H. T. COFFEY, M. D.
ANNOUNCES TO THE PROFESSION, THAT

He has opened, in the rooms adjoining his office, in Hollidaysburg, a SURGICO-MECHANICAL INSTITUTE, for the application of approved physiological supports, in the treatment of Chronic Diseases, and those numerous Weaknesses and Disorders of the body, in which support to the related and dragging organs is an important condition of cure, and necessary to the success of internal treatment. All the appliances used, endorsed by many of the most eminent members of the Profession, consist, in part, of Body Braces, for Prolapsus Uteri, (or Falling of the Womb), and the disease of the Heart, Lungs, Stomach, Bowels, and weakness of the Back, Nerves, which result from such "falling,"—Spinal Supporters, for every variety of Spinal affection,—Chest Expansors, to strengthen the body, and enlarge the Chest,—Pile and Prolapsus Elevators, Herial Trusses, &c. The increasing importance of this department of pathology, and the difficulty the country practitioner has in procuring any mechanical aid, much less those that act in harmony with nature, induces the undersigned, at much cost and labor, to supply what is alike, a professional desideratum, and necessary to guard the public against the imposition of quackery and imposture.

Physicians, and all others interested, are invited to call and examine. Those who desire to give their patients the auxiliary benefit of any variety of scientific support, can send their patients to the Institute for that purpose, "without risk of any abuse of such confidence."

A discount of 50 per cent to the profession on all instruments furnished them, or at their request. Rooms will be fitted up specially for Ladies, with a Lady in attendance. [Hollidaysburg, Feb. 3, 1854.—4m.]

TO PHYSICIANS. The attention of the Medical Profession in Penn. is respectfully invited to the following important facts: 1. Not less than two thirds of the American youth are afflicted with Prolapsus Uteri, and associated complaints; the result of natural delicacy of organization; defective physical education; early marriages; the various accidents of pregnancy, and labor; and general neglect of hygienic measures.

2. That as Prolapsus Uteri is a displacement, or "falling" of this organ, it necessarily involves a like descent, or dragging of the Heart, Lungs, Stomach, and Bowels, and that one fundamental condition of cure, is the application of a Physiological brace, which, acting as will most effectively brace the weak back and without compression, assist the relaxed and over-taxed muscles in performing their natural office of lifting and holding in their place, the dragging viscera of the Chest and Abdomen from the depressed Uteri.

The observation of every Physician, and the extensive and increasing use of abdominal supports, (so called) furnishes conclusive proof of this. 3. That the Supporters now in use never have received the approval of the profession, because they all, in common, act as levers, and, by creating clamps, compresses, and relaxing positions, create a necessity for their perpetual use by restraining the freedom and exercise of the muscles, which they should only assist, and, also, aggravating the "falling" and dragging, by their crowding and compressing, rather than their bracing and elevating tendency.

4. In view of the above facts, which every Physician has been compelled to feel but too keenly, is it not the duty, as well as the interest of the Profession, to seek for an instrument which acts upon established principles of pathology, and which is, as once effective, and necessary to the success of the practitioner, and professional in its origin and design?

The undersigned, therefore, acting in accordance with the true interests of the Profession, and after much investigation and outlay, now offers to the public an instrument which fully meets all the above indications. The Brace invented by Dr. Benning of N. Y., has alone received the approbation of the Profession, and taken rank as a permanent contributor to the relief of the afflicted, and, particularly the weak back and lifts up the abdominal viscera, the undersigned, by combining it with a recent invention, has added greatly to its efficiency in elevating the body and expanding the chest, and these instruments are so constructed, as to be used in complete harmony with the forces of nature. Desirous of introducing these Braces through the cooperation of Physicians, and being enabled to furnish them at Manufacturers prices you are respectfully invited to send orders to the undersigned.

Fine Steel Body Brace, Retail Price, \$10.00
Fine Steel Erector Brace, Retail Price, 15.00
Fine Steel Erector Brace, Retail Price, 20.00
Twenty per cent discount off these prices to Physicians.

A Scientific, Treatise, and Descriptive Essay, will be sent to Physicians, gratuitously, by address: Sept. 9, 1853.—4f. Dr. H. T. COFFEY, Hollidaysburg, Pa.

Advantages of the Body Braces over Other Supporters.—1st. It is cool. 2d. It is light. 3d. Its fastenings are all shifted up and down, right or left, as frequently as the necessity of the case may require. 4th. Its great and universal flexibility. 5th. Its ribs rest—its cramps and sores. 6th. Its pads are four, and press on the sides, which, particularly on the weak back, supporting, yet not restraining the body. 7th. Its pads being of napped horn, stimulate and harden the muscles, while soft and cushioned ones (like pillows) relax and weaken. 8th.
