AGRICULTURAL.

For Limited Land Owners.

One year since last planting season, I planted potatoes about two feet and a half apart in hills; they came up, did not appear flourishing, the 10th of June came a frost and killed them down. Immediately planted corn on the same ground between the hills of potatoes; the season was favorable, and I had a fair crop of both kinds, especially potatoes; they were of superior quality, and the quantity a fair crop. The corn came to maturity, and out of it found seed for this year. Having unexpectedly raised two crops on the same ground and at the same time concluded to make the experiment to test the thing fully. For that purpose planted my garden containing three-sixteenths of an acre, had it plowed just before planting, without manuring at all. It being clayey ground, it came up in lumps, without harrowing, proceeded to plant potatoes about three feet apart one way, the other two and a half feet. Then I planted the Yellow York State eight rowed corn between the rows, the widest way in the centre of four hills of potatoes, which brought them in rows both ways by itself.

While planting I let the lumps remain, except breaking them in pieces to obtain sufficient dirt to cover the seed planted. When I came to hoeing the first time, broke in pieces all lumps, and made thorough work after this hoeing. The rest of the cultivation was easy, and not laboreous. You will understand from the planting, that I used no cultivator or plow among the corn, nothing but the hoe. If you should cultivate a large piece, you might plant potatoes four feet one way, and three feet the other way, then plant the corn between the wide rows of potatoes which would leave the rows two feet by three you might then use a small plow one way.

It will be important in raising this extra crop, to keep the ground clear from weeds and not suffer any vines, pumpkins or squash but to have the ground entirely devoted to the crop planted. I planted on this small piece of ground, about two bushels of potatoes, after cutting and reserving the eatable part.

Now for a few remarks relative to the crop this year. I have been in Oberlin more than 20 years, have planted potatoes about every year; had concluded that potatoes could not be raised here to any advantage. One year I planted some ground that had been tilled; obtained a good crop for the quantity of ground and carried them into my celler, in about two weeks, carried them out, and carried them to let them rot. This year there appears no rot but generally they are fair and smooth. This crop was most productive that I have ever raised in Oberlin except the one above named, and greatly superior to that. My conclusion from my short experience in this double crop is, that the crop of potatoes is increased by the crop of corn. I think that the shade made by the corn in hot weather, or a drouth is favorable to the potatoes, and from this circumstance the crop is much increased. The corn, on ground well prepared, would be a fair crop; it may be diminished a trifle however. I think we may safely say that two good crops can be raised on the same ground at the same time, for the experiment has exceeded my most sanguine expectations. The corn was ashed in the hill, to forward its growth, to prevent the potatoes from getting the start of the corn, which was a benefit to to the corn, and no disadvantage to the potatoes. My impression, with the kind of corn mentioned, cannot have too much shade, planted as described in this statement.

JOHN ELMORE.

Loraine County, Oct. 1860.

Rich Soil and Good Stock.

We clip the following from a communication in the Homestead, as worth a few minutes thought from the reading farmer:

"In distributing manure, it is economical to give a liberal dressing as far as we go. We must go through the labor of cultivation and it costs no more to plant or hoe a field of corn or potatoes that will yield heavily, than one which will give poor returns; the only additional expense is the extra cost of harvesting." The same is true to the culture of any crop.

"We are recommending to buy more stock for our farms as fast as we can find means for sustaining it; but what class of stock it is best to buy is less often discussed. In this too, it may be safely asserted that the proper course is to buy good stock. It costs no more to raise and keep gook cattle than poor; and men who buy for the market always make a very great distinction between good and poor animals."

The same rule applies in dairying and wool-growing—good cows and sheep are profitable—poor milkers and light-fleeced sheep eat up their products many times over, and are ever in debt to the farmer.

Cabbage for Fodder.—There is no vegetable that can be planted after the first of July that will give so great a yield of fodder as cabbages; and no one who is likely to be short of pasturage, or winter feed should neglect this highly important adjunct to his other crops. The notion that cabbages should only be grown by the dozen for cooking in the kitchen, is an old, and we may add, a foolish one. Grow them by the thousand, and after pasture fails feed them where they are growing to every domestic animal on the farm.—When the ground freezes, pull up your cabbage crop and store it in the cellar.

50,000 COPIES ALREADY SOLD.

EVERY BODY'S LAWYER AND COUNSELLOR IN BUSINESS,

BY FRANK CROSBY,

Of the Philadelphia Bar.

It Tells You How to draw up partnership papers and gives general forms for agreements of all kinds, bills of sale, leases and petitions.
It Tells You How to draw up Bonds and Mortgages, Affidavits, Powers of Attorney, Notes and Bills of Exchange, Receipts and Releases.
It Tells You The laws for the collection of Debts, with the Statutes of Limitation, and amount and kind of property exempt from Execution in every State.
It Tells You How to make an Assignment properly, with forms for Composition with Creditors, and the Insolvent laws of every State.
It Tells You The legal relations existing between Guardian and Ward, Master and Apprentice, and Landlord and Tenant.

