

FARMER'S COLUMN.

BUTTER.—The secret of making good butter is cleanliness and thoroughness, and the time for the most profitable exercise of the art of butter-making is June. The grass is abundant, the cows in full milk, the weather favorable. The milk should not be kept too cool, though this is rarely a fault in dairies. It is enough if it be kept as cool as 60 degrees Fahrenheit, though 55 degrees is not too cool. Cream will rise at about this temperature better than at any other, and the same is best at which to churn. Milk should stand where the air is sweet and fresh: odors from the kitchen or from the stable, or odors of any kind, indeed, except that of fresh air, should be carefully excluded. Stone floors are desirable, for these can be kept constantly moist and so much cooler than others, and the air ought to circulate freely over and under the pans. Shallow pans are better than deep ones. Work out the buttermilk without touching the hands to the butter, using as little water as possible, or none at all. If the buttermilk is all out, and with it all the milk, sugar and cheesy portions of the milk, butter will keep with very little salt. The more imperfect the working, the more salt is required. In keeping cream several days, put it where the temperature will be uniform and cool, and stir well if more added.

PROFIT OF PLANTING RUTA BAGAS.—When land lies near large cities and is dear, those crops should be raised which, owing to the distance from a market will require a heavy expenditure in the transportation. All roots are of this character. When carefully cultivated they produce largely and are very profitable. Ruta bagas, though they can scarcely be considered a marketable production, is still a valuable crop to raise for winter feeding to cattle. They afford not only good health and are fat-producing, but to dairy cattle they are productive of an additional flow of milk and consequently of butter.

The ground for the crop should be plowed early in June, say ten inches deep, rolled and harrowed thoroughly, then formed into ridges, going two rounds with the plow to each ridge. The ridges should be lightly rolled, and the seed, about one pound to the acre, drilled in. When about three inches high the plants should be thinned out to from eight to ten inches apart, and kept clear of weeds; a couple of hoeings will be sufficient. The crop is harvested in November, and stored in a barn-cellar, or buried in the field to use as required. From six hundred to nine hundred bushels are raised to the acre.—Germantown Tel.

AS THIS IS THE SEASON for transplanting manure from the farm yards to the fields and gardens, it would, perhaps, not be amiss to remind farmers of the beneficial effects of an addition of burnt lime to every cart load of manure. Such an addition not only improves all kinds of dung, but it conserves it also, and contributes considerably to a rich harvest. The lime may be either thinly sprinkled on the manure, or mixed with the same immediately before carrying it out to the fields. When strong-smelling manure is used, as, for instance, mixed excrements, an addition of a little chloride of lime will be found highly useful.

TO PRESERVE EGGS.—The best method I know of to preserve eggs, says a correspondent of an exchange, is to fill the pores of the shell with fresh clean lard, so as to exclude all air. It is my opinion that this simple and easy method is preferable to any now in use. Some put them in lime. But the lime cooks them, so they have a dried appearance; salt has a similar effect—while eggs saturated with lard, as far as my experience goes, open fresh and nice.

OLD HAY ought not to be left to form the bottom of the mow, but put somewhere, where it can be got at conveniently at any time. At this time, also, do any necessary repairs of those parts which were covered up when much hay and grain were in store; and in rainy days.

THE State Fair of the Pennsylvania State Agricultural Society will be held at Easton on the 25th, 26th, 27th, and 28th, of September next.

Great Improvement in Sewing Machines.

EMPIRE SHUTTLE MACHINE PATENTED FEB. 14, 1860. Salesrooms, } 536 Broadway, New York, } 250 Washington St., Boston.

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be *Simply and Perfectly Combined.*

It has a straight needle, perpendicular action, makes the LOCK or SHUTTLE STITCH, which will neither RIP nor RAVEL, and is alike on both sides; performs perfect sewing on every description of material, from Leather to the finest Nansook muslin, with cotton, linen or silk thread, from the coarsest to the finest number. Having neither CAM or COG WHEEL, and the least possible friction, it runs as smooth as glass, and is *Empathically a Noiseless Machine.*

It requires FIFTY PER CENT. less power to drive it than any other machine in market. A girl twelve years of age can work it steadily, without fatigue or injury to health. Its strength and wonderful simplicity of construction renders it almost impossible to get out of order, and is GUARANTEED by the company to give entire satisfaction. We respectfully invite all those who may desire to supply themselves with a superior article, to come and examine this UNRIVALLED MACHINE.

But in a more especial manner do we solicit the patronage of *Merchant Tailors, Corset Makers, Gaiter Fitters, Shoe Binders, Vest and Pantalon Makers, Dress Makers, Shirt and Bosom Makers.*

One half hour's instruction is sufficient to enable any person to work this Machine to their entire satisfaction. Agents wanted for all towns in the United States, where agencies are not already established. Also for Cuba, Mexico, Central and South America, to whom a liberal discount will be given. J. T. McARTHUR & CO., 536 Broadway, New York.

HELMBOLD'S EXTRACT BUCHU. HELMBOLD'S BUCHU. HELMBOLD'S BUCHU. THE ONLY KNOWN REMEDY FOR DIABETES, Irritation of the Neck of the Bladder, inflammation of the Kidneys, Catarrh of the Bladder, Stranguary or Painful Urinating. For these diseases it is truly a sovereign remedy, and too much cannot be said in its praise. A single dose has been known to relieve the most urgent symptoms. Are you troubled with that distressing pain in the small of the back and through the hips? A teaspoonful a day of Helmbold's Buchu will relieve you.

Physicians and Others, PLEASE NOTICE. I make no secret of ingredients. Helmbold's Extract Buchu is composed of Buring, Cubebs, and Juniper Berries, selected with great care, prepared *in vacuo* and according to rules of PHARMACY AND CHEMISTRY. These ingredients are known as the most valuable Diuretics afforded. A DIURETIC Is that which acts upon the kidneys. HELMBOLD'S EXTRACT BUCHU ACTS GENTLY. Is pleasant in taste and odor, free from all injurious properties, and immediate in its action. FOR THE SATISFACTION OF ALL, See Medical Properties contained in Dispensatory of the U. S., of which the following is a correct copy: BUCHU.—Its odor is strong, diffusive, and somewhat aromatic, its taste bitterish, and analogous to that of mint. It is given chiefly in complaints of the Urinary Organs, such as Gravel, Chronic Catarrh of the Bladder, Morbid Irritation of the Bladder and Urethra, Diseases of the Prostate, and Retention of the "continence of Urine, from a loss of tone of the parts concerned in its evacuation. It has also been recommended in Dyspepsia, Chronic Rheumatism, Cutaneous Affections, and Dropsy." FOR FURTHER INFORMATION, See Professor Dewee's valuable works on the Practice of Physic. See Remarks made by the celebrated Dr. Physic, of Philadelphia. See any and all Standard works on Medicine.
