

Arrival of the Hammonia.

New York, July 30.—The steamship Hammonia arrived this evening. She left Southampton on Sunday, the 18th inst., and brings the London papers of Saturday evening.

The Turkish government, besides punishing the authors of the massacre at Jeddah, offers to bestow 150,000 francs upon the families of the British and French Consuls.

From Washington.

Official despatch from China.—The New Orleans wire service—Naeel intelligence.

WASHINGTON, July 30.—Official advices confirm the previously received information that the Emperor of China has appointed an official of satisfactory rank to confer with the Peace Commissioners of the United States, and European Powers.

The Railroad Companies with whom the contract was made to carry the mails between Washington and New Orleans in four days, commencing with the present month, have not yet performed the service within that time.

The sloop-of-war Dale was at Santa Cruz, Tenerife Island, on the 9th of June. Commander Blair reports to the Navy Department that the officers and crew were in good health.

Mr. Nugent, the Special Agent to New Caledonia, will leave New York on the California steamer to sail on the 5th of August.

According to a telegraph dispatch, Secretary Floyd will inspect the Government works at Harper's Ferry to-morrow, and resume the business of the War Department on Monday.

The Secretary of the Interior is expected to return from Mississippi to-morrow.

A Murderer Hanged but not Killed. The Post Mortem Examination—Heart still beating—Subsequent dissection—Who killed him?

One or two New England papers are arguing the question, Who killed Magee?—a murderer who was hanged in Boston a few weeks ago, but whose body exhibited evidence of life and vitality at the subsequent dissection.

The body was lowered at 25 minutes past 10, at which time a careful examination of the chest revealed no perceptible sound or impulse of the heart.

At 11.30 a slight but regular pulsatory movement was observed in the right subclavian vein. Upon applying the ear to the chest, this was ascertained to proceed from the heart itself, which gave a distinct and regular single beat, with a slight impulse, 80 times a minute.

The chest was then opened, and the heart exposed, without in any way arresting the pulsatory movements. The right auricle was in full and regular motion, contracting and dilating with beautiful distinctness and energy.

At 1.45 the movements still continued without stimulus. Five were noticed in a minute, with corresponding intervals. At 2.45 all automatic movements ceased, but the part still responded to the stimulus of the knife.

Shocking Fatality.

Three Paupers Poisoned. A dreadful case of accidental poisoning, resulting in the death of three paupers, inmates of the City Poor House, (Pittsburg,) occurred on Monday forenoon.

About four years ago, Dr. Williams, then employed in the institution, mixed up a poison for the destruction of vermin upon the persons of paupers previous to admitting them to the room. The poison consisted of Cocculus Indicus, added to ten gallons of alcohol, which was placed in a keg, and always kept locked up in the store room.

A ladle was then procured, and two old men, named Robert Cuthbert and Owen O'Brien, aged respectively, between sixty and seventy years, both took what might be called "pretty stiff horns."

Dr. Smyser, who resides upon the adjoining farm, was immediately summoned, but his services were of no avail—the whole three died in convulsions in less than an hour.

From the Cincinnati Price Current of Wednesday last.

The Crops.

In any year, the subject of the growing crops, during the summer months, is, to a greater or less extent, an absorbing one, because of its general importance upon the general interests of the whole country.

The season has now reached that point when a pretty correct estimate may be formed of the present and prospective fate of the crops of 1858.

Wheat is generally harvested; in this State, Kentucky and Indiana, the result is a fair average, in some localities it has been injured by rust and generally the growth has been too rapid, producing a great abundance of straw, and consequently a shorter head than usual.

In Northern Illinois, and all Iowa, where spring wheat is generally sown, and which matures later than that sown in the fall, the injury from rust has been general and serious, so much so that the yield will not be over half what it was last year, and the quality far inferior.

The Oat crop is a bad failure throughout the entire West, with but little exception. It looked well until it was headed out, and then was struck with rust, and soon withered down the stem, breaking about the centre, the heads dropped over upon each other, giving the oat fields a peculiar appearance.

Barley is a good crop, and secured in excellent order. Corn; the great staple crop of the Western country, in all lands where it was planted before the middle of June and which has been properly attended, is growing with a rapidity bordering on the miraculous; the color is a deep green, and the promise good, but owing to the late wet spring and overflow of bottom lands, a large quantity of land intended for this crop is now lying idle, and in many places where it had been planted, the soil being too wet to be ploughed, subsequently, it has been abandoned, and will not come to maturity, consequently.

