

HOW TO EARN A HOME.

A STORY FOR THE HARD TIMES.

The other evening I returned home with an extra \$10 in my pocket—money that I had earned by out of door work—The fact is, I'm a clerk in a downtown store, at a salary of \$600 per annum, and a pretty wife and baby to support out of it. I suppose this income will sound amazingly small to many of you two and three thousand dollar office holders, but nevertheless we try to live very comfortably upon it. We live upon the floor of an unpretending little house, for which we pay one hundred and fifty dollars per annum and Kitty, my wife you will understand, does all her own work, so that we lay up a neat little sum every year. I've got a balance of two or three hundred dollars in the savings' bank, the hoard of several years, and it is astonishing how I feel. Why, Rothschild himself isn't a circumstance to me. Well, I came home with an extra bill, and showed it triumphantly to my Kitty, who was of course delighted with my industry and thrift. 'Now, my love,' said I, 'just add this to our account at the bank, add with interest to the end of the year.'

'The ten dollar bill must go to the bank said Kitty, and I'll economise the coppers just as Mrs. Wilnot did.' Oh! how happy she will be among the roses in that cottage garden next spring! Our merry tea kettle sang us a cheerful song over the glowing fire that night, and its burden was 'Economy' and a home of our own amid the roses and the country air.

THE DEFENCES OF NEW ORLEANS.—A letter dated New Orleans, October 23, published in the Paris 'Constitutionnel,' the organ of the South at Paris, says: 'The river is strongly fortified. The two forts, St. Philip and Jackson are mounted with 170 large guns. The river is lined with forts for at least a quarter of a mile. To force these obstructions any fleet, I care not how strong it may be, must be exposed for two hours to the fire of 170 guns from the forts. In two days or two floating batteries will be finished; they are plated and armed with 20 heavy guns. These batteries can destroy to their water line. From the forts to the city there are batteries in every direction. At the old Chalmette Plain, near Janin's residence, there are redoubts mounted with long range cannon, and a ditch thirty feet wide extends from the river to Cypress Swamp.

'O, Charley,' said a little fellow to another, 'we're going to have a cupola on our house!' 'Pooh, that's nothing,' replied the other 'pa's going to get a mortgage on ours.'

THE CARBON OIL LAMPS HAVE NOW BEEN MADE PERFECT DIFFERENCES XX FLINT GLASS OVAL CHIMNEYS. THESE CHIMNEYS HAVE NOW BEEN brought fairly before the public, and everywhere the verdict is unanimous they are the best to withstand the temperature of any that have been tried by the public. In other places the error with which they have been received has been so gross and manifest, we deem it unnecessary to speak of their peculiar merits, but all who make a trial of them will afterwards have no other. Throughout the West, and other places, they threaten to supersede all others, such is their adaptation to the Carbon Oil Lamps. Patented Oct. 28th 1861 The undersigned having purchased the sole right, and being the sole agent of this country is prepared to sell wholesale or retail as cheap as any of the manufacturing establishments in the larger cities.
