ZGRIEUTCUBAT.

The Effects of Deepening the Soil. Last week we referred to the necessity of deepening that portion of the soil which is used to grow crops, as one of the requirements of the times. This work seems to be growing more and more in favor with every intelligent farmer They are looking upon it with more favor, and are beginning to inquire where the tools may be had with which the work may be performed. In conversing with a very observent farmer on the subject a few days since, he obserzed that so far as his experience went the average depth of plowing throughout the State, and certainly through his neighborhood, seldom averaged more than six inches in depth, sometimes seven but the latter depth was exceptionable. He was convinced also by actual experience of his own, that even on gravelly loam soils, the subsoil became so indurated and packed by the trampling of the team and the pressure of the plow against it, that after a few ploughings the erust thus formed was not only impervious to the atmospheric influence, but he has found it also to become as late and as cold as stiff clay, for the surface water was held by it and did not pass of readily in the spring. For these reasons he had almost come to the determination to try the effect of the subsoil

It must be borne in mind that the work of subsoiling is not to be done each year but that its necessity is only felt once in the rotation. For instance a field is fallowed for a wheat

crop, the wheat to be followed by clover, the clover by wheat, and the wheat by grass for hay for four years; we have the whole expense of subsoiling spread over a series of six or seven years, during which the successsive crops get the benefit of the subsoiling

When this work has been carried out in connection with draining it has more than doubled the value of the land, and the best of this is not only in the superior value of the crop, but also in the increased rent charged for land which has been once made to produce by the mere work which has been expended in deepening the soil. In fact the deepening of the soil is the same to the farmer as increasing bank capital of a merebant, it faciliates every operation that is earried on, and gives the command of more land, that every land it renders more productive, because it renders it earlier, so that every crop which is sown or planted gets the benefit of the whole growing season. The land with an increased depth of worked soil, being more susceptible to the influence of heat, and proving to be warmer as well as dryer, and this point alone in our short season is not to be too highly estimated. Henry Stephens in the account of the results of deep culture undertaken on the estates of the Marquis of Tweedale, one of the most distinguished Scottish agriculturists, relates the results in a whole series of fields, but we extract but one as an example. He says. "The long Bents field contained sixteen acres, of a sandy clay soil and subsoil, it was in oats in 1848, and produced at the rate of thirty seven bushels to the acre; and in 1849 it was bare fallowed and subsoiled; in 1850 it yielded thirty one bushels of wheat to the acre. In 1851 and 1852 it was in grass, but the next spring it was plowed to the depta of fifteen inches with the Tweedale plow, and produced sixty and one fourth bushls to the acre." From this single example we may easily draw the inference that if deep culture has such an effect in the moist, cool climate of Scotland, in ours, where vegetation has the benefit of a dryer and warmer temperature, and under ordinary circumstances comes forward so rapidly, it would be found equally as profitable .- Michigan Farmer,

Inverted Trees .- So similar are the organs of roots and branches that in many cases, they will thrive well if they are made to change places. Andrew Knight an eminent physiologist of England, was the first to discover this. If we bend down a young plum or cherry tree and bury its branches, (or a large portion of them,) in the earth, they will throw out roots, and the original roots ficient inducement for persons to purchase, withbeing afterwards gradually detached will send forth leaves, and in the course of time will produce flowers and fruit. Let some of the young orchadists whom we are training up try this experiment, and report progress to 1 cash

Apples for feeding .- For cattle, sweet apples are found to be anexcellent substitute for roots-promoting both growth and health. For swine nothing equals an apple pie, either for relish or for fattening power. The pig is not very dainty about his pie, however. It you merely cook the apples and stir in a little bran, he won't refuse the dish, substitate shorts, or corn and cob meal, or ground oats or buckwheat, and it will suit his palate and pile on the fat amazingly. And, for finishing up a piece of work, an apple pudding. thickened with good corn meal is as far ahead kins. Pork made with apples is sweeter, and quite as free from shrinking as the corn Wares packed carefully and fed .- Genessee Farmer.

Reaping Machines .- The Chicago Times and Herald says that idea of the amount of ground in wheat may be gathered from the statement of a responsible gentleman of Janesville, who says that with the assistance of a epy glass, be saw one hundred and forty six reapers at work at one time. This is on the line of the Chicago and Northwestern

50,000 COPIES ALREADY SOLD. EVERY BODY'S LAWYER AND COUN-SELLOR IN BUSINESS,

BY FRANK CROSBY. Of the Philadelphia Bar.

t Tells You How to draw up partnership papers and gives general forms for agreements of all kinds, bills of sale, leases and petitions.

MOTT'S CHALY BEATE RATIVE PILLS of IRON.

