Farmer's Boys.

The following article, which we find in the "Valley Farmer," a Western agricultural periodical, we recommend to the attention of every farmers' boy. Parents should also, point it out to their sons, and if necessary, read it to them carefully, and then hand the article over to them, without comments, unless the remarks be of a mild pleasing na-

"In the wide world there is no more important thing than farmers' boys. They are not so important for what they are, or for what they will be. At present they are of but little consequence too often. But farmers' boys always have been, and we presume always will be the material out of which the noblest men are made They have health and strength; they have bone and muscle; they heart and will; they have nerve and patience; they have ambition and endurance; and these are the materials that make men. Not buckram and broadcloth, and patent leather and beaver fur, and kid gloves and watch seals, are the materials of which men are made. It takes better stuff to make a man. It is not fat and flesh, and swagger and selfconceit; nor yet smartness, nor flippery, nor foppery nor fastness. These make fools, but not men; not men, such as the world wants, not such as it will honor and bless. It is not long hair, nor much beard, nor cane, nor a pipe, nor a cigar, nor a quid of tobacco, nor an oath, nor a glass of beer or brandy, nor a dog and gun, nor a pack of cards, nor a novel, nor a vulgar book of love and murder, nor a tale of adventures, that makes a man, or has anything to do with making a man. Farmers' boys ought to keep clear of all these idle, foolish things. They should be employed with nobler objects. They have yet to be men of the clear grit, honest, intelligent, industrious, ambitious men, who love their country and their kind. With the means they possess how easy for them to be in fact the first class men. They have land and stock and tools; they have health and time, mind; they have schools and churches and papers; they have books and perseverance and the heart and hand for work. More than this they need not. Let them awake and work and read and studdy, that they will make men of the right stamp. They must work intelligently and studdy with an earnest purpose of being benefited, and then they will become what they ought to be, the real men of the world."

#### Charcoal for Pigs.

We have experimented with charcoal dust for pigs, both when growing and fattening, and considered uniformly that the results were most favorable. It is very efficient aid in maintaining swine in a condition of healthy growth and ready fattening. Charcoal does not serve as food, it operates favorably as a purifier of foul gaseous exhalations, as an absorbant of liquors which it purifies, causing decompositions, resulting in the production of pure gases and liquids from those before high

Those effects go on in the system as well without, and the result is that as a general corrective and regulative of the system, keeping it in a sound healthy tone, promoting appetite, &c , its value lies. It has no properly medicated effect, as have ashes, or at least it possesses medical properties to a very small extent. This we think is reason enough for all the good effects observed. Keep a box clear and open type; is illustrated with appro or heap of charcoal dust in one corner of the hog pen, and occasionally throw some corn or small grain into it If near coal pits, use old bottoms. It should not, as is often recommended, be mingled with manure. - E.z.

Foreign Plants and Seeds .- Mr. Clemson, the Superintendent of the Agriculteral Branch of the Patent Office is now on his way home from Europe, whither he went by direction of the Secretary of the Interior to purchase vegetable, medicinal and economical plants and seeds generally. Many varieties have already been received. Before they are distributed among the people of the United States they will be tested at the government propagating garden in Washington, where additional facilities for this purpose a e in progress,-Heretofore much complaint has been made as to the worthlessness of seeds, but this in some degree was owing to the ignorance of the recipients regarding the mode of proper cul-

Cement for Holes in Castings .- The best cement for this purpose is made by mixing one part of sulphor in powder, two parts of ammoniae, and eighty parts of clean powdered iron turnings. Sufficient water must be added to make it into thick paste, which should be pressed into the holes or seams which are to be filled up. The ingredients composing this cement should be kept separate, and not mixed until required for use. It is to be applied cold and the casting, should not be used for two or three days afterwards.

Lime and Farm Manures .- Get and applly lime when you can. It is very well for Manufactory West of the Alleghenies. All the wheat crop to put on even a few bushels to the acre, and especially well for the clover and grasses which may succeed it. A dressing of twenty-five to fifty bushels may be STOVES. Convey PUMPS, LEAD PIPE, put on as convenience suggests; the smaller quantity to be repeated in a few years. Farm manures are always good for wheat, but should not be used as top pressing after seeding unless well rotted, when it may be put on with

50,000 COPIES ALREADY SOLD. EVERY BODY'S LAWYER AND COUN-SELLOR IN BUSINESS,

BY FRANK CROSBY,

Of the Philadelphia Bar. It Tells You How to draw up partnership papers and gives general forms for agreements of all kinds, bills of sale, leases and petitions. # D. MOTT'S CHALY BEATE RATIVE PILLS IRON

An aperient and stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctified by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable

Innoxious in all malladies in which it has been tried, it has proved absolutely curative in

In Debility, Nervous Affections, Emaciation. Dyspepsia, Constipation, Diarrheea, Dysentery, Incipient Consumption, Scrofulous Tuberculosis. Salt Rheum, Mismenstruation, Whites, Chlorous, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples ou the Face,

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from Chronic complaints one trial of this restorative has proved successful to an extent which no Executive and Judicial Powers of both the description nor written attestation would render credible. Invalids so long bed-ridden as to have become forgotton in their own neighborhoods. have suddenly re-appeared in the busy world as if just returned from a protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, sanguineous exbaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name. \$1000 A YEAR can be made by enterprising

In Nervous Affections of all kinds, and for reasons familiar to Medical men, the operation of this preparation of Iron must necessarily be agents, with other information, apply to or addess, with other information, apply to or addess, without being exciting and overheating, and gently, regularly aperient, even in he most obstinate cases of costiveness without ever being a gastric purgative or inflicting a dis-

> It is this latter property, among others which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.
>
> In Dyspepsia innumerable as are its causes, single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant costiceness.

In unchecked Diarrheea, even when advanced to Dysentary, confirmed emaciating and apparently malignent, the effects have been equally lecisive and astonishing.

In the local pains, loss of flesh and strength It Tells Fou The symptoms of Croup, Cholera debiliating cough, and remittent hectic, which Infantum, Colic, Diarrhoea, Worms, Scalled generally indicates Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Scrofulous Tuberculsis, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of idione, without any of their well known liabillities. The attention of females cannot be too confidently invited to this remedy and restorative, in

the caces peculiarly affecting them. In Rheumatism, both Chronic and inflamatory -in the latter, however, more decidedly-it has been invariably well reported, both as alleviating pain and reducing the swellings and stifness of

the joints and muscles. In Intermittent fevers it must necessarily be a great remedy and energetic rest rative, and its progress in the new settlements of the West will probably be one of high renown and use-

No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy and fully restorative effects. Good appetitee, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediatelyfollow its use.

Put up in neat flat mettal boxes containing 50 pills, price 50 cents per box; for sale by druggists and dealers. Will be sont free to any ad dress on receipt of the price. All letters, orders, ect., should be addressed to
