TO PHYSICIANS.
The attention of the Medical Profession in Penn. is respectfully invited to the following important facts:
1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its associated complaints; the result of natural delicacy of organization; defective physical education; early marriages; the various accidents of pregnancy; and labor, and general neglect of hygienic measures.
2. That as Prolapsus Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundamental condition of cure in all these cases, is the application of such a Physiological brace, or supporter, as will most effectively fulfil every indication, and without compression, assist the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus. The observation of every Physician, and the extensive and increasing use of abdominal supporters, (so called) furnishes conclusive proof of this.
3. That the Supporters now in use never have received the approval of the profession, because, they all, in common, act as heating and constricting clamps, compress, and relaxing poisons, creating a false and pernicious use by restraining the freedom and exercise of the muscles, which they should only assist, and also, aggravating the "falling" and dragging, by their crowding and compressing rather than their bracing and elevating tendency.
4. A review of the above facts, which every Physician has been compelled to feel but too keenly, is not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon established principles of pathology, and which is at once effective, and necessary to the success of the practitioner, and professional in its origin and design?

The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and study, now offers to them an instrument which fully meets all the above indications. The Brace invented by Dr. Manning of N. Y., has also received the approval of the Profession, or taken rank as a permanent contribution to Medical Science. While it supports the weak back and lifts up the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in erecting the body and expanding the chest, and these instruments are believed to fulfil every indication that can be derived from mechanical support, while acting in complete harmony with the forces of nature.

Advantages of the Body Brace over Other Supporters.
1st. It is cool. 2d. It is light. 3d. Its pads can all be shifted up and down, right or left, as frequently as the necessity of the case may require. 4th. Its great and universal flexibility. 5th. It lifts UP—ALL OTHERS BEAR DOWN. 6th. Its pads are four, and press on the weak hips, and particularly on the weak back supporting, yet not restraining the body. 7th. Its pads being of elastic material, stimulate and harden the muscles, while soft and cushioned ones (like poeuvres) relax and weaken, through heat and perspiration, and soon become rancid. 8th. It is so constituted as to admit of attaching to it any proper spinal apparatus, and also the most perfect pills and hernial trusses. 9th. It may combine with its mechanical influences the virtues of the galvanic battery, locally or generally applied.
The Erector Brace and Chest Expander, in addition to the above, makes pressure upon the front of the shoulders, and without constraint or compression, erects the body, expands the chest, and creates health, energy and beauty. It is free from straps, bandages, or compresses, acts in harmony with nature, and defies scientific objection.—For those who have weak backs, sloped shoulders, narrow or flattened chests or defective forms it is the best invention ever proposed to the public.
For the Body Brace, draw a tape snugly around the body, one and a half inches below the tips of the hip bones, over the iliac-crest, under the chest, add measurement around the chest, under the arm-pits, and send the number of inches, cash accompanying the order, and the Brace will be sent to you, with an explanatory circular, and exchanged to suit, provided it be immediately returned, in an unsold condition.
