# ZGRIEUXEURAX.

The Culture of Ruta Baghs. Like the parsnip, the Ruta Baga is not cultivated by our farmers to the extent it ought to be though much more generally than the former. It is not nearly so difficult of cultivation as the parsnip, though it also requires care and high farming to render cer tain large crops. We have heard of twelve hundred bushels being raised on an acre, and we have viewed crops which yielded about eight hundred bushels

The seed should be sown not later than the 25th, or at farthest the 28th of July, though some farmers sow it much carlier. About the middle to the 20th of July is perhaps the best period for this latitude. If the soil is mellow and rich, the Ruta Baga will grow anywhere. It is, like the parsuip, a very hardy plant, and can be allowed to remain in the ground until late in November.

Sow the seed in drills twenty eight or thirty inches apart, and when the plants are well up, thin out to about eight or ten inches, then cultivate between the rows, and boe, or use the hand to remove the weeds between the plants. Cleanly cultivation is very important in this crop. It will take about one lb. of seed per acre. - Germantown Telegraph.

#### The Art of Growing Trees from Cuttings.

Professor Delacroix, of Bessaucen, in France, has discovered a mode of propagating from cuttings, which is not only successful in cases of roses and other plants easy to live, but apples, pears, plums, apricots, de. Out of an hundred cuttings put out in June, not one but was thriving in August, in the open air, without shade or extra care, except watering a few times soon after they are planted His method is to put the whole cutting in the ground, best in the form of a bow, with the centre part up, and just on a level with the surface, at which point there must be a good bud or shoot, which is the only part exposed to the air; the other being protected by the earth from drying up supports and gives vigor to the bud, which starts directly into leaf, and in its turn helps the cutting to form roots and the whole even forms a thriving tree -The method of setting them is to form two drills about three inches apart, with a sharp ridge between, over which bent the cutting, and stick and end in each drill, and cover up and press the earth firmly, and water freely. Cuttings should be of last years growth, fresh and vigorous.

#### To Keep Tires on Wheels.

A correspondent of the Southern Planter, says: I ironed a wagon some years ago, for my own use, and before putting on the tires I filled the fellers with linseed oil; and the tires have worn out and were never bose. I ironed a buggy for my own use seven years ago, and the tire are as tight now as when put on. My method of filling the fellers with oil is as follows: -

I use a long cast iron oil heater, made for the purpose; the oil is brought to a boiling heat, then is placed on a stick, so as to hang in the oil, each feller an hour, for a common six feller. The timber should be dry, as green timber will not take oil. Care should be taken that the oil be not made hotter than a boiling heat, in order that the timber be not burnt. Timber filled with oil is not susceptible to water, and the timber is much more durable. I was amused some time ago when I told a blacksmith how to keep tires tight on wheels, by his telling me it was prof itable business to tighten tires, and the wagon maker will say it is profitable to him to and repair wheels -but what will the farmer who supports the wheelright and smith say?

#### Usefulness of Soot.

This article is often wasted, being thrown into the ash heap, or dumped on the ground at the back door, and no use made of it .a valuable manure. If used as a top dressing to grass, it produces a marked effect .-When sown broadcast, some of its ammonia tecomes volatilized, and is wasted in the atmosphere. Therefore, it should be mixed erful fertilizer. It may be applied to peas, asparagus, strawberries, raspberries, and to nearly all growing crops

If farmers and gardners generally consider ed than all fertalizers are more useful, when first reduced to a liquid state, they would take | terials, Straw Goods, Artificial Flowers, Buffalo the trouble to bring various manures into this condition before applying them. "They do these things better in Spain,"—certainly PRICE I. PATTON.
February 17, 1858:tf they do in England.

Hints for the Kitchen Garden. The planting season is nearly over. Melons and cucumbers for pickling should be sown early this month. Of Long Green is the best for this purpose

cole, brocili, brussels sprouts and any other of the cabbage tribe. Water freely, and if that may be convenient.

