Ebensburg, Nov. 10 1858.

Scrofula, or King's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, dis-ordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from screfulous complaints, but they have far less power to with-stand the attacks of other diseases; consoquently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking in-fection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, St. ANTHONY'S FIRE, Rose, or Enystrelas, Pimples, Pustules, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DIS-EASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIA-TED OR INPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIO are so composed that disease within the range of their action can rarely withstand or evade them Their penetrating properties search, and cleanse, and invigorate every portion of the human organ-ism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so

simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: Coststeness, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Fiatulency, Loss of Appe-tite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction

Ayer's Cherry Pectoral,

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons pub-licly known, who have been restored from alarming and even desperate diseases of the lungs by its other medicine of its kind is too apparent to escape observation, and where its virtues are known, th public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and pro-duced cures too numerous and too remarkable to

If neither wins bleman of the Montgomery family, who, in at first meeting, the sport is continued at the consequence of an abcess, had a fistulous second; and it may happen that half a dozen opening into the chest, through which the parties meet at the same time, all anxious to heart could be seen and handled. The great | win of their philopena partners, so that the physiologist was astonished to find it insensi- scene often becomes ludicrously amusing. le. "I then brought him," he says "to the traordinary a thing, and that he might perceive, as I did, that, auless when we toucaed the outer skin, or when he saw our fingers in the cavity, this young nobleman knew not that we touched his heart." Yet it is to the heart that we refer our joys, our sorrows and our affectious; we speak of a good-hearted and a bad-hearted, a true-hearted and a heartless man. Shielded from physical violence by an out-work of bones, it is not invested with sensations which could have contributed nothing to its preservation; but while it can be grasped with the fingers, and give no intimation of the fact to its possessor, it responds to the varied questions of the mind, and by the general consent of mankind, is sympathies, batreds and loves. Persons have frequently dropped down dead from the vehemence with which it contracts or expands upon the sudden announcement of good or bad news-its muscular walls being strained too far in the upward or downward direction to enable them to return-and one of the purposes which this property of the heart is probably designed to subserve, is to put a check upon the passions through the alarming physical sensation they excite.

The brain, again, is enclosed in a bony case. All our bodily sensations are dependconnection with the brain. The nervous except ou solid foundations chord, which, in familiar language, is called communication is kept up in the major part of reverence for truth and duty. them, and when a section of what may be dered part can no longer send their accus- tions. it is itself insensible to the wounds which are and parents, that will make his task easy. insensible," says Sir Charles Bell, "as the ers' Association, organize one as soon as posleather of our shoe, and a piece may be cut sible. less we are prepared to pay the penalty. other way;"

PHILOPENA.-We believe this pleasant amusement for boys and girls, and sometimes those of more mature age, originated in Germany, where it was called viel liebchen, which

