A CLOWN BECOME & MILLIONATHE. -The ups and down of life are considerable, as the clown say. The Philadelphia Argus of Friday last, has the following:

Dan Gardiner a Millionaire .- We stated yesterday, that Mrs. Tyler bad, by the decree of an English court, become possessed of \$580,000. We learn from the best authority, that Dan Gardiner, who traveled last summer as clown for Rivers & Derious' circus, is an heir to the amount of over a million of dollars. He is now a resident and property-holder of this city, and will be hereafter look-ed up to as one of the "upper ten." From the Washington Union. Wicerangua.

For the last five or six years. Nicaraugua and Nicaranguan affairs have been prolific subjects for comment and discussion with diplomatists and journalists on both sides of the Atlantic. The late revolution in that little republic has brought the name of Nicarangua still more conspicuously before newspaper readers, and has excited much diversity of opinions to the relief or the relief of the ion as to the policy, object, and premanency of the new government; and, in connexion with these things, we find publicity given to statements which are calculated to mislead the public It is stated that Nicaraugua contains a white population of only 20,000 persons.
This is an error. A census of the republic was taken in the year 1846, which is the latest source of information on the subject. According to it, the population was then 264, 000 of whom 25,000 were set down as white. 15.000 negroes, 90,000 Indians, and 180,000 of a mixed race, composed of the negro, Indian and Spanish, with the Indian greatly predominating The principal towns were Leon, containing 30,000 inhabitants; Masaya, I5, 000; Managua. 12,000; Chinandega, 11, 000; Brahagua, 12,000; Segevia, 8,000, and favorable. For further particulars inquire of PETER BROWN.

The birthplace of Colonel Walker, the suceessful leader of the late revolution, and who may justly be regarded as the supreme head of the new government, is also incorrectly assigned This now famous personage is a native of Nashville, Tennessee, where he successively went through a course of studies for the practice both of law and medicine, which proved to be the prelude to his introduction to the editorial chair. He was for some time connected with the press of New Orleans, and after his removal to California, several months, we believe, elapsed before he exchanged the pen for the sword. His subsequent earcer's now a part of the history of the

CONSUMPTION Successfully Treated by

INHALATION OF MEDICATED VAPORS! BY JOHNSON STEWART ROSE, M.D. ELLOW of the Royal C liege of Physicians, and for years Senior Physician in the London Royal Infirmary for Diseases of the Lungs. In this age of progress, medical science has contributed her full share to the general welfare, and that which shines resplendent, the brightest jewel in her diadem, is her last and greatest gift,

Medicated Vapor Inhalation, In the treatment of Consumption and kindred affections. The most absurd notions, narrow-minded prejudice contemptible ignorance, and undushing quackery, have long existed in the treatment of Consumption. Men of skill and reputation as physicians have prescribed nauscous compounds to be taken into the stomach, to cure disease of the lungs, while the brazen-faced quack held up his nostrum as the only star of hope for the consumptive—if only enough of it were swal lowed. The stomach, where no disease exists, being the receptacle of all this, is soon rendered unfit to perform its functions, and the health thus materially injured. All must see the absurdity, the positive injury of such a course; the disease i dence to uncles and aunts, apply as well to in the lungs, not in the stomach; then why, in ancestral estates as to those acquired by an the name of common sense, do you not apply medicine directly to the lungs? Various cutting and sawing machines have been invented for making Shingles, but it is a well known fact that Shingles cut or sawed across the grain are quite too flimsy for rooffing purposes. Numerous inventions have recently appeared for riving and shaving, and these have all been condemned as worthless, from their imperfect method of riving, which consists of splitting from the side of the block but one shingle, which almost invariably rons off.