Endive .- Set out endive this month, for early autumn use. See that your ground is in good order and well manured. Plant a

#### HOSTETTER'S STOMACH BITTERS.

It is a fact that, at some period, every member of the human family is subject to disease or disturbance of the hodily functions; but, with the aid of a good tonic and the exercise of plain common sense, they may be able so to regulate the system as to secure permanent health. In order to accomplish this desired object, the true course to pursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life. For this purpose, Dr Hostetter has introduced to this country a preparation bearing his name, which is not a new medicine, but one that has been tried for years, giving satisfaction to all who have used it. The Bitters operate powerfully upon the stomach, bowels, and liver, restoring them to a healthy and vigorous action, and thus, by the simple process of strengthening nature, enable the sys-

tem to triumph over disease. For the cure of Dyspepsia, Indigestion, Nausen, Flatulency, Loss of Appetite, or any Bilious Complaints, arising from a morbid inaction of the Stomach or Bowels, producing Cramps, Dysentery, Colic, Cholera Morbus, &c., these

Bitters have no equal. Diarrhoa, dysentery or flux, so generally contracted by new settlers, and caused principally by the change of water and diet, will be speedily regulated by a brief use of this preparation. Dyspepsia, a disease which is probably more prevalent, in all its various forms, than any other, and the cause of which may always be attributed to derangements of the digestive organs, can be cured without fail by using HOSTETTER'S STOMACH BITTERS, as per directions on the bottle. For this disease every physician will recommend Bitters of some kind; then why not use an article known to be infallible? All nations have their Bitters, as a preventive of disease and strengthener of the system in general; and among them all there is not to be found a more healthy people than the Germans, from whom this preparation ema-nated, based upon scientific experiments which have tended to prove the value of this great preparation in the scale of medical science.

FEVER AND AGUE .- This trying and provoking disease, which fixes its relentless grasp on the body of man, reducing him to a mere shadow in a short time, and rendering him physically and mentally useless, can be driven from the body by the use of HOSTETTER'S RENOWNED BITTERS. Further, none of the above-stated diseases can be contracted, even in exposed situations, if the Bitters are used as per directions. And as they neither create nausea nor offend the palate, and render un-necessary any change of diet or interruption of ordinary pursuits, but promote sound sleep and healthy digestion, the complaint is re-moved as speedily as is consistent with the production of a thorough and permanent cure.

For Persons in Advanced Years, who are suffering from an enfeebled constitution and infirm body, these Bitters are invaluable as a restorative of strength and vigor, and need only be tried to be appreciated. And to a mother while nursing these Bitters are indispensable, especially where the mother's nourishment is inadequate to the demands of the child, consequently her strength must yield, and here it is where a good tonic, such as Hostetter's Stomach Bitters, is needed to impart temporary strength and vigor to the system. Ladies should by all means try this remedy for all cases of debility, and, before so doing, should ask their physician, who, if he is acquainted with the virtue of the Bitters, will recommend their use in all cases of weakness.

CAUTION .- We caution the public against using any of the many imitations or counterfeits, but ask for Hostetter's Celebrated Stomach Bitters, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph

signature is on the label. 23 Prepared and sold by HOSTETTER & SMITH, Pittsburgh, Pa., and sold by all druggists, grocers, and dealers generally throughout the United States, Canada, South America, and Germany.

AGENTS .- Davis & Jones, Ebensburg; J. A. Parrish, Summitville; Wm. Litzinger, Loretto; Peter Kinney, Munster. August 31, 1859.-ly.

Jewelry,

Above we present you with a likeness of DR. MORSE-the inventor of MORSE'S INDIAN ROOT PILLS. This philanthropist has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America-has spent three years among Indians of our Western country-it was in this way that the Indian Root Pills were first discovered, Dr. Morse was the first man to establish the fact that all diseases arise from IM-PURITY OF THE BLOOD-that our strength. health and life depended upon this vital fluid.

When the various passages become clogged and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and Rings, &c., at a reduction thus our light of life will forever be blown out How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs In Nature's Garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sudorific, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and unclogs the passage to the lungs, and thus, in a soothing manner, per-forms its duty in throwing off phlogm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out bountifully by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach, but become united with the blood, for they find way to every part, and completely rout out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfeetly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and Co ACH MANUFACTORY.

The reason whypeople are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the afflictod parts, and which will open the natural pas- Evans (Carpenter,) where he is prepared to do sage for the disease to be cast out; hence, a large quantity of food and other matter is lodg- notice and on reasonable terms, and he hopes by ed, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery. until life is taken from the body by disease. Dr. ture the following kinds of vehicles, viz:-Morse's Pills have added to themselves victory | BUGGIES, of different qualities and prices; upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning elements of all tastes and all purses. REPAIRING done raging fever, and who have been brought, as it with neatness add dispatch. were, within a step of the silent grave, now of all kinds, and varieties, promptly furnished to order. P. Braniff, of Loretto, will at numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate case and strength, and take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood.-Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and purify, that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and prices for cash. nappy life will cherish and brighten your days Sold by Thomas Devine, Ebensburg, and by Medicine Dealers generally throughout the County; B.