the windpipe, without falling into it. A little which we have given a Latin termination, moveable lid, the epiglottis, which is lifted pena, because it infers a penalty or forfeiture up when we breathe, is pressed down upon exacted or won by the tact or management the chink of the sir-passage by the weight of of the winning party. With us the thing is managed, however, excessively clumsy, and swallowing it. Neither solids nor liquids. in without skill. A person in company chances short, can pass, without shutting down the to find a double-meated almond, and hands trap-door as they resceed. But this is only the half ment to another, and says, or rather a part of the same and. The slit at the top | should say : "Will you eat a philopena with in quality and low prices by any establishment of the windpipe, spice never closes entirely in the State. Terms Cash or Country Produce. when we bread to lead weed with an acute and refuse or may accept one of the nuts, when we breath the stage of with an acute sansibility to the stightest particles of matter. The least thing touching the margin of the aperture causes its sides to come firmly together, and the intruding body is stopped at the inlet. It is stopped, but unless removed, must drop at the next inspiration into the lungs what it shall be. Generally, among children, To effect its expulsion, the sensibility of the some tride, or, among young folks, some litrim at the top of the windpipe actually puts the present, suitable to the condition of the into vehement action a whole class of muscles placed lower than the bottom, and which compressing the chest, over which they are distributed, driving out the air with a force that sweeps the conduction of the parties. Thus, a young lady who wins a philopena of a gentleman, may immediately add, "I wear No 6½ kids" If the parties meet in the street, the lady may say, "O, that sweeps the conduction of the parties. Thus, a young lady who wins a philopena of a gentleman, may immediately add, "I wear No 6½ kids" If the parties meet in the street, the lady may say, "O, that sweeps the conduction of the parties. Thus, a young lady who wins a philopena of a gentleman, may immediately add, "I wear No 6½ kids" If the parties meet in the street, the lady may say, "O, that sweeps the conduction of the parties. Thus, a young lady who wins a philopena of a gentleman, may immediately add, "I wear No 6½ kids" If the parties meet in the street, the lady may say, "O, they will be present, suitable to the condition of the parties. Thus, a young lady who wins a philopena of a gentleman, may immediately add, "I wear No 6½ kids" If the parties with a force that sweeps the condition of the parties. of nature for our relief, when anything article, but exercise his judgment as to what chances to have evaded the protecting epi- would be acceptable. Generally, in our haste glottis. Yet this property, to which we are to win a philopena. we forget propriety, and constantly owing our lives, is confined to a become rude in this land of thrift and hurry single spot in the throat. It does not (as Sir Charles Bell affirms) belong to the wind-pipe, but is limited to the orifice, where alone some of the most useful faculties of the mind. it is needed. Admirable, too, it is to observe When a couple meet the next time after eat-that, while thus sensitive to the most insigniing a philopena together, no advantage is ficant atom, it bears, without resentment, the taken of the other until one of them pronounatmospheric currents which are constantly ces the word "Philopens." This is the passing to and fro over its irritable lips. "It warning that the sport is to begin, Let us rejects," says Paley, "the touch of a crumb suppose that a gentleman calls upon a lady; of bread, or a drop of water, with a spasm she invites him to walk in, but at the same that convulses the whole frame; and yet, left time speaks the talismanic word. If he ac-to itself and its proper office, the intromission cepts the offer to walk in, he is lost, unless of air alone, rething can be so quiet. It does she removes the ban by telling him to go immediately to the cashier, who examined it how that he has a trachea. This capacity he must resolutely keep it on; or if at a table are sent a clerk out with it to see an expert he must resolutely keep it on; or if at a table she should hand him any article which he accepts; she wins the forfeit. At the same time, he is watching to catch her off her guard—for the acceptance of any offer from the other ends the game. Both are constant-these almost promises in this, as well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body, that well as in so to other parts of the body in the must resolutely keep it on; or if at a table sure, sent a clerk out with it to see an expert and obtain his opinion. Meanwhile, the ladical distribution is opinion. Meanwhile, and opi we owe our safety and our comfort—our safety to the insensibility, and our comfort to their reposition.

Another of the examples adduced by Bell, here it is." If she is caught off her guard

How preferable is this German play to our king, that he might behold and touch so ex- | own! And as the sport derived from philopena is very innocent and pretty, we commend it to the young folks of America,

> HINTS TO NEW TEACHERS,-The Michigan Journal of Instruction contains some important Hints to New Teachers-some that will prove of service to those just entering on the duties of their responsible profession :-

1. Meet your school at the outset with a quiet and natural demeanor. Affect neither steroness nor affability. Feel and say in a of the Ironton Furnace has visited the place few simple words, that you hope to do them good, and will try to do the best you can for been upon the ground and stood upon these

2. If whispering or disorder occurs, pause at once, and do not proceed till order is repronounced the seat of our pleasures, griefs, stored. The mere pause is generally suffi-

3. Remember that good discipline is the principal thing; without this there can be no successful teaching.

4. Govern yourself. Do not fret or fly into passions; never stamp or scold; do not threaten or talk too much. Let a kindly interest in your pupils temper all your actions. 5. Have the school-room kept tidy and comfortable; wash off scribblings and ink spots, and hang up charts and maps, to give the room an attractive appearance.

