#### The Tonnage Tax.

A bill has recently been introduced into the Legislature, to restore the tax on the tonnage of the Pennsylvania Rail Road which was commuted last winter. We hope the bill will become a law before the close of the present session. At the present time, when we are likely to become emphatically a tax ridden people, and when the poor man is even taxed heavily for his two great luxuries, tea and coffee, it is certainly right that such wealthy corporations as the Pennsylvania Rail Road company should be compelled to bear their share of the burthen of supporting the Government.

Our readers will recollect, that this was one of the very few country newspapers. which opposed the repeal of the tonnage tax by the Legislature last winter. For doing so, we encountered not a little censure from open enemies and pretended friends .--We were accused with opposing the best interests of our county and State, and with being actuated by unreasonable prejudice against the company. We felt confident at LINES ON THE MEMORY OF MY DEthe time, however, that those who honestly advocated the measure as wise and judicious would soon get their eyes open. And this has been the case, for just now, many who were the staunchest advocates of 'Repeal' are now the loudest in urging the restera-

tion of the tax. What benefits have the people of Penasylvania derived from the commutation of the tennage tax? Has the company since then discriminated in favor of way freight? Has the rate of freight been perceptibly reduced, or has it not rather been increased? have not many of those engaged in exporting Eastward, articles from this county, encountered frequently, anutying and embarrassing delays in forwarding their articles or merchandise over the read? All of these questions we confidently answer in the affirmative. The great or rather the only object of the company, seems to be to make money, without taking the trouble of pausing to consider whether its policy is benefitting or injuring the communities through which its road passes. In this it is but actuated by a spirit, common to all mammoth corporations. They have, as Sir Edward Coke gravely informs us, no souls, and have therefore, no interests or sympathies in common with the great mass of the community. In them is more thoroughly illustrated than elsewhere, 'the oppressor's wrong, the proud man's contumely,' that
