

JOYFUL NEWS

COTSWOLD SHEEP.

Col. J. W. Ware, of Virginia, writing on the question, "are sheep or hogs the most profitable animals to fatten?" to the Genesee Farmer says:—

"Of all sheep, I prefer the Cotswold, from experience. They mature early, are large, hardy, and take on fat easy. During the Summer and Fall they are one year old (not fed on grain,) no mutton can be more delicately flavored, juicy and tender. Over two years old, many muttons are better, as they then fall too heavily for the appetite; but the butcher will then give almost any price for them; and what prudent man wants to keep mutton to four year old, when he can sell them at one year old at much better prices than any other sheep at four? I have rarely, if ever, sold my muttons of this breed the fall after one year old under \$10 each, and have sold older ones much higher; and never sold them at the same age under \$8 each, without having fed grain at all; and the fleece amply pays the keep. Can any breed hogs show such (clear) profit and in so short a time? and they have no wool to pay the cost of keep."

KEEPING POTATOES.

The Country Gentleman says: A cool cellar, which never freezes is the best and most convenient place for keeping potatoes. They may be placed in large boxes or bins, raised from the ground. If rotting is feared, the bottom of the box should be made of slats, to admit of ventilation—otherwise this will not be necessary. They should be covered from the light for which purpose chaff is a good substance. If buried in pits, the subsoil should of course have perfect drainage. We prefer heaps above ground, containing 50 to 100 bushels, to be covered with a foot of packed straw, and three or four inches of earth on the straw. This has been found much better than straw and more earth. There should be ventilating holes at the top, loosely stopped with straw. The decayed potatoes often found at the top of the heaps, result from the want of ventilation. The advantage of keeping in good cellars, over this mode of preserving in heaps, is the saving of labor."

To keep (Irish) Potatoes from sprouting—To keep potatoes intended for the use of the table for spring until new potatoes grow, take ailing water, pour it into a tub, turn in as many potatoes as the water will cover, pour off the water, handle the potatoes carefully, laying up in a dry place on boards only one layer deep, and see if you do not have good potatoes the year round, without strings and water ends caused by growing. The neighbor I got my information from says he has never failed, or had any trouble from rotting or sprouting. Try a few.—Correspondence of Prairie Farmer.

To Cure Lice on Cattle.—Mr. Roo has great faith in the efficacy of a peck of onions for ridding cows or oxen of lice. He claims to have found them an infallible remedy in his practice. They also give tone to the stomach, and are especially valuable in hot weather, when working cattle will lie in the shade at noon and refuse to eat. Mr. Roo uses the "scallions," or small unsaleable onions, and those which become soft and sprouted towards spring. He gives a feed of a half peck once a day—at noon, and says that two feeds are sufficient to extricate any number of vermin.

Effectual Remedy for Poisoned Sheep.—Open the sheep's mouth, and with a sharp pointed knife, bleed the sheep in the third or fourth bar or ridge from the entrance of the mouth, and the work is done, and a cure effected without pining away or loss of flesh, as in most other remedies. I have applied the above remedy to several sheep that were flat on their sides, and appeared lifeless, and have not lost one sheep.—Cor. N. E. Farmer.

Bones and Wheat.—According to Sir Robert Kane, the distinguished chemist, one pound of bones contains the phosphoric acid of 28 pounds of wheat. A crop of wheat of 40 bushels per acre, and 60 pounds per bushel, weighs 2400 pounds, and thus requires about 86 pounds of bones to supply it with that essential material. The usual supply of bone dust (3 to 4 cwt. per acre) supplies each of the crops for four years with a sufficiency of phosphoric acid, which is given out as the bones decompose.

To Clear Coffee without Eggs.—For one gallon of coffee take a spoonful of flour and one-fourth as much of salt. Mix with the ground coffee in cold water; then put to boil. This is a good substitute for eggs, as it clears the coffee equally as eggs do.

Rice Butter Cakes.—Take half a pint of rice; boil in the usual manner. Take three eggs; beat the whites and yolks separately.—Stir the rice in a quart of sweet milk; add the yolks and a little soda; stir in enough flour to make a good batter; and lastly stir in the whites, lightly. Bake, and serve up with butter.

Cure for Corns.—If "a poor cripple" will take a lemon, cut a piece of it off, then nick it so as to let in the toe wit the corn, the pulp next the corn, tie this on at night so that it cannot move, he will find the next morning that, with a blunt knife, the corn will come away to a great extent. Two or three applications of this will make "a poor cripple" happy for life; and we shall be glad to hear the result.

A limited number of responsible agents are wanted to solicit orders by sample, to whom a salary of \$50 per month and expenses will be paid. For conditions and full particulars address, with stamp for return postage, J. W. HARRIS & CO. No. 15 Shoe & Leather Exchange, Boston, Mass. Nov. 9, 1859.—50-8w.

Above we present you with a likeness of DR. MORSE, the inventor of MORSE'S INDIAN ROOT PILLS. This philanthropist has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and the life of the body will be forever lost. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs of Nature's Garden, for recovery of the victims of diseased man. One of the roots from which these Pills are made is a Sudorific, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and unclogs the passage to the lungs, and restores the health and recovery of diseased man. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out honorably by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, as they find way to every part, and completely root out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die is because they do not take a medicine which will pass to the afflicted parts, and which will open the natural passage for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Dr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for the great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate ease and strength, and take away all sickness, pain and anguish, but they cleanse and purify the blood, and the source of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and purify, that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and happy life will be bright and brighten your days.
