the best invention ever presented to the public.

THE Erector Brace and Chest Expander, in addition to the above, making its support upon the front of the shoulders, without restraint or compression, erects the body, EXPANDS THE CHEST, and promotes health, grace and beauty. It is free from straps, bandages, or compresses, acts in harmony with nature, and defies scientific objection. For those who have weak backs, stooped shoulders, nervous or flatulent chests, or distended lungs it is the best invention ever presented to the public.
