New York, December 28. The steamship Pacific, from Liverpool arrived at 5 o'clock this evening, with dates to Saturday, the 15th inst.

The news is highly interesting.

The long expected capture of Kars by the Russians has at last taken place. There are no particulars received, except that brought by Gen. Kurety and another officer who escaped from the city, in order to hasten the advance of Omar Pacha to the relief of the city. At that time Gen. Williams was about to send a flag of truce to offer capitulation.

Nothing further is known, but it is believed

that the garrison surrendered, as they were only 5,000, too weak a force to cut their way

through the Russian army.

Omar Pacha was near Kutai, which the
Russians held in force.

The only event of importance that has transpired on the Crimea, is an attack made by the Russians on the extremity of the French lines. The Russians were 3000 strong, and after an hour's fighting withdrew. Both armies were comfortably housed and

provisioned. The firing continues between the North and South sides of Sebastopol.

RUSSIA. Russia has opened a new loan in Berlin, Hamburg and Holland, for fifty millions of rubles, at five per cent. It is quoted at 85.

AUSTRIA. The Austrian army is being reduced to the peace footing.

ITALY. The Government of Naples publishes the convention with the United States, defining the rights of neutrals ENGLAND

The Queen's order in Council, authorizes £475,000 in notes of the Bank of England, beyond the amount specified in the Bank Charter.

THE PROSPECTS OF PEACE. With respect to the prospect of peace, we have a mass of contradictory statements. If negotiations are on foot, they have not progressed a step It is known that differences exist in the British Cabinet. Lords Palmerston and Panmure urge a prosecution of war. The rest of the Cabinet, supported by Napoleon, suggest the importance of embracing the present opportunity to negotiate peace. FROM THE EAST.

MARSEILLES, Dec. 12 .- The steamer Ganges, which sailed from Constantinople on the 3d instant, has arrived here.

The English squadron under Sir Houston Stewart was to leave Constantinople for Smyrna on the 4th inst. It was believed at Constantinople that this squadron would visit Greece and Italy, and would probably enter

The British cavalry, and the cavalry of the Anglo-Turkish Contingent had arrived at Constantinople from Balaklava and Kertch. General Williams and Kerim Pacha, for their services in the defence of Kars, had been nominated mushirs or field-marshals by

the Sultan. Advices from the Crimea of the 30th Nocember state that it was difficult for English Kertch, everything was quiet. The Sea of Azoff was full of ice.

CONSTANTINOPLE, Dec. 5 .- Although the bulk of our army is still in the Crimea, a very considerable depot is forming at Scutari and its vicinity, where, within a few days from this time, at least 12,000 men will be assembled to be quartered there during the winter. The greater part of the cavalry has already arrived, both from Balaklava and from Eupatoria, and the rest is coming down daily.

A letter from Kinburn, in the Presse d'Ocient, dated November 26, mentions the com-mencement of severe cold. There is floating ice upon the sea, and the vessels at anchor off Oczakoff are fringed with icicles. Part of the soldiers are under canvas, but they are well provided with warm clothing. fowl is abundant-duck and very palatable seabirds. The fort has been repaired; the garrison is not stronger than the former Russian one; but it is considered ample to resist any possible attack.
Two nights ago three Sardinian Gendarmes

took a box, containing 30,000f., to their hospital on the Bosphorus. They were in a caique with two rowers. The money and two of the Gendarmes remained at the hospital; the third man returned to the caique with the box. On his way down the Bosphorus the rowers, unaware that the box was empty, tried to throw the Sardinian overboard to get possession of it. He shot one and killed the other with his sword. Unable to manage the boat, he drifted against an Austrian vessel, and was taken on board.

Interesting News from California.

NEW YORK, Dec. 28 .- The U. S. mail steamer George Law arrived this afternoon at 4 o'clock, bringing dates from San Francisco to the 5th inst. She also brings 275 passengers and \$1,400,000 in treasure. The steamer Golden Age, with New York

dates to the 5th ult., arrived at San Francisco on the 29th, and the Cortez with dates to the 9th arrived on the 4th December

9th arrived on the 4th December

The war in the North is progressing with much violence and considerable disaster on sale to be held on the premises.

Sale to be held on the premises. North are arrayed against the whites. A true bill has been found against Cora,

the murderer of Gen. Richardson. The festival at San Francisco in honor of the fall of Sebastopol ended in a row. There

were 10,000 persons present.

Crime is on the increase, and the papers teem with murders.

The steamer Georgina burst her boiler at Peta Same, killing two persons and wounding many. The accident was the result of carelessness on the part of the officers of the boat, and they have been indicted.

On the 30th Nov., the U S. frigate Independence saluted the French flag on the cor-vette Erebus as a reparation for the arrest of

Consul Dilion who then raised his flag. In an engagement at Payaliup river, the John Moore, Indians were defeated with the loss of 30 Helena H. Knowlton, killed. Several engagements have occurred Benjamin Jones, 2 between the volunteers and Indians, in which the latter have been worsted.

The U. S. forces have returned to Dallas to await the orders of Gen. Wool. Gov. Douglas, of Van Couver's Island, has placed arms and ammunition at the dispo-

sal of Gov. Mason, at the mouth of Big riv-

ting every day to be attacked by the opposite party, as about 800 men were encamped about

party, as about 800 men were encamped about a mile from town. Provisions were scarce and high on account of the opposite party stopping the supplies from coming in.

After the breaking up of the Sebastopol procession in San Francisco, a large procession of Americans marched to the Russian Consul's residence. Gen. McDougal was one of the speakers on the occasion.

