TO PHYSICIANS.

The attention of the Medical Profession in Penn. is respectfully invited to the following important facts:

1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its associated complaints; the result of natural delicacy of organization; defective physical education; early marriages; the various accidents of pregnancy, and labor, and general neglect of hygienic measures.

2. That as Prolapsus Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundamental condition of cure in these cases, is the application of such a Physiological brace, or supporter, as will most effectively brace the weak back and without compression, assist the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus.

3. That the Supporters now in use never have received the approval of the profession, because, they all, in common, act as bracing and constricting clamps, compressing, and relaxing positions, creating a necessity for their perpetual use by restraining the freedom and exercise of the muscles, which they should only assist, and, also, aggravating the "falling" and dragging, by their crowding and compressing rather than their bracing and elevating tendency.

4. In view of the above facts, which every Physician has been compelled to feel too keenly, is it not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon the weak back and lifts all these cases, in the application of such a Physiological brace, or supporter, as will most effectively brace the weak back and without compression, assist the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus.

The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and study, now offers to them an instrument which fully meets all the above indications. The Brace invented by Dr. Banning of N. Y., has alone received the approbation of the Profession, or taken rank as a permanent contribution to Medical Science. While it supports the weak back and lifts all these cases, it does not, as the undersigned, by combining it with a recent invention, has added greatly to its efficiency in erecting the body and expanding the chest, and these instruments are derived from medical authority, which acting in concert with the forces of nature.

Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully referred to the annexed quotations:

Table with columns for Fine Steel Brace, Retail Price, Silver Plate, and Twenty per cent discount of these prices to Physicians.

Advantages of the Body Brace over Other Supporters.—It is light, and its pads can all be shifted up and down, right or left, as frequently as the necessity of the case may require.

1st. Its great and universal flexibility. 2d. It lifts UP—ALL OTHERS BRING DOWN. 3d. Its pads are four, and press on the neck, hips, and particularly the weak back supporting, yet not restraining the body. 7th. Its pads being of naked horn, stimulate and harden the muscles, while soft and cushioned ones (like poultices) relax and weaken, through heat and perspiration, and soon become rancid. 8th. It is so constituted as to admit of attaching to it any proper spinal apparatus, and also the most perfect pile and hernial trusses. 9th. It may combine with its mechanical influences the virtues of the galvanic battery, locally or generally applied.

The Erector Brace and Chest Expander, in addition to the above, makes pressure upon the front of the shoulders, and without constraint or compression, erects the body, expands the chest, and promotes health, grace and beauty. It is free from straps, bandages, or compresses, acts in harmony with nature, and defies scientific objection.

For those who have weak backs, stooped shoulders, nervous or flattened chests, or defective forms it is the best invention ever presented to the public.

RULE OF MEASUREMENT.—For the Body Brace, draw a tape snugly around the body, one and a half inches below the tips of the hip bones, and over the lumen—for the Erector Brace, add measurement to the chest, under the armpits, and send the number of inches, cash accompanying the order, and the Brace will be sent to order, with an explanatory circular, and exchanged to suit, provided it is immediately returned, in an unsold condition.

Life and Speeches of Henry Clay.

WITH A PORTRAIT.

And a view of the Birth Place of Mr. Clay. In one handsome large octavo volume of 1,300 Pages beautifully bound in cloth. 61c.

Or bound in two Volumes, cloth, gilt, \$3.50.

The work here presented is intended to trace clearly the career of Mr. Clay, from the entrance on the stage of public life down to the period of his death—mainly by the light of his own lofty, persuasive, and impassioned eloquence. Mr. Clay's parliamentary efforts, clear, direct, and vigorous, embody all the illustration that is needful to their full understanding—the great importance, variety and instructive interest of the topics he generally discussed—the character and ability of the orator, the direct and exact bearing of his arguments on the controversies and interests of the times, all contribute to render his speeches among the most valuable contributions of Patriotism and Genius to the enlightenment and elevation of the American people.
