

AGRICULTURE

Cropping of Dairy Farms.

The following is taken from the "Handbook of Dairy Husbandry," by J. C. Morton recently published in London, and its suggestions are worthy of the consideration of our dairy farmers:
"The cropping of the dairy farm has already been considered. We refer to it again under this section to insist on the great advantage to large dairy farms of a considerable portion of the land being arable. The ability to maintain cows during the winter season, when dry or not yielding milk enough for the maintenance of the general dairy management, on roots and straw instead of hay, and thus to set apart a larger portion of the grass for summer pasture, to its own great advantage and to the greater productiveness of the cows at their most productive period, cannot be overrated. If every 100 acres of grass land being at the rate of more than 1 1/2 acres per cow of whole summer pasture, together with the aftermath of a corresponding quantity needed for winter hay, will maintain a herd of 30 dairy cows, then any source of winter feeding which will displace two-thirds of the hay required, will set free for pasture two-thirds of the extent of grass land to be mown. It is not too much to say that by 30 acres under arable culture as much winter food will be provided as by 50 acres of grass land mown. Supposing then, these 100 acres to be divided into 80 acres pasture and 20 acres arable, it is plain that of the half of this pasture (40 acres) which ordinarily would fall to be mown, at least two thirds (26 acres) would be set free by the winter food, (straw and green crops) yielded by the 20 acres arable, and the stock capable of being kept on the remaining 80 acres of pasture, as compared with that on the 100 acres of whole pasture, depends on the relative summer produce of 66 acres whole grass, and 44 acres aftermath, as compared with that of fifty acres of whole pasture, and 50 acres aftermath. There cannot be a doubt that the former will yield more than the latter, and at the most productive time of the year, while the land will, at the same time, under this plan, be more likely to increase from year to year in value. It thus appears that a larger dairy stock can be kept upon a farm so managed, while, at the same time, one half of the arable land will be yielding its valuable produce of grain for sale.

The Bradford Watermelon.

H. A. M., in the Philadelphia Farmer and Gardener, thus writes his experience with the Bradford watermelon:
"The seed, last year was not planted until the 5th of June, and some of the melons were ripe on the 12th of August: This year they were planted earlier, but ripened some days later. The rind was a grayish green color, closely traversed by fine dark green vines; flesh varying from light to deep red, extremely sweet and tender, sometimes separating from the rind like the Orange watermelon; seed white and small, size varying from medium to quite large. One great recommendation of the Bradford to me, is, that there is no danger of mistaking as to its ripeness. Whenever the tendril nearest the melon dries up, the fruit is ripe. This I consider as a great advantage, as I have never before found a variety which could certainly be depended upon. All the signs of ripeness—drying of the tendril, hardness of rind, cracking when pressed, sound when tapped with the knuckles &c., are fallible with most of them.

Bees.—In many instances chloroform has been successfully used to stupefy bees in examining the hives for moths or other purposes, in removing honey, and in transferring bees from one hive to another. It is only necessary to close the hive sufficiently to prevent egress, and then place in it at some point, a sponge or cloth saturated with a little chloroform, so as to fill the hive with the vapor. As soon as the bees are sufficiently stupefied, open the hive, perform whatever operations are desired, then ventilate with fresh air sufficiently to remove any remaining vapor, and the next morning the bees will be as active and lively as if nothing had happened to them. No harm will ensue if the chloroforming be not carried on at first to a needless degree and length of time.

Training Lima Beans.—A Baltimore correspondent of the Gardeners Monthly, says that though the following is but a small hint, yet it is Lima beans may be gathered full two weeks before the usual time, and so, perhaps, may be useful. Instead of having long and stout poles only as is usual, I tie on lateral slender rods with a willow band, horizontally, and so train the vines, which in fact, as you would do a grape vine. It takes but a few minutes to give my small plot of beans a tendency to run on the lateral poles, and I am well rewarded by their extra earliness. I cannot explain why they should be earlier than when they run on upright poles, but such is the fact, and you may have it for what it is worth.

Cost of Keeping Sheep.—The New England Farmer states that Mr. Elliot, of New Hampshire, estimates the cost of keeping sheep at \$1.50 per annum each, and that each sheep would make half a load of manure during the winter, besides the benefit done to the pasture by the droppings left thereon.

HOSTETTER'S STOMACH BITTERS.

