Plant Corn now.

We cannot urge too strongly the necessity of farmers planting large crops, the earlier the better from now till the 10th of June; replant all missing hills in fields already up, farmers should not too late yet if the little golden yellow be planted, it will have ample time to ripen before the early frosts in autumn and many spare pasture fields and poor spots of now useless ground, may be made to bring a tolerable crop, by a little extra trouble in scraping up manure which is now going to waste sbout the corners of barn yards, behind the horse stables, under poultry roosts, around where the cows lay at nights and every other place where a shovelful of mauure can be gathered up, get a little manure in every hill or in as many hills as possible, for remember that the farmer who has produce to spare this fall will, in all probability, be well paid for his trouble; grain this fall will command good prices or will make pork or beef which will bring the

The agriculturists will reap a golden harvest for his exertions, as there will be large expenditures by the General Government, in addition to the usual expenses, and moneys that are now laying idle in vaults, will be absorbed in loans by the Government and expended in carrying on the expenses of the war, which moneys will pass through the hands of the producer.

Weed the Wheat Fields.

If this was done last year, the labor will now be comparatively light; but if it was neglected, and foul seed was sown last Fall, the neglect must now be paid for with compound interest. If time can not be taken to go through the whole field, then mark out the best and earliest tracts, and give them especial care to procure choice, clean seed, far the next crop. Choose a time when the ground is softened by recent rain, take a garden trowel or other convenient impliment for weeds n ot readily pulled and root out every one that would ripen by harvest time. Thistles, cockle, dock, and many other sorts are readily discerned-deal with them thoroughly. Foreign journals complain that much of the wheat so largely exported from this country during the last year, is mixed with weed seeds, and they Class very properly caution cultivators against useing such for seed. One sample was noticed contain- 14 ing large quantities of small pink bodies, about 13 the size of wheat kernels, which proved to be 13 Pli bulbs of the crow garlic, (Allium vineale,) a 13 A. pestiferous weed, as all dairymen know, who have pastures infested with it. The taint impar- 14 ted by it to butter is insufferable, and when, as in the above instance bulbs are mixed with wheat the quality of the flour made from it is seriously | 13 impaired. See that none of this nuisance is allow- 14 ed to remain in the patch of seed wheat .-- Am. Agriculturist. 14

Plant Beans.

Beans constitute an important item in the sol-14 diers' fare, they contain a large amount of nutriment in a small bulk. The common field, or the small white kidney bean, can now be planted with entire safety. The waste places among corn, petatoes, etc., should be sprinkled over with beans, or other quick growing crops. Beans can also be planted between two corn hills, and on land too wet to use until now. They will flourish on a poor dry soil, where few other valuable crops would eke out an existence. By all means increase the quantity of beans planted. They are good, substantial, cheap food for the home table, and will save many bushels of wheat for the market. We must, hereafter, give a chapter on the right method of cooking them to make them palatable, easily digested, and nutritious. If always thus cooked, they would be far more popular .- Am. Agriculturist. 14 Ge 14 Th

To Corn Planters.

An exchange has the following recount of a series of experiments in planting corn, which may be of interest to many of our readers at this time. "Four boxes of earth, alike in quality and exposure to light and heat, were planted at the same time with corn from a single ear, and | 14 Bu placed recently in a physician's office. In one | 14 He box dry corn was planted; in another the seed was soaked in clean warm water; in the third the seed was soaked in a solution of lime water; 13 R. in the fourth the seed was soaked in chloride of | 14 Jo lime and copperas water, equal parts. One week 14 afterwards the box planted with dry corn had 14 Eli not germinated, the second box had commenced to germinate, the third box was just showing its 14 green blades, and in the fourth box the blades | 14 were nearly three inches high. Copperas will | 14 keep birds and worms from eating the seeds and | 14 F. one pound will soak seed enough for 20 acres.

Sow Barley and Buckwheat.

Buckwheat need not be sown until July, but | 14 Jol barley usually succeeds well when sown early in | 12 Ge June. Besides, barley forms a pretty good sub- 14 Va stitute for wheat, in case that crop is cut off. or | 14 A. is in demand at extra prices. Who is not fond | 14 of a good, light, warm barley loaf-and of buck- 14 Pet wheat cakes. How would it work to have barley, 14 F. W, Hay buckwheat, and garden truck enough to about 14 John Parkin support the family from six to ten months, and sell all the wheat, and corn, and most of the beans, and pay up the debts on the farm, and at the stores, this year? - American Agri'lst.

TRY A SOILING CROP. A lot of corn stalks, millet, sugar cane, or other forage to be in part cut up green and fed to the cattle, horses, sheep, and swine, in the dry season, and in part cured like hay for winter fodder, will increase the yield of milk, and butter, and cheese to sell; will keep the animals in good heart for labor, or for increasing in weight of meat; and will save hay to exchange 14 D. J. Evans & Son for cash. Plant in drills, or sow, all you can of 14 Davis, Jones & Griffith these crops, the first second, and third weeks in June .- American Agriculturist.

Boy Love.

One of the queerest things to think of in 14 Eliza Edwards after life is "boy love." No sooner does a 14 Fredrick Kittell boy acquire a tolerable stature than he begins | 13 Ezekiel Hughes to ape manish ways. He casts sidelong glan-oes at every tall girl he nappens to meet, becomes a regular attendant at church, or meeting, sports a cape, carries his head erect, and struts a little its is walk. Presently, and how very soon he falls in love—yes, falls is the proper word, because it best indicates his the proper word, because it best indicates his lives to be lin happy delirious self-abasement. He lives 14 Eriah Bickford

now in a fairy region somewhere collatteral to the world and yet somewhere blended in- 14 John Eichensaher extricably with it. He perfumes his hair 14 Anthony Kurtz with fragrant oils, scatters essence over his 14 John Kingston bandkerchief, and desperately shaves and annoints himself for a beard. He quote poetry which, 'love,' and 'dove,' and 'heart' peculiarly predominate; and as he plunges deeper into the delicious labyrinth, fancies endeavour to plant corn in every nook and idle himself filled with the divine afflatus, and place in which corn can be made to grow. It is suddenly breaks out into the scarlet rash-of rhyme He feeds upon the looks of his beloved; is raised to the seventh heaven if she speaks a pleasant word, is betrayed into the most astonishing ecstacies by a smile, and is plunged into the gloomiest region of misanthropy by a frown.

He believes himself the most devoted lover in the world. There never was such another, and there never will be. He is the very type of magnanimity and self abregation .-Wealth! he despises the grovelling thought. Poverty, with the adorable beloved, he rapturously apostrophises as the first of all earthly blessings; and love in a cottage with water and a crust, is his beau ideal paradise of dainty delights.

He declares to himself with the most solemp emphasis, that he would go through fire and water, undertake a pilgrimage to China or Kamschatka, swim storm tossed oceans, scale impassable mountains, and face legions of bayonets, but for one sweet smile from 14 George Walters her dear lips. He dotes upon the flowers she | 14 has cast away. He cherishes her glove-a 14 little worn in the fingers-next to his heart He scrawls her dear name over foolscap-fitting medium for his insanity. He scornfully deprecates the attention of other boys of his own age. He cuts Peter Tibbets dead, because he says that the adorable Angelina had carrotty hair : and passes Harry Bell contemptuously for daring to compare 'that gawky Mary Jane,' with his adorable Angeli- 14 Steigerwalt & Maucher

Happy! happy! foolish boy; love with 14 Jacob Lieb its hopes and fears. its joys and its sorrows, its tortures, its ecstatic fervers, and terrible heart burnings, its solemn ludicrousness, and its intensely prosaic termination.

LIST OF RETAILERS.

Ebensburg, April 25, 1860. DR MOTT'S JUST RECEIVED, CHALYBEATERATIVE Watches,

An aperient and stomachic preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctified by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice

The experience of thousands daily proves that no preparation of Iron can be compared with it. apurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every conceivable

Innoxious in all malladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Emaciation Dyspepsia, Constipation, Diarrhaa, Dysentery Incipient Consumption, Scrofulous Tuberculosis. Salt Rheum, Mismenstruation, Whites, Chlorous Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Fevers, Pimples on the Face,

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from I would call your attention to my beautiful a-Chronic complaints one trial of this restorative | sortment of has proved successful to an extent which no description nor written attestation would render credible. Invalids so long bed-ridden as to have | Hunting Verge Watches, warranted, become forgotton in their own neighborhoods, Hunting Silver Cylinders, hitherto sold in have suddenly re-appeared in the busy world as if just returned from a protracted travel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emaciated | Open Faced Cylinders, heretofore sold at victims of apparent marasmus, sanguineous exbaustion, critical changes, and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name. In Nervous Affections of all kinds, and for

reasons familiar to Medical men, the operation of this preparation of Iron must necessarily be salutary, for, unlike the old oxides, it is vigorously tonic, without being exciting and overheating, and gently, regularly aperient, even in the most obstinate cases of costiveness without | CASH only. ever being a gastric purgative or inflicting a dis-

agreeable sensati on. It is this latter property, among others which makes it so remarkably effectual and permanent | "scrip" will be taken at par. All work sufa remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them. In Dyspepsia innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant costiveness.

In unchecked Diarrhosa, even when advanced to Dysentary, confirmed emaciating and apparently malignent, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debiliating cough, and remittent hectic, which generally indicates Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances. In Scrofulous Tuberculsis, this medicated iron

has had far more than the good effect of the most cautiously balanced preparetions of idione, without any of their well known liabillities. The attention of females cannot be too confidently invited to this remedy and restorative, in the caces peculiarly affecting them.

In Rheumatism, both Chronic and inflamatory -in the latter, however, more decidedly-it has been invariably well reported, both as alleviating pain and reducing the swellings and stifness of

In Intermittent fevers it must necessarily be great remedy and energetic restorative, and its progress in the new settlements of the West will probably be one of high renown and use-

No remedy has ever been discovered in the whole his tory of medicine, which exerts such prompt, happy and fully restorative effects. Good appetitee, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful exercise, immediatelyfollow its use.

Put up in neat flat mettal boxes containing 50 pills, price 50 cents per box; for sale by druggists and dealers. Will be sent free to any address on receipt of the price. All letters, orders, ment of Groceries, also—Bacon, Flour, Land, ect. should be addressed to ect., should be addressed to R. B. LOCKE, & Co., General Agents,

20 Cedar St., N. Y. May, 30,1860:ly.

EAST AVENUE NURSERY, ROCHESTER, NEW YORK,

W. M. HOYT & Co, PROPRIETORS. RUIT, ORNAMENTAL & SHADE TREES of all kinds, and varieties, promptly furnished to order. P. Braniff, of Loretto, will attend to sales in this county. Orders addressed to him will receive prompt attention.
C. MERRIT, General Agent. October 19, 1859.-tf.
