White Beans .- We desire to see the cultivation of the bean greatly extended in this country. Like clover, peas, and root crops, its growth and consumption on the farm will greatly enrich the land. At present it may pay better to sell the beans than to feed them to the sheep; but if the market price should be reduced by their extended cultivation, they would still be a profitable erep for the fauner to raise for feeding. They draw lightly on the soil, and being planted in rows admit the use of the horse hoe, so that the land can te nearly as well cleaned as by a summer fallow. There is perhaps no crop so well adapted for plautit g among young fruit trees as beans. There are a number of excellent varieties, but for field culture the small white bean is believed to be as profitable as any

Beans do well on any good corn land. The general opinion is that a light, warm, sandy or gravelly loam is best. Many think that the soil should be rather poor than otherwise. as rich land is apt to produce too much vine; there is, however a difference of opinion on this point, probably owing to the different signification which is attached to the terms "rich" or "poor" land. In this case, as in most others, a "happy medium is doubtless

Some prefer to plow early in the spring, and clean the laud as much as possible before planting; others think it best to plow under a clover sod, flat, just before planting, say the first of June, as such land is more likely to be free from weeds. Harrow down smooth and make the soil as fine as possible; then plant in rows, 21 feet apart and 15 inches in the rows, using 4 to 6 beans in a hill. Cover with mellow earth, not more than two inches deep. Some prefer to sow in drills; but by planting in hills, the labor of cleaning is greatly faciliated. When sown in drills with a machine, it should drop a single bean two inches apart in the drills, the rows being 21 feet apart. If the weather is fine, plant the first week in June. Some, however, prefer to plant a week later.

Flax -There is perhaps no crop that can be grown, more certain in its returns for labor bestowed, than flax. The demand for seed, for making oil, is increasing every year. Hitherto the greath of flax for the sake of the fibre has been a troublesome process; but a method has been found of obtaining the fibre by machinery, without first steeping it, and we understand that several mills are about to be built this year in Canada for this purpose. The soil best adapted to its growth is a rich, deep loam; stiff clay will not answer. It is indispensable that the soil be perfectly clean, and reduced to a fine tilth. If seed only is wanted, one bushel will sow an acre. For fibre, the quantity of seed sown variesfrom 13 to 3 bushels per acre; the thicker it is sown the finer will be the fibre. The time for sowing is from the first of May to June. The earlier it can be sown the better will be the fibre. In Ireland where flax is extensively grown, the usual estimate is that three acres will produce oue ton of ordinary fibre, worth from \$200 to \$350 per ton. The finest quality of flax produced fetches \$550 per ton. The seed averages about 20 bushels per acre, and is worth \$1,50 per bushel.

Early Chickens .- The chicken crop is one of more importance than most people give credit for. Early chickens are worth double those of later hatching, both because they make better fowls, and more likely to be healthy and lose less by disease in raising. We made mention last fall of the fine pair of game folus purchased of H. W. White, at the State Fair. The hen, a most queenly ben, laid her first egg in mid winter, and kept right on till she had given us seventeen eggs, and then took to setting on the 20th of off her brood on the 12th of March. Very proud was madam Cleopatra of her performance, and in three days the chicks could fly like sparrows. Such gamy little birds we never saw before, and not one of them has drooped a moment since. The hen is a capital nurse and protector, for though she will allow us to draw our hand over her glossy plumage, she will strike out like an arrow with her serpent like neck. to the length of half a yard, if the dog or rabbit put their impudent faces within her range .- Ohio Cul-

Raise Your Own Seeds .- To be sure a single paper of seeds cost but little, but to fill a good garden plot with the whole round of vegetables each year, makes up quite an item. "Tis too much trouble," says neighbor Easy, "to be fussing with these little notions." Grant that it is some "trouble" to set out a dozen or fifteen varieties and take care of the seeds-"there can be no gains without pains." Try this; have an understanding with two or three neighbors, and each raise 4 or 5 kinds and exchange; or support of popular machine is just patented, with valuable is located in the village of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence, and acknowledge of Carrollton, Campourself raise a few kinds—say this year in ost popular machine in existence and the compoundation of the comp for this will be easier than to take care for all the varieties at once. By extending this arrangement, each family in a district might be easily supplied. YANKEE.

Oil Cake for Heifers .- It is said that if heifers receive a little oil cake (say 2 lbs. per

HOSTETTER'S STOMACH BITTERS.