It is a fact that, at some period, every member of the human family is subject to disease or disturbance of the bodily functions; but, with the aid of a good tonic and the exercise of plain common sense, they may be able to regulate the system as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr. Hostetter has introduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, bowels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple process of strengthening nature, enable the system to triumph over disease.
For the cure of Dyspepsia, Indigestion, Nausea, Flatulency, Loss of Appetite, or any Bilious Complaints, arising from a morbid secretion of the stomach or bowels, producing Cramps, Dysentery, Colic, Cholera Morbus, &c., these Bitters have no equal.
Diarrhea, dysentery or flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this preparation. Dyspepsia, a disease which is probably more prevalent, in all its various forms, than any other, and the cause of so much suffering, can be cured without fail by using HOSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind, but they do not use an article known to be infallible? All nations have their Bitters, as a preventive of disease and strengthener of the system in general; and among them all there is to be found a more healthy people than the Germans, from whom this preparation emanated, based upon scientific experiments which have tended to prove the value of this great preparation in the scale of medicinal science.
Fever and Ague, this trying and provoking disease, which fixes its relentless grasp on the body of man, reducing him to a mere shadow in a short time, and rendering him physically and mentally useless, can be cured by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they never create nausea nor offend the palate, and render unnecessary any change of diet or interruption of ordinary pursuits, but promote sound sleep and healthy digestion, the complaint is removed as speedily as consistent with the nature of a thorough and permanent cure.
For Persons in Advanced Years, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative and tonic, and need only to be tried to be appreciated. And to a mother while nursing these Bitters are indispensable, especially where the mother's nourishment is inadequate to the demands of the infant, consequently her strength must yield, and here it is where a good tonic, such as Hostetter's Stomach Bitters, is needed to impart temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will recommend their use in all cases of weakness.

CAUTION.—We caution the public against using any of the many imitations or counterfeits, but ask for HOSTETTER'S CELEBRATED STOMACH BITTERS, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph signature is on the label.
Prepared and sold by HOSTETTER & SMITH, Pittsburg, Pa., and sold by all druggists, grocers, and dealers generally throughout the United States, Canada, South America, and Germany.
AGENTS.—Davis & Jones, Ebersburg; J. A. Parrish, Summitville; Wm. Litzinger, Loretto; Peter Kinney, Munster.

DR. MORSE'S INDIAN ROOT PILLS. ABOVE PRESENT YOU WITH A LIKENESS OF DR. MORSE'S INDIAN ROOT PILLS. THIS PHILANTHROPIST HAS SPENT THE greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered. Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid. When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. Am how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's Garden, for the health and recovery of the human race, of the roots from which these Pills are made is a Sudorific, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expecto-rant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, performs its duty in throwing off phlegm, and other humors from the lungs by copious expectoration. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out beautifully by the urinary or water passage, and which could not have been done in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find way to every part, and completely root out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes purged, healthy, and consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear. The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflicted parts, and which will open the natural passage for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery. Not only do they give immediate ease and strength, and take away all sickness, pain and anguish, but they act on once to work at the foundation of the disease, which is the blood.—Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and purify, that disease—that deadly enemy—will take its flight, and consequently all sickness will again return, and the prospect of a long and happy life will cheer and brighten your days. Sold by Thomas Devine, Ebersburg, and by Medicine Dealers generally throughout the County; B. Lake Julson, successor to A. J. White & Co., No. 50 Leonard St., N. Y., Proprietors; William Mudge & Co., (Proprietors of Evans' Tract's Magnetic Ointment,) Earlville, Madison county, N. Y., General Agents. August 3, 1859:—ly.

READ THIS, AND STUDY YOUR OWN INTERESTS!

JUST RECEIVED. A NEW STOCK OF Watches, Jewelry, Clocks & NOTIONS. At the sign of the Big Watch, Main street, Johnstown, Pa.

The undersigned desires to call the attention of the people of Ebersburg and surrounding country to the fact that he has been appointed an Agent of a large importing house of WATCHES, CLOCKS, &c., and also of a large manufacturing establishment of JEWELRY, whereby he is enabled to offer such inducements to purchasers of these articles as were never before offered in this place, or anywhere this side of the Alleghenies.

He would also call attention to his large assortment of WATCHES AND JEWELRY just received—all of the latest styles and most beautiful workmanship. Having selected his stock with great care, he is confident he can suit every taste as to style as well as all pockets by the great reduction in prices.

THE LADIES are particularly invited to an inspection of his present stock and prices. EAR DROPS hitherto sold at \$1.50 will now be sold at 75 cts., and warranted to stand the test of wear. Breast Pins, Rings, &c., at a reduction.

GENTLEMEN: I would call your attention to my beautiful assortment of GOLD AND SILVER WATCHES, at the following very low prices:
