THE NICARAUQUAN MINISTER. - A Washing ton correspondent of the New York Evening Post says:

"The opposition to Parker H French, as Minister from Walker's republic, will cause some sensation in Washington, and alteration in the message. I observe that Attorney General Cushing has been closeted with the President very early this morning. He is the President's factorum in Central America efficiency and it is believed will advice the affairs, and it is believed, will advise the rejection of Wheeler's treaty with Walker, of which French is said to be the bearer. Still it is possible that his overflowing enmity to British influence, especially in Central America, may induce him to favor Walker's opera-tions. I understand that he avows the opinion that American colonization is the only mode of satisfactorily settling the perplexed questions with reference to that part of the continent."

A FRIGHTFUL MASSACRE BY INDIANS .- A letter from Rio Janeiro, under date of October 18th, says :--

" Of political news there is nothing of special interest from Buenos Ayres ; the Indians continue their predatory incursions in the southern part of the Province with remarkable boldness. A few weeks since, th y encountered a body of Government troops and massacred 126 out of 128. Only one escaped, the following account of matters from the scat and he by feigning death ; the other, badly of war. They number at Lawrence about wounded, was carried off a prisoner. Plunder is the object of these incursions, the Indians finding a quick market in Chilli for all the cattle they take. The Minister of War, who has in charge the protection of the frontiers, came up to the aid of the slaughtered troops, after the savages had finished their murderons work and retired. He finds it much more agreeable to pursue Indians who have got a escaped from his captors. WAR INVENTION .- Some weeks since an American engineer arrived at St. Petersburg with a cannon of his invention, capable, it is Eu peror, and orders have been issued to the oundry at St. Petersburg to prepare every thing for trial. At the same time a model, in wood, was sent to Siataoust in the Ural to have a cast made. It is said that the range of this gun which is oblique, is more than 4000 metres which, if true, would exceed anything hitherto known. A new musket is also spoken of. The founderies at Siataoust women can be found nowhere else than in and Touin are to finish ninety thousand by next May. CONSUMPTION Successfully Treated 1y INHALATION OF MEDICATED VAPORS! BY JOHNSON STEWART ROSE, MD.

MELLOW of the Royal C liege of Physicians, and for years Senior Physician in the London Royal Infirmary for Diseases of the Lungs. In this age of progress, medical science has contributed her full share to the general we fare, and that which shines resplendent, the brightest jewel in her diadem, is her last and greatest gift.

Inclicated Vapor Inhalation.

In the treatment of Consumption and kindred affections. The most absurd notions, narrow-minded prejudice contemptible ignorance, and unblush ng quackery, have long existed in the treatment of Consumption. Men of skill and reputation as physicians have prescribed nauseous com pounds to be taken into the stomach, to cure disase of the lungs, while the brazen-faced quack held up his nostrum as the only star of hope for the consumptive-if only enough of it were swal lowed. The stomach, where no disease exists, being the receptacle of all this, is soon rendered unfit to perform its functions, and the health thus

materially injured. All must see the absurdity, the positive injury of such a course ; the disease is in the lungs, not in the stomach ; then why, in said, of doing tremendous damage. He was the name of common sense, do you not apply idmitted at once to show his invention to the medicine directly to the lungs? The advantage as Initialation in Consumption and Throat Diseaes is, medicines in the rm of Vapor are applied firectly to the lungs where the disease exists; the stomach is thus left free to and in restoring health, by administering to it healthy, life-giving food. There is no case so hopeless that Inhalation will not reach ! The means, too, are brought within the reach of all, the manner or administering the Vapors being so simple, that the invalid is never equired to leave home, where the hand of mendhip and affection tends so much to aid the phy cian's efforts. The Inbaling method is soothing, safe and peedy, and consists in the administration of medcines in such a manner that they are conveyed into the bings in the form of Vapor, and produce their action at the seat of the disease. Its prac-ical success is destined to revolutionize the opinons of the medical world, and establish the entire urability of Consumption. I earnestly appeal to the common sense of all afflicted with lung diseases, to embrace at once the advantages of Inhalation, and no longer ap ply medicine to the unoff-nding stomach. I claim for inhalation a place amongst the priceless gifts that nature and art hath given us, that " our days may be long in the land," and as the only

PUBLIC SALE

Of Valuable Lands in Cambria county, Pa., lately the property of Thomas Vickroy, doo'd. THE undersigned, administrators with the Will ennexed, of Thomas Vickroy, deceased, will expose to public sale on the days hereinafter mon-tioned, upon the premises, the following described tracts of land, viz:

On Tuesday, 18th day of December next, a tract containing 447 acres, and allowance, lying upon the summit of the Allegheny Mountain, in Richland towrship, on the public road from Bed-ford to Johnstown, about fifteen miles from the Bronze Kossuths, Latter place. The soil is good and the timber first rate, including a large body of valuable CHERRY TIMBER. This tract is situated upon the South Together with a Fork of the Conemaugh, and has upon it a most excellent site for a Mill.