6 Let the lessons be short, but thoroughent upon the nerves, but even the nerves do ly mastered. Go over the same ground again not give rise to feeling unless they are in in review. No lofty superstructure can rise

7. Foster in your pupils a spirit of justice the spinal marrow, is the channel by which a and generosity, kindness and forbearance,

8. Make daily preparation for your work; called the great trunk for the conveyance of the oldest and ablest teachers do this. You our sensations is deceased, and by the breach will thus be able to give clear explanations. Charles was of course, elaborately gotten-up in its continuity the perves below the diser- and to infuse life and spirit into your instruc-

tomed intelligence to the brain, the portion of | 9. Remember that your every act is closethe body which thus becomes isolated may be | ly watched, and that example teaches more burned or backed, and no more pain will result powerfully than precept. That teacher who than if it belonged to a dead carcass instead is a gentleman in dress and demeanor, whose of a living man. The brain, therefore, in language is simple and pure and truthful, subordination to the mind, is the physical whose deportment is gentle, graceful and centre of all sensation. Yet, strange to say, kind, will awaken a respect in both pupils torture to the skin, and which wounds the 10. Put yourself into communication with hero of the evening. brain alone enables us to feel. The Old Arm Chair.

I love it, I love it, and who shall dare To chide me for loving that old arm chair I've treasured it long as a sainted price, I've bedewed it with tears. I've embalmed it with

Tis bound with a thousand bonds to my boars. Not a tie will break, or link will start, When you know the spell-a Mother sat there! And a sacred thing is that old arm chair.

In childhood's hours, I've lingered near, The hallowed seat with list'ning ear; And gentle words that mother would give, To fit me to die, and teach me to live: She told me that share would never betide, With truth for my creed, and God for my guide, She taught me to lisp my earliest prayer, As I knelt beside that old arm shair.

I sat and watched her many a day. When her eyes grew dim, and her locks were grey. And I almost worshipped her when she smiled And turned from her Bible to bless her child. My idol was shattered, my earth star fled!

'Tis past! 'tis past! and I gaze on it now, With quivering breath, and with quivering brows 'Twas there she mus'd, 'twas there she died, And memory flows with lava tide. Say it is folly, and deem me weak. Whilst scalding drops start down my cheek. But I love it, I love it, and cannot tear, My heart away from that old arm chair.

"A SMART WOMAN. - On Friday evening. says the New York Post, an elegant dream woman, entered Stewart's store and asked to see some shawls. After assorting and comparing, she at length made a selection, the price being \$500. Gracefully producing ber portmonaie, she tendered the clerk a two the messenger returned with the intelligence that the bill was good. She caught it from him, declaring that she would not take the shawl. After a little while, however, she seemed to relent, and saying that she had been to a large number of establishments, and that the shawl was the only one that suited her, she remarked that she would take it. adding her determination not to expose herself again to a similar affront. The clerk was profuse in apologies as he did up the article, and the two thousand dollar bill was taken by the cashier, and fifteen hundred dollars promptly paid back to her, when, without bidding good night, she took her leave. The bill this time proved to be a counterfeit. She had paid the elerk a different one from the one first exhibited."

- A discovery of immense bodies of Iron ore has lately been made in this State, not far from the neighborhood of those rich deposits already so widely known in the country as the Iron Mountain and Pilet Knob. The editor of discovery, and save: "We have actually hills or mountains of ore, which in our judge ment, is as rich in quality, as the celebrated Iron Mountain It is about thirty miles rom Ironton, and its main body seems to be in three different localities, about one or two imiles apart, and is said to be a pure quality of hematite. The ground upon which it is located embraces a tract of between cleven and twelve thousand acres, owned by one gentleman, Napoleon Aubuchen, Esq., and has been entered at the government price within the last three years. It is a sparsely inhabited neighborhood, and until within the last few years, was never explored, except by hunters, who were ignorant of the use or value of the "black rock." It lies upon a range of hills, dividing the waters of Castor and Big St. Francois -St Louis Democrat.