An aperient and stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctified by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable

been tried, it has proved absolutely curative in each of the following complaints, viz: In Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhoa, Dysentery, Incipient Consumption, Scrofulous Tuberculosis, Salt Rheum, Mismenstruction, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Face,

Innoxious in all malladies in which it has

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from Chronic complaints one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridden as to have become forgotton in their own neighborhoods, have suddenly re-appeared in the busy world as if just returned from a protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, sanguineous exbaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In Nervous Affections of all kinds, and for reasons familiar to Medical men, the operation of this preparation of Iron must necessarily be alutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating, and gently, regularly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative or inflicting a disagreeable sensation.

It is this latter property, among others which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears o exert a distinct and specific action, by disersing the local tendency which forms them. In Dyspepsia innumerable as are its causes, single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant costiveness.

In unchecked Diarrhoea, even when advanced to Dysentary, confirmed emaciating and appaently malignent, the effects have been equally ecisive and astonishing.

In the local pains, loss of flesh and strength. biliating cough, and remittent hectic, which generally indicates Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances. In Scrofulous Tuberculsis, this medicated iron

has had far more than the good effect of the most cautiously balanced preparations of idione, without any of their well known liabilities. The attention of females cannot be too confidently invited to this remedy and restorative, in

the caces peculiarly affecting them. In Rheumatism, both Chronic and inflamatory in the latter, however, more decidedly-it has been invariably well reported, both as alleviating pain and reducing the swellings and stifness of

In Intermittent fevers it must necessarily be great remedy and energetic restorative, and its progress in the new settlements of the West will probably be one of high renown and use-

No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy and fully restorative effects. Good appetitee, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediatevfollow its use.

Put up in neat flat mettal boxes containing 50 pills, price 50 cents per box; for sale by druggists and dealers. Will be sent free to any adress on receipt of the price. All letters, orders, ect., should be addressed to

LUMBER. PINE POPLAR CHERRY AND ASH LUM-

E. HUGHES.

Above we present you with a like MORSE-the inventor of MORSE ROOT PILLS. This philapthronic the greater part of his life in travvisited Europe, Asia, and Africa North America-has spent three the Indians of our Western countrthis way that the Indian Root P discovered, Dr. Morse was the first tablish the fact that all diseases ar PURITY OF THE BLOOD-that health and life depended upon this vi-

When the various passages bearing and do not act in perfect harmony ferent functions of the body, the h action, becomes thick, corrupted, and thus causing all pains, sickness and every name; our strength is exh health we are deprived of, and if a assisted in throwing off the stagnaut blood will become choked and cease thus our light of life will forever by How important then that we show various passages of the body free and how pleasant to us that we have it i to put a medicine in your reach, nan Indian Root Pills, manufactured from roots which grow around the mo in Nature's Garden, for the health of diseased man. One of the roots these Pills are made is a Sudorific, the pores of the skin, and assist throwing out the finer parts of the within. The second is a plant win pectorant, that opens and uncloss the the lungs, and thus, in a soothing m forms its duty in throwing off phiegin humors from the lungs by copious spit third is a Dinretic, which gives double a strength to the kidneys; thus encourse draw large amounts of impurity from the which is then thrown out bountifully b nary or water passage, and which con been discharged in any other way. The is a Cathartic, and accompanies the other erties of the Pills while engaged in puri blood; the coarser particles of impurcannot pass by the other outlets, are thus up and conveyed off in great quantities

From the above, it is shown that De-Indian Root Pills not only enter the st but become united with the blood, for the way to every part, and completely range cleanse the system from all impurity ife of the body, which is the blood, bear feetly healthy; consequently all sickne pain is driven from the system, for they remain when the body becomes so to

large quantity of food and other matter ed, and the stomach and intestines are overflowing with the corrupted mass; t dergoing a disagreeable fermentation, on mixing with the blood, which throws rupted matter through every vein and until life 's taken from the body by dis-Morse's PHLLS have added to themselves upon victory, by restoring millions of the soming health and happiness. Yes, the who have been racked or tormental with ness, pain and anguish, and whose feeb have been scorched by the burning elecraging fever, and who have been brong were, within a step of the silent gr stand ready to testify that they would humbered with the dead, had it not this great and wonderful medicine, M dian Root Pills. After one or two been taken, they were astonished, and surprised, in witnessing their charmen Not only do they give immediate strength, and take away all sickness, anguish, but they at once go to work foundation of the disease, which is Therefore, it will be shown, especially who use these Pills, that they will d purify, that disease-that deadly east take its flight, and the flush of youth a will again return, and the prospect of a happy life will cherish and brighten