On Wednesday, the 19th day of December, A D. 1855, a tract containing 155 acres, and allow-ance, on " Kickey's Ridge," in said Township of Richland, and about ten miles from Johnstown, on the said road leading from Bedford to Johnstown. This tract is well tin.bered.

On Thursday, the 20th day of December, A. D. 1855, a tract known as the "Coleman tract," now in the tenure of Henry Ely, containing 170 acres, and allowance, in Jackson Township, about seven miles north of Johnstown, or the Ebensburg Road. There are about 50 acres cleared, and the soil is good. The remainder of the tract is well timbered, and it contains large veins of STONE COAL. There is a stream of never failing water running through this property, and there are also upon it three or four springs that never fail. The improvements are a Log Dwelling House, Double Log Bara, Tenant House and Apple Orchard. There is also a Sugar Camp upon the premises. On Friday, the 21st day of December, A. D., 1855, the CANNEL COAL TRACT, containing

289 acres, lying on both sides of the Turnpike Road, ten miles north of Johnstown, and seven miles west of Eb nshnrz. The sail is good and can be easily tilled. This tract is richly imbedded with "Cannel Coal."

The aby e lands are all patented, and the tifle is indisputable. The undersigned have correct crifts of the several tracts, which they will have with them on the premises, on the days of sale. these desiring to purchase.

The Terms will be made known on the days of S. L. RUSSELL.

SHINGLE MACHINE.

"ENDALL'S PATENT DOUBLE ACTING RIV. ER AND SHAVER -The attention of Shingle and Lumber dealers, speculators and others, is directed to this invaluable invention, which is now presented to the public as the first and only practical machine extant, for Riving and Shaving Shingles.

Various cutting and sawing machines have been invented for making Shingles, but it is a well known fact that Shingles cut or sawed across the grain are quite too flimsy for rooffing purposes. Numerous inventions have recently appeared for riving and shaving, and these have all been condenined as worthless, from their imperfect method of riving, which consists of splitting from the side of the block but one shing'e, which almost invariably runs off. This difficulty is entirely obvinted by

KENDALL'S MACHINE. Which first splits from the side of the block piece thick enough for two shingles, which is separated in the centre, and by means of elastic guides each part is conducted through a pair of approximating knives, which completes the operation : thus producing two shingles at every rev-

SUPPOSED LOSS OF A SHIP WITH FIVE HUN-DRED PERSONS ON BOARD .- The fate of the ship Guiding Star, which has been missing several months, is now exciting the most pain ful interest, and it is feared that the worst has befallen her and her living freight. Under the command of Capt. M'Cielland, an experienced scaman, she took her departure from Liverpool for Melocurne on the 5th of January last, with upwards of 400 passengers or emigran.s-men, women and children,which, with the crew, officers and scamen, n ake the whole number on board about 500 -all told. Previous to her sailing she underwent a thorough overhaul, under survey, and consumenced the voyage with every prospect of making a quick and successful run. It appears that on the 9th of February she was spoken by the Boston barque, Kate, Captain Hastings, in lat. 166 S., long. 38 48 W., showing that he passage up to that date had been rapid, and that if she had experienced similar favorite weather, she would have made the run to the colony in seventy days or so. Unhappily, since that time nothing has been heard of the ill-fat.d ship, and it is supposed that she must have envountered some terrific weather, and have foundered.

K. N. DEFEATS .- Elections were held in several of the principal cities of Massachusetts on Monday, for municipal officers. It appears from the following returns that the . N's were pretty badly floored.

Boston Dec. 10 .- The elections for Mayor and Alderman took place in this city today, resulting in the election of Mr. Rice, the Citizens' candidate for Mayor, by 1800 finijority over Shurtleff, American. A large mejority of the Aldermen and Councilment are of the same political complexion.

In Lowell, iluntingdon, the Citizens' candidate, was elected Mayor by 800 plurality. In Worehester, and several other places, the Citizens' candidates are also elected.

A DIFFERENCE .- The Speaker of the British House of Commons is an office of considerabld emolument, according to the Washington Globe, in comparison with the office of Speaker of our House of Representatives The salary of the former is £6000 a year, ex-clusive of a furnished residence. At the end his official tabors he is generally rewarded will a pecrage and a pension of £4000 for Council, and entitled to rank after barons. Our Speaker receives nothing but double pay of a member.

treatment of Consumption. One word for myself, in answer to those claim-ing to have introduced the practice, and to the tribe of imitators who, with brazen impudence, claim it as their own. I both wrote in favor of Inhalation and practised it 15 years ago! The apparatus then used, with the medical agents employed, achieved only a partial success: I therefore did not claim for it then those mirrorlous powers which a long practice has since enabled me to give to it. Proof of this may be found in my work published in 1840.
