PROF. WOOD'S RESTORATIVE CORDIAL

REMOVATOR.

Is precisely what its name indicates, for, while pleasant to the taste. it is revivifying, exhilerating, and strengthening to the vital powers. It also revivifies, reinstates and renews the blood in all its original purity, and thus restores and renders the system invulnerable to attacks of disease. It is the only preparation ever offered to the world in a popular form so as to be within the reach of all. So chemically and skill-fully combined as to be the most powerful tonic, and yet so perfectly adapted to as to act in perfect accord hence soothe the weakest stomach. and tone up the digestive organs, and allay all nervous and other irritation. It is also perfectly exhilerating in its

effects, and yet it is never followed by lassitude or depression of spirits. It is composed entirely of vegetables and those thoroughly combining powerful tonic and soothing properties, and consequen atly can never injure.

Such a remedy has long been feit to be a desideratum in the medical world both by the thoroughly skilled in medical science, and also by all who have suffered from debility; for it needs no medical skill or knowledge even to see that debility follows all attacks of disease, and lays the ungarded system open to the attacks of garded system open to the attacks of many of the most dangerous to which now humanity is constantly following; consumption, Bronchitis. And as it acts directly and persistently upon the biliary system, arousing the I iver to action, promoting in fact, all ex-

cretions and secretions of the system, it will infallibly prevent any deliterious consequences following up on clange of climate and water; hence all travelers should have a bottle with them, and all should take a table spoonful at least before eating As it prevents costivene s, strengthens the digestive organs, it should be in the hands of all persons of sec-