D^R MOTT'S CHALYBEATE RESTORATIVE PILLS OF IRON.

An aperient and stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctified by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable case.

Innoxious in all malladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhœa, Dysentery, Incipient Consumption, Scrofulous Tuberculosis, Salt Rheum, Mismenstruation, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Face, &c.

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from Chronic complaints one trial of this restorative has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridden as to have become forgotton in their own neighborhoods, have suddenly re-appeared in the busy world as if just returned from a protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In Nervous Affections of all kinds, and for reasons familiar to Medical men, the operation of this preparation of Iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating, and gently, regularly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative or inflicting a disagreeable sensation.

It is this latter properly, among others which makes it so remarkably effectual and permanent a remedy for *Piles*, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.

In Dyspepsia innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant *costiveness*.

In unchecked Diarrhœa, even when advanced to Dysentary, confirmed emaciating and apparently malignent, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debiliating cough, and remittent hectic, which generally indicates Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Scrofulous Tuberculsis, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of idione, without any of their well known liabilities.

The attention of females cannot be too confidently invited to this *remedy* and *restorative*, in the cases peculiarly affecting them.

In Rheumatism, both Chronic and inflamatory —in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the swellings and stifness of the joints and muscles.

In Intermittent fevers it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West will probably be one of high renown and usefulness.

No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy and fully restorative effects. Good appetitee, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediately follow its use.

Put up in neat flat mettal boxes containing 50 pills, price 50 cents per box; for sale by druggists and dealers. Will be sent free to any address on receipt of the price. All letters, orders, ect., should be addressed to

R. B. LOCKE, & Co., General Agents,
20 Cedar St., N. Y. May, 30,1860:1y.

SADDLERY! SADDLERY!

☞JOB WORK OF ALL KINDS DONE AT THIS OFFICE ON SHORT NOTICE AND AT REASONABLE PRICES.

Above we present you with a likeness of DR. MORSE—the inventor of MORSE'S INDIAN ROOT PILLS. This philanthropist has spent the greater part of his life in traveling, having visited Europe, Asia, and Africa, as well as North America—has spent three years among the Indians of our Western country—it was in this way that the Indian Root Pills were first discovered, Dr. Morse was the first man to establish the fact that all diseases arise from IMPURITY OF THE BLOOD—that our strength, health and life depended upon this vital fluid.

When the various passages become clogged, and do not act in perfect harmony with the different functions of the body, the blood loses its action, becomes thick, corrupted, and diseased; thus causing all pains, sickness and distress of every name; our strength is exhausted, our health we are deprived of, and if nature is not assisted in throwing off the stagnant humors, the blood will become choked and cease to act, and thus our light of life will forever be blown out. How important then that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountains of Nature's Garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sudorific, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is a plant which is an Expectorant, that opens and unclogs the passages in the lungs, and thus, in a soothing manner, performs its duty in throwing off phlegm, and other humors from the lungs by copious spitting. The third is a Diuretic, which gives double ease and strength to the kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out hourly by the urinary or water passage, and which could not have been discharged in any other way. The fourth is a Cathartic, and accompanies the other properties of the Pills while engaged in purifying the blood; the coarser particles of impurity which cannot pass by the other outlets, are thus taken up and conveyed off in great quantities by the bowels.

From the above, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach but become united with the blood, for they by way to every part, and completely rout out and cleanse the system from all impurity, and the life of the body, which is the blood, becomes perfectly healthy; consequently all sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear.

The reason why people are so distressed when sick, and why so many die, is because they do not get a medicine which will pass to the affected parts, and which will open the natural passage for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the corrupted mass; thus undergoing a disagreeable fermentation, or tainty mixing with the blood, which throws the corrupted matter through every vein and artery, until life is taken from the body by disease. Dr. Morse's PILLS have added to themselves victory upon victory, by restoring millions of the sick to blooming health and happiness. Yes, thousands who have been racked or tormented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning flames of raging fever, and who have been brought, as it were, within a step of the silent grave, now stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken, they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate ease to strength, and take away all sickness, pain and anguish, but they at once go to work at the foundation of the disease, which is the blood. Therefore, it will be shown, especially by those who use these Pills, that they will cleanse and purify, that disease—that deadly enemy—will take its flight, and the flush of youth and beauty will again return, and the prospect of a long and happy life will cherish and brighten your days.

☞ Sold by Thomas Devine, Ebensburg, and by Medicine Dealers generally throughout the County; B. Lake Judson, successor to A. J. White & Co., No. 50 Leonard st., N. Y., Proprietors; William Madge & Co., (Proprietors of Dr. A. Trask's Magnetic Ointment,) Earlville Madison county, N. Y., General Agents.
