INJUBIOUS contrivances. Physicians, and all others interested, are invited to call and examine. Those who desire to give their patients the auxiliary benefit, of any variety of scientific support, can send their patients to the Institute for that purpose, without rick of any abuse of such confidence.

A discount of 20 per cent to the profession on all instruments furnished them, or at their request. Aroom will be fitted up specially for Ladies, with a Lady in attendance. Hollidaysburg, Feb. 3, 1854-4m.

TO PHYSICIANS.

The attention of the Medical Profession in Penn. is respectfully invited to the following important facts:

1. Not less than two thirds of the American women are afflicted with Prolapsus Uteri, and its associated complaints; the result of natural delica-cy of organization; defective physical education; early marriages; the various accidents of pregnancy, and labor, and general neglect of hygicnic mea-

2. That as Prolapses Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundimental condition of cure in all these cases, is, the application of such a Physiological brace, or supporter, as will most effectively brace the weak back and without compression, assist the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uterus. The observation of every Physician, and the extensive and increasing use of abdominal supporters, (so called) furnishes conclusive proof of this.

3. That the Supporters now in use never have received the approval of the profession, because, they all, in common, act as heating and confining clamps, compresses, and relaxing poultices, creating a necessity for their perpetual use by restraining the freedom and exercise of the muscles, which they should only assist, and, also, aggravating the "falling" and dragging, by their crowding and compressing rather, than their bracing and elevating

4. In view of the above facts, which every Physician has been compelled to feel but too keenly, is it not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon established principles of pathology, and which is at once effective, and necessary to the success of the practitioner, and professional in its origin and de-

sign? The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and outlay, now offers to them an instrument which fully meets all the above indications. The Brace invented by Dr. Banning of N. Y., has alone received the approbation of the Profession, or taken rank as a permanent contribution to Medical Science. While it supports the weak back and lifts up the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in erecting the body and expanding the chest, and these instru-ments are believed to fulfil every indication that can

be derived from mechanical support, while acting in complete harmony with the forces of nature. Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully referred to the annexed quotations :

Fine Steel Body Brace, Retail Price, \$10.00 Silver Plated " 15.00 Fine Steel Erector Brace, Retail Price, 15.00 Silver Plated " Twenty per cent discount off these prices to

Physiciaus. A Scientific, Treatise, and Descriptive Essay, will be sent to Physicians, gratuitously, by addres-Dr. H. T. COFFEY, Feb. 3, 1854-4m. Hollidaysburg, Pa.

Advantages of the Body Brace over Other Supporters.—1st. It is cool. 2d. It is light. 3d. Its pads can all be shifted up and down, right or left, as frequently as the necessity of the case may require. 4th. Its great and universal flexibility. 5th. It LIFTS UP-ALL OTHERS BEAR DOWN. 6th. Its pais are four, and press on the weak hips, and particularly on the weak back, supporting, yet not restrain-ing the body. 7th. Its pads being of naked horn, stimulate and harden the muscles, while soft and qualifoned ones (like poultices) relax and weaken, through heat and perspiration, and soon become rancid. 8th. It is so constituted as to admit of attaching to it any proper spinal apparatus, and also the most perfect pile and hernial truses. 9th. It may combine with its mechanical influences the virtues of the galvanic battery, locally or generally

applied.

The Erector Brace and Chest Expander, in addition to the above, makes pressure upon the front of the shoulders, and without constraint or compression, erects the body, EXPANDS THE CHEST, and promotes health, grace and beauty. It is free from straps, bandages, or compresses, acts in har-mony with nature, and defies scientific objection.— For those who have weak backs, stooped shoulders, narrow or flattened chests or defective forms it is the best invention ever presented to the public.

RULE OF MEASCREMENT.-For the Body Brace, draw a tape snugly around the body, one and a half inches below the tips of the hip bones, over the linen—for the Erector Brace, add measurement around the chest, under the arm-pits, and send the number of inches, cash companying the order, and the Brace will be sent to order, with an explanatory circular; and exchanged to suit, provided it be immediately returned, in an unsoiled condition.

M. ROBERTS MESSES. TUDOR & ROBERTS. FEELING thankful to the citizens of Ehensburg

and vicinity for their former patronage, beg leave to state, that having been both East and West, they have purchased the largest and best stock of GROCERIES AND CONFECTIONS,

Mechanics Manufacturers and Inventors. A new Volume of the

SCIENTIFIC AMERICAN. Is commenced about the 80th September, each year, and is the best paper for Mechanics and Inventors published in the world. Each volume contains 416 pages of most valua-ble reading matter, and is illustrated with over 500 MECHANICAL ENGRAVINGS of Dew laves

The SCIENTIFIC AMERICAN is a Weekly Jone nal of the Arts, Sciences, and Mechanics, having for its object the advancement of the interests of Mechanics, Manuacturers and Inventors.

Each number is illustrated with from five to ter ORIGINAL ENGRAVINGS of new mechanical inventions, nearly all of the best inventions which are patented at Washington being illustrated in the Scientific American. It also contains a weekly list of American patents; notices of the progress of all mechanical and scientific improvements; practical directions on the construction, management, and use of all kinds of machin

ery, tools, &c. &c.

It is printed with new type on beautiful paper, and being adapted to binding, the subscriber in possessed, at the end of the year, of a large volume f 416 pages illustrated with upwards of 600 me. hanical engravings.

The Scientific American is the Repertory of Pasent Inventions; a volume, each complete in itself forms an Encyclopedia of the useful and entertain. ing. The Patent claims alone are worth ten timethe subscription price to every inventor.
