SUPERIORITY OF AMERICAN IRON .-- It is

Superiority of AMERICAN IRON.--It is clearly established, says the Buffalo Democra-cy, in spite of some of our professional office-scakers who have sought to give the English the prestige of making the best iron, that American is better than the British. On the Reading road, where careful examinations have been recorded, and with a toninge un-surpassed by any railroad on the globe, Zerah Colburn says it is found that American iron wears out but from one-third to one-half as fast as English iron. The average of six fast as English iron. The average of six years' wear of 60 lb. English rail was above

years' wear of 60 10. English rail was above eleven per cent, annually. The average of four years' wear of the "Erie" (English) pattern, was 16 per cent, annually. In Amer-ican rolled and pig from the same general' superiority is observable. The American pig is both, harder and tougher. Some of the leading locomotive builders will use no other than American on account of its superio hardness for cylinders, driving wheels, etc. For car wheels, where the best iron is indis-pensable, American pig is used, we believe, exclusively.

Down on the Governor.

The Lancaster Examiner and Herald, the able Whig o gan of Lancaster county, has for everal weeks contained some strong articles denunciatory of Governor Pollock and his administrati m. In the last number the editor charges His Excellency with willful and deliberate falsehood. Read the following:

The Harrisburg Telegraph inquires wheth-er the name of the editor of this paper "was not presented to the Governor for Secretary of the Commonwealth with his knowledge and consent." Also, "whether he did not so state his position when applied for his influence in behalf of another party."

Two weeks ago we pronunced the assertion that the editor of this paper was an applicant for any office in the gift of Gov. Pollock, a willful and deliberate falsehood. The lie was given plump to the *Telegraph* as the utterer of the falsehood, and the Governor if he was and Loins, for in truth all these are but the con-sequence of diseased action of the liver. As an aperient, they afford prompt and sure relief in Costiveness, Piles, Colic Dysentery, Hamors, Scro authority for it. Both parties were thereby placed at liberty to publish any evidence in the possession of either, going to sustain the the possession of either, going to sustain the allegation either directly or indirectly. This they have not attempted. Honoride men, when they could not sustain a charge of the kind, would have retraced it. But these par-tics have neither the courage to tell a lie bodd-ly nor the magnimity to withdraw a false charge. They report to the meanest and pally nor the magnimity to withdraw a false charge. They resort to the meanest and pal-triest of all ways by which a false impression can be conveyed—by insignation or implica-tion. We pronounce the insignating convey-ed in the questions asked by the *Telegraph* as false and unfounded as the original charge. It may either produce the chidence on which it is based, or rest under the direct charge heretofore made and again repeated, that it is it is based, or rest under the direct charge heretofore made and again repeated, that it is the utterer of a willful and deliberate false-hood. And the Governor, who is a principle in the case and responsible both in law and morals for the acts of his agent, must remain in the same category. For the credit of the old Whig name we are glad the administration lays no claim to

It is wholly in the hands of the know-nothings, and receives the kicks and cuffs of the organs of that party with beand cuils of the organs of that party with be-coming meckness. It may hope to carry fa-vor with the order by inventing and circula-ting falsehoods about the editor of the Ezam-ner, but just so far as such a course will ele-vate it in know-nothing esteem will it lower it in the opinion of honorable men.