Ir is a fact that, at some period, every member of the human family is subject to disease or disturbance of the bodily functions; but, with the aid of a good tonic and the exercise of plain common sense, they may be able so to regulate the system as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr Hostetter has in-troduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, bowels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple pre-

tem to triumph over disease. For the cure of Dyspepsia, Indigestion, Nau-sea, Flatulency, Loss of Appetite, or any Bilious Complaints, arising from a morbid inaction of the Stomach or Bowels, producing Cramps, Dysentery, Colic, Cholera Merbus, &c., these

cess of strengthening nature, enable the sys-

Bitters have no equal. Diarrhoa, dysentery or flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this preparation. Dyspepsia, a disease which is probably more prevalent, in all its various forms, than any other, and the cause of which may always be attributed to derangements of the digestive organs, can be cured without fail by using HÖSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind; then why not use an article known to be infallible? All nations have their Bitters, as a preventive of disease and strengthener of the system in general; and among them all there is not to be found a more healthy people than the Germans, from whom this preparation emanated, based upon scientific experiments which have tended to prove the value of this great preparation in the scale of medical science.

FEVER AND AGUE .- This trying and provoking disease, which fixes its relentless grasp on the body of man, reducing him to a mere shadow in a short time, and rendering him physically and mentally useless, can be driven from the body by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they neither create nausea nor offend the palate, and render unnecessary any change of diet or interruption of ordinary pursuits, but promote sound sleep and healthy digestion, the complaint is removed as speedily as is consistent with the pro-

duction of a thorough and permanent cure.

For Persons in Advanced Years, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative of strength and vigor, and need only be tried to be appreciated. And to a mother while nursing these Bitters are indispensable, especially where the mother's nourishment is inadequate to the demands of the child, consequently her strength must yield, and here it is where a good tonic, such as Hostetter's Stomach Bitters, is needed to impart temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will recommend their use in all cases of weakness.

CAUTION .- We caution the public against using any of the many imitations or counterfeits, but ask for HOSTETTER'S CELEBRATED STONAGE BITTERS, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph signature is on the label.

Ar Prepared and sold by HOSTETTER & SMITH, Pittsburgh, Pa, and sold by all druggists, grocers, and dealers generally throughout the United States, Canada, South America, and Germany.

AGENTS .- Davis & Jones, Ebensburg; J. A. Parrish, Summitville; Wm. Litzinger, Loretto; Peter Kinney, Munster. August 31, 1859 .- ly.

CEO. HUNTLEY' & RETAIL A BE HAD 2

Above we present you with a likeness of DR

MORSE-the inventor of MORSE'S INDIAN

ROOT PILLS. This philanthropist has spent

visited Europe, Asia, and Africa, as well as

this way that the Indian Root Pills were first

discovered. Dr. Morse was the first man to es-

tablish the fact that all diseases arise from IM-

PURITY OF THE BLOOD-that our strength.

action, becomes thick, corrupted, and diseased;

thus causing all pains, sickness and distress of

every name; our strength is exhausted, our

health we are deprived of, and if nature is not

assisted in throwing off the stagnant humors, the

bleod will become choked and cease to act, and

How important then that we should keep the

these Pills are made is a Sudorifie, which opens

the pores of the skin, and assists Nature in

throwing out the finer parts of the corruption

within. The second is a plant which is an Ex-

pectorant, that opens and unclogs the passage to

the lungs, and thus, in a soothing manner, per-

forms its duty in throwing off phlegm, and other

humors from the lungs by copious spitting. The

third is a Diuretic, which gives double case and

strength to the kidneys; thus encouraged, they

draw large amounts of impurity from the blood.

which is then thrown out bountifully by the uri-

nary or water passage, and which could not have

been discharged in any other way. The fourth

is a Cathartic, and accompanies the other prop-

erties of the Pills while engaged in purifying the

blood; the coarser particles of impurity which

cannot pass by the other outlets, are thus taken

up and conveyed off in great quantities by the

From the above, it is shown that Dr. Morse's

Indian Root Pills not only enter the stomach,

but become united with the blood, for they find

pain is driven from the system, for they cannot

remain when the body becomes so pure and

The reason whypeople are so distressed when

sick, and why so many die, is because they do

not get a medicine which will pass to the afflic-

ted parts, and which will open the natural pas-

sage for the disease to be cast out; hence, a

large quantity of food and other matter is lodg-

ed, and the stomach and intestines are literally

overflowing with the corrupted mass; thus un-

dergoing a disagreeable fermentation, constantly

mixing with the blood, which throws the cor-

rupted matter through every vein and artery,

until life is taken from the body by disease. Dr.

Morse's PILLS have added to themselves victory

upon victory, by restoring millions of the sick to

blooming health and happiness. Yes, thousands

who have been racked or tormented with sick-

ness, pain and anguish, and whose feeble frames

have been scorched by the burning elements of

raging fever, and who have been brought, as it

were, within a step of the silent grave, now

stand ready to testify that they would have been

numbered with the dead, had it not been for

this great and wonderful medicine, Morse's In-

dian Root Pills. After one or two doses had

been taken, they were astonished, and absolutely

surprised, in witnessing their charming effects. Not only do they give immediate ease and

strength, and take away all sickness, pain and

anguish, but they at once go to work at the

foundation of the disease, which is the blood .-

Therefore, it will be shown, especially by those

purify, that disease-that deadly enemy-will