TURKEY AND THE A LIES .- A letter from Constantinople says that the occupation of Turkey by the Allies, and particularly in the vicinity of the Bosphorus and Dardanelles, is so complete, that the Turks feel very uneasy. They find themselves in a bad predicament. Their would-be friends are worse than enemies. They have become fully aware of their inferiority, but do not at all relish the manner in which they are treated.

Jefferson, Dec. 12, 1855.

CONSUMPTION Successfully Treated by IMEALATION OF MEDICATED VAPORS

BY JOHNSON STEWART ROSE, MD. RELLOW of the Royal College of Physicians, and for years Senior Physician in the Lon-don Royal Infirmary for Diseases of the Lungs. In this age of progress, medical science has contributed her full share to the general welfare, and that which shines resplendent, the brightest jewel in her diadem, is her last and greatest gift,

Inedicated Vapor Inhalation, In the treatment of Consumption and kindred af-fections. The most absurd notions, narrow-minded prejudice contemptible ignorance, and un-blushing quackery, have long existed in the treat-ment of Consumption. Men of skill and reputa-tion as physicians have prescribed nauseous com-pounds to be taken into the stomach, to cure disease of the lungs, while the brazen-faced quack held up his nostrum as the only star of hope for the consumptive—if only enough of it were swal-lowed. The stomach, where no disease exists, being the receptacle of ail this, is soon rendered unfit to perform its functions, and the health thus materially injured. All must see the absurdity, the positive injury of such a course; the disease is in the lungs, not in the stomach; then why, in the name of common sense, do you not apply medicine directly to the lungs? The advantage as Inhalation in Consumption and Throat Disea-ses is, medicines in the form of Vapor are applied directly to the lungs where the disease exists; the stomach is thus left free to and in restoring health, by administering to it healthy, life-giving food.

There is no case so hopeless that Inhalation will not reach! The means, too, are brought within the reach of all, the manner of administering the Vapors being so simple, that the invalid is never required to leave home, where the hand of friend-ship and affection tends so much to aid the phy sician's efforts.

The Inhaling method is soothing, safe and speedy, and consists in the administration of medicines in such a manner that they are conveyed into the lungs in the form of Vapor, and produce their action at the seat of the disease. Its practical success is destined to revolutionize the opin-

curability of Consumption.

I carnestly appeal to the common sense of all afflicted with lung diseases, to embrace at once the advantages of Inhalation, and no longer ap ply medicine to the unoffending stomach. I claim for inhalation a place amongst the priceless gifts that nature and art hath given us, that "our days may be long in the land," and as the only

Ark of Refuge for the Consumptive.

To many of my professional brethern through-out the Union I teuder my acknowledgements for their frank and manly course in testifying to the merits of Inhalation. I shall be pleased to cooperate with them in offering to the afflicted the blessings of Medicated Vapor Inhalation in the treatment of Consumption.

One word for myself, in answer to those claiming to have introduced the practice, and to the tribe of imitators who, with brazen impudence, dain it as their own. I both wrote in favor of Inhalation and practised it 15 years ago! The apparatus then used, with the medical agents employed, achieved only a partial success: I therefore did not claim for it then those miraculovs powers which a long practice has since ena-bled me to give to it. Proof of this may be found in my work published in 1840.

of fee payable when patients report themselves

Recommendations by Physicians.
We, the undersigned practitioners in medicine, cherfully and heartily recommend Dr. Rose's method of treating diseases of the Lungs and Threat, as the best and most effectual ever introdued into medical practice. Our convictions are basel upon having several of our own patients. confrmed consumptives, restored to vigorous health, after a few months treatment by Dr. Rose. In the above named diseases the application of Medicated Vapors, inhaled directly into the lungs, may be justly considered a great boon to suffering umanity, rendering Con umption a perfectly curable disease!

Dr. Rose deserves well of the profession for his unwearied labors in bringing the Inhaling method to such a degree of perfection.

SHINGLE MACHINE.

K ENDALL'S PATENT DOUBLE ACTING RIV-ER AND SHAVER.—The attention of Shingle and Lumber dealers, speculators and others, is directed to this invaluable invention, which is now presented to the public as the first and only practical machine extant, for Riving and Sha-

Various cutting and sawing machines have been invented for making Shingles, but it is a well known fact that Shingles cut or sawed across the grain are quite too flimsy for rooffing purposes. Numerous inventions have recently appeared for riving and shaving, and these have all been condemned as worthless, from their imperfect method of riving, which consists of splitting from the side of the block but one shingle, which almost invariably runs off. This difficulty is entirely obviated by

KENDALL'S MACHINE. Which first splits from the side of the block a piece thick enough for two shingles, which is sep arated in the centre, and by means of elastic guides each part is conducted through a pair of approximating knives, which completes the operation; thus producing two shingles at every rev-

This machine will rive and shave from the block three thousand shingles per hour, of uniform thickness and taper, superior in solidity and durability to those made by hand or any other pro-

Its operations are by no means confined to pine and other soft wood, but works to equal advan-tage, oak, walnut, and every other description of timber that can be split. The workings of the machine can be examined

at H. H. Ryan's Furniture Buildings, Fifth street, To timber owners, shingle dealers, and men of enterprise, this opens a new field for speculation, as there is no similar invention extant.

The machine occupies but a small space, is of durable construction, and costs but about two hundred dollars, and a man and two boys can make from 25,000 to 30,000 shingles per day. For right of territory, or machines, inquire at No. 31 Fifth street, or at the St. Clair Hotel.

by letter, when desired. O. K. CHAMBERLIN, Agent, Pittsburgh. December 12, 1855.
