H. THANICAL INSTITUTE, NNOJation of opproved physiological sup-A. the treatment of Chronic Disease, and e numerous Weaknesses and Deformities of the body, in which support to the relaxed and dragging organs is an important condition of cure, and necessary to the success of internal treatment .-All the appliances used, are endorsed by many of the most eminent members of the Irofession, and consist, in part, of Body Braces, for Prolapsus Uteri, (or Falling of the Womb.) and the diseases of the Heart, Lungs, Stomach, Bowels, and weak- at any place desired. ness of the Back and Nerves, which result from such "falling,"-Spinal Supporters, for every variety of Spinal affection, - Chest Expanders, to erect the body, and enlarge the Chest,-Pile and Perineal Elevators, Hernial Trusses, etc. The increasing importance of this department of pathology, and the difficulty the country practioner has in procuring any mechanical aid, much less those that act in harmony with nature, induces the undersigned, at much cost and labor, to supply what is alike, a pro-fessional desideratum, and necessary to goard the public against the imposition of unscrentific and INJUBIOUS contrivances.

Physicians, and all others interested, are invited to call and examine. Those who desire to give their patients the auxillary benefit of any variety of scientific support, can send their patients to the Institute for that purpose, without risk of any abuse of such confidence.

A discount of 20 per cent to the profession on all instruments furnished them, or at their request. A roomwill be fitted up specially for Ladies, with a Lady in attendance. Hollidaysburg, Feb. 3, 1854—4m.

TO PHYSICIANS.

The attention of the Medical Profession in Penn is respectfully invited to the following important

facts: 1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its ascociated complaints; the result of natural delicacy of organization; defective physical education; early marriages; the various accidents of pregnancy, and labor, and general neglect of hygienic mea-

2. That as Prolapses Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundimenta condition of cure in all these cases, is, the application of such a Physiological brace, or supporter as will most effectively brace the weak back and without compression, useful the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus. The observation of every Physician, and the extensive and increasing use of abdominal supporters (so called) furnishes conclusive proof of this.

3. That the Supporters now in use never have received the approval of the profession, because, they all, in common, act as heating and confining clamps, compresses, and relaxing poultices, creating a necessity for their perpetual use by restraining the freedom and exercise of the muscles, which they should only assist, and, also, aggravating the "falling" and dragging, by their crowding and compressing rather, than their bracing and elevating tendency.

4. In view of the above facts, which every Physician has been compelled to feel but too keenly, is it not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon established principles of pathology, and which is at once effective, and necessary to the success of the practitioner, and professional in its origin and de-

sign ?
The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and outlay, now offers to them an instrument which fully meets all the above indications. The Brace invented by Dr. Banning of N. Y., has alone received the approbation of the Profession, or taken rank as a permanent contribution to Medical Science. While it supports the D. J. Evans. weak back and lifts up the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in erecting the body and expanding the chest, and these instru-ments are believed to fulfil every indication that can on hand a large and excellent assortment of be derived from mechanical support, while acting in complete harmony with the forces of nature.

Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully referred to the annexed quotations :

Fine Steel Body Brace, Retail Price, \$10.00 Silver Plated 15.00 Fine Steel Erector Brace, Retail Price, 15.00 Silver Plated " 26.00 Twenty per cent discount off these prices to Physicians.

A Scientific, Treatise, and Descriptive Essay, will be sent to Physicians, gratuitously, by addres-Dr. H. T. COFFEY, sing Feb. 3, 1854-4m. Hollidaysburg, Pa.

Advantages of the Body Brace over Other Suppoters .- 1st. It is cool. 2d. It is light. 3d. Its pada can all be shifted up and down, right or left, as frequently as the necessity of the case may require.
4th. Its great and universal flexibility. 5th. It LIFTS UP-ALL OTHERS BEAR DOWN. 6th. Its pads are four, and press on the weak hips, and particularly on the weak buck, supporting, yet not restrain ing the body. 7th. Its pads being of naked horn, stimulate and harden the muscles, while soft and cushioned ones (like poultices) relax and weaken, through heat and perspiration, and soon become rancid. 8th. It is so constituted as to admit of attaching to it any proper spinal apparatus, and also the most perfect pile and hernial truses. 9th. It may combine with its mechanical influences the virtues of the galvanic battery, locally or generally

applied.

The Erector Brace and Chest Espander, in addition to the above, makes pressure upon the front of the shoulders, and without constraint or compres sion, erects the body, EXPANDS THE CHEST, and promotes health, grace and beauty. It is free from straps, bandages, or compre-ses, acts in harmony with nature, and defies scientific objection. For those who have weak backs, stooped narrow or flattened chests or defective forms it is the best invention ever presented to the public. Rule of Measurement.—For the Body Brace,

draw a tape snugly around the body, one and a half inches below the tips of the hip bones, over the li-nen-for the Erector Brace, add measurement around the chest, under the arm-pits, and send the number of inches, cash companying the order, and the Brace will be sent to order, with an explanatory circular; and exchanged to suit, provided it be immediately returned, in an unsoiled condition.

Mechanics Manufacturers and Inventors A new Volume of the

SCIENTIFIC AMERICAN. Is commenced about the 30th September, each

year, and is the best paper for Mechanics and inventors published in the world. Each volume contains 416 pages of most value.

ble reading matter, and is illustrated with over 500 MECHANICAL ENGRAVINGS of new Inven.

The SCIENTIFIC AMERICAN is a Weekly Journal of the Arts, Sciences, and Mechanics, having for its object the advancement of the interests of Mechanics, Manuacturers and Inventors. Each number is illustrated with from five to ten

ORIGINAL ENGRAVINGS of new mechanical inventions, nearly all of the boot inventions which are patented at Washington being illustrated in the Scientific American. It also contains a weekly list of American patents; notices of provements; practical directions on the construction, management, and use of all kinds of machin ery, tools, &c. &c.

It is printed with new type on beautiful paper, and being adapted to binding, the subscriber in possessed, at the end of the year, of a large volume of 416 pages illustrated with upwards of 500 mehanical engravings. The Scientific American is the Repertory of Pat-

ent Inventions; a volume, each complete in itself forms an Encyclopedia of the useful and entertain. ing. The Patent claims alone are worth ten timethe subscription price to every inventor.
