AGRICULTURAL.

Thoughts for the Thoughtful.

PROM VARIOUS SOURCES.

Most of the diseases of sheep are the consequence of debility.

Lambs should be seperated from old sheep. Old and feeble sheep, separated from the rug

SHEEP, as well as other animals, should have access to fresh water, when fed on dry food, in winter.

FARMERS who find it necessary to reduce their flocks, should be very particular in selecting those that they keep, and let none but the poorest go from their farms.

Surer in winter should have fresh air, shelter from cold winds, a little exercise, occasional change of quarters, dry, clean lodging, and nutritious food A close, damp, low yard is their abomination.

A cross between the South-Down and the Merino makes a very useful and profitable sheep. The wool will sell for nearly as much as the Merino, and the lambs will bring more for the butcher.

SHEEP, are perhaps the most profitable stock on suitable land, and with good management; but on unsuitable soil and ill management, they are the least desirable of farm stock. "What the man is worth the land is May 14, 1856. 29-tf. worth." What the shepard is worth the sheep are worth.

ALL animals should, if possible, be housed or provided with shelter. Cattle require much less food when stabled, than when allowed to run at large, as they waste little or none, and comfort is essential to their thrift. More manure is also secured, an object of great consequence to every farmer that under stands his true interests. Sheep, if housed, must not be erowded into close stables or houses, as diseases is apt to be the result; and all animals require to have their stables well ventilated, to prevent the effects of bad air. Horses are better fed from mangers than racks and sheep should never have their food so that they draw it from above, as the grass seeds and chaff fall upon and fill their wool, injuring it materially

Ir must never be forgotten by the farmer that there are works of charity and kindness, that more frequently press their claims upon him during the winter, than at any other time. While his happy family is clustered around the cheerful hearth; while his table is loaded with the bounties which a kind Providence, personal industry, and a fruitful soil have given him; while his wood-house is filled, his granaries overflowing, and every reasonable want sapplied; he must not forget there are other less favored individuals or families around; children destitute of fire and wood; widows and orphans distressed and des titute, all requiring care, and not to be forsaken while the frosts of winter are upon the earth. For the poor there must be employment; for the destitute there must be a supply; and the honest and industrious, or the unfortunate poor, have claims on the more fortunate, that may not be disregarded. Well directed charity is one of the few acts of life in which both the giver and the receiver are blessed; let no one then forget the poor.

Eveny drop of milk should be drained from the udder at each milking, for two reasons, that the last pint taken from the cow will make more butter than the first quart, and that the cows will afterwards fail to give just as mad milk as is left in the udder.

Horses, should always have plenty of litter in their stables; it answers a double purpose; first, by absorbing and retaing the salts of the urine that fall upon it in a considerable degree, and thus rendering the manure more valuable, and secondly, by preventing in part that liability to swell, to which the feet and legs of a horse are subjected when standing on a hard plank floor.

NEGLIGENCE, and inattention is as inexensable in the winter as in the summer; and fre quently is productive of worse effects. How often do we see farmers suffer such losses in their flocks and herds from sheer inattention or idleness in the winter, that a year of hard labor and privation will hardly place them in their first position. If cattle and horses were looked to as they should be, or if sheep and swine were not left to get their living by book or crook, we should not see so man; walking skeletons barnessed or yoked to the plow in the spring, or so many carcases around the fields and roads inviting the crows to their feast. The prudent, careful farmer will consider the winter as the trying time for his avert its rigor, and prevent its consequences as far 2s possible.

Land and labor are the principal sources of public and private wealth. The more fertility we can impart to the one, and the more intelligence we can infuse into the other, the greater will be the returns they make, and the greater our means of happiness; for it is wealth, rightly employed, that enables us to multiply not only our own, but the comforts happiness of those around us. Yet it is not a few rich men, or very wise men, be the aggregate of wealth and talent ever so great that give prosperity and greatness to a State. It is the general diffusion, among a whole peo ple, among the rank and file of society, of property and knowledge and the industry, that renders a State truly respectable and

OUIS LUCKHARDT, WATCH MAKER AND DEALER IN CLOCKS, WATCHES

AND JEWELRY. THE undersigned respectfull begs leave to inform the cit
sens of Johnstown and vicinity

FIRE! FIRE!! FIRE!!!

THE UNDERSIGNED WOULD CALL THE A attenution of the public to one of the greatest improvements ever made in COOKING STOVES, the burning of the GAS AND SMOKE, by which means, is saved Fifty per cent of feel. GEORGE HUNTLEY. Ebesuburg Aug. 17, 1859.-tf.

ABRAHAM KOPELIN.

Attorney at Law---Johnstown OFFICE on Clinton Street, a few doors north of the corner of Main and Clinton. April 23, 1853.

C. D. MURRAY. Attorney at Law, Ebensburg, Pa. OFFICE OPPOSITE CRAWFORD'S HOTEL. fmar17,1858 this affee.

Above we present you with a likeness of DR MORSE-the inventor of MORSE'S INDIAN BOOT PILLS. This philanthropist has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America-has spent three years among the Indians of our Western country-it was in this way that the Indian Root Pills were first discovered, Dr. Morse was the first man to establish the fact that all diseases arise from IM-PURITY OF THE BLOOD-mat our strength. health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become cheked and cease to act, and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's roots which grow around the mountainous cliffs it. Nature's Garden, for the health and recovery diseased man. One of the roots from which these Pills are made is a Sudorific, which opens CASH the peres of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty in throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out bountifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach. but become united with the blad, for they find way to every part, and completely fout out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfeetly healthy; consequently all sickness and remain when the body becomes so pure and ghenies.

The reason whypeople are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passage for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery. until life is taken from the body by disease. Dr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been | Hunting Silver Cylinders, hitherto sold in numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects Not only do they give immediate case and strength, and take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood .-Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and will again return, and the flush of youth and beauty will again return, and the prospect of a long and happy life will cherish and brighten your days.
