An aperient and stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctified by the bighest Medical Authorities, both in Europe and the United States, and prescribed in their practice

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable

Innoxious in all malladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nercous Affections, Emaciation Dyspepsia, Constipation, Diarrhoa, Dysentery, Incipient Consumption, Scrofulous Tuberculosis, Sait Rheum, Mismenstruction, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rhenmatism, Intermittent Fevers, Pumples on the Face,

In cases of General Debility, whether the re sult of acute disease, or of the continued dimi nution of nervous and unuscular energy from Chronic complaints one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridden as to have become forgotton in their own neighborhoods, have suddenly re-appeared in the busy world as if just returned from a protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, sanguineous exbaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In Nervous Affections of all kinds, and for reasons familiar to Medical men, the operation of this preparation of Iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating, and gently, regularly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative or inflicting a dis-

agreeable sensation. It is this latter property, among others which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.

In Dyspepsia incumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant costineness.

In unchecked Diarrhora, even when advanced to Dysentary, confirmed emaciating and apparently malignent, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debiliating cough, and remittent hectic, which generally indicates Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Serofulous Tuberculsis, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of idione, without any of their well known liabilities. The attention of females cannot be too confidently invited to this remedy and restorative, in

the caces peculiarly affecting them. In Rheumatism, both Chronic and inflamatory -in the latter, however, more decidedly-it has been invariably well reported, both as alleviating pain and reducing the swellings and stifness of

the joints and muscles. In Intermittent fevers it must necessarily be a great remedy and energetic rest rative, and its progress in the new settlements of the West will probably be one of high renown and use-

No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy and fully restorative effects.