A MEDICAL MURDER.—A physician in Boston, gave a prescription for an apothecary to prepare for a sick child. That the apothecary had to guess at the words, and to put up a dose that killed the child. It is bad enough to steal people's time by compelling them to read illegible manuscript upon an ordinary business, but when life hangs upon a correct interpretation of the writing, a physician who writes illegibly is morally guilty of a murder, when accident results from his carelessness.

THE TELEGRAPH VESSELS.—We learn from private letters written by individuals on board the Telegraph fleet, that the strain upon both the Niagara and the Agamemnon was so great, that it is doubtful whether they will ever again be put in good condition.

EMIGRANTS FOR FRAZER RIVER.—A company of about twenty-five persons will leave Milwaukee this week for Frazer River, via St. Paul. A company is about to leave Port Huron, R. I., and in New York city, at a meeting of Germans on Wednesday night, fifty signed a pledge to go.

AN EXCITING SCENE.—At Grand Rapids Michigan, on yesterday week, a well caved in and covered with curling and gravel two men, named Bush and Richmond, thirty feet from the surface. They were thus kept down thirty hours, and yet were got out safely, after a hard day and night's work.

ADMINISTRATOR'S NOTICE.—Letters of Administration having been granted to the undersigned, by the Register of Cambria county, on the estate of John Myers, late of Munster town, Cambria county, dec'd.

OFFICE OF EXHIBITION AND SALE 405 Broadway, New York; 18 Sumner street, Boston; and 730 Chestnut, Philadelphia.

A BEAUTIFUL HEAD RICH GLOSSY HAIR, COMPLETELY PRESERVED To the Greatest Age.

And who that is gray would not have it restored to former color, or bald, but would have the growth restored, or troubled with dandruff and itching but would have it removed, or troubled with scrofula, scald head, or other eruptions, but would be cured, or with sick head-ache, (neuralgia) but would be cured.

Phor. O. J. Wood—Dear Sir: I have heard much said of the wonderful effects of your Hair Restorative, but having been so often cheated by quackery and quack nostrums, hair dyes, I was disposed to place your Restorative in the same category with the thousand and one loudly trumpeted quack remedies, until I met you in Lawrence county some months since, when you gave me such assurance as induced the trial of your Restorative in my family—first by my good wife, whose hair had become very thin and entirely white, and before exhausting one of your large bottles, her hair was restored nearly to its original beautiful brown color, and had thickened and become beautiful and glossy upon, and entirely over the head; she continues to use it, not simply because of its beautifying effects upon the hair, but because of its healthful influence upon the head and mind.

Again, very respectfully and truly yours, SOLOMON MANN.

Friend Wood: It was a long time after I saw you at Blissfield before I got the bottle of Restorative for which you gave me an order upon your agent in Detroit, and when I got it we concluded to try it on Mrs. Mann's hair, as the surest test of its power. It has done all that you assured me it would do; and others of my family and friends, having witnessed its effects, are now using and recommending its use to others as entitled to the highest consideration you claim for it.

Again, very respectfully and truly yours, SOLOMON MANN.

LIVER INVIGORATOR!! PREPARED BY DR. SANFORD. IS A GREAT Scientific Medical Discovery, and is daily working cures almost to great to believe. It cures as if by magic, even the first dose giving benefit, and seldom more than one bottle is required to cure any kind of Liver Complaint, from the worst Jaundice or Dyspepsia to a common headache, all of which are the result of a diseased Liver.

The Liver is one of the principal regulators of the human body, and when it performs its functions well, the powers of the system are fully developed. The stomach is almost entirely dependent upon the healthy action of the Liver for the proper performance of its functions. When the stomach is at fault, the bowels are at fault, and the whole system suffers in consequence.

One dose taken after meals is sufficient to relieve the stomach and rising and soaring. Only one dose taken before retiring prevents nightmar.

Only one dose taken at night loosens the bowels gently, and each meal will cure Dyspepsia.

Only one dose taken before retiring prevents nightmar.

Only one dose taken before retiring prevents nightmar.

Only one dose taken before retiring prevents nightmar.

Only one dose taken before retiring prevents nightmar.

Only one dose taken before retiring prevents nightmar.
