formed by the reports of proceedings in the Legislature, published in our columns, that the vexed question involved in the construction of the Railroad along the Lake Shore, has been most happily settled. The settlement of the whole matter is embraced in the bill, which we published in the News several days since, and decided vote, was with a slight modification, approved of by the House, by a vote of over two-thirds of the entire body. The bill is now in the hands of the Governor, and ere the publication his signature, and become a law of the Common-

The adjustment of this question is most fortucontested and much coveted right to occupy the ground from Erie to the Ohio State line for railroad purposes, but it will put to rest forever, we hope, the heated contests and excited conflicts of interests, both public and personal, which have unfortunately, for several years past, agitated, and at times with great and fearful violence, our

That there were many and intricate questions involved in the adjustment and settlement of this question will not be denied; and it is therefore by no means surprising that during the discussions which arose on the various propositions for its settlement, there should have been much diversity of opinion and contariety of views. both in regard to existing rights; whether legal or equitable, as well as to the measure of expediency, which it was proposed to adopt for a final sattlement of the whole matter

It is not surprising that during the discussions had upon the several bills which were recently before the Senate for the purpose of disposing of this question, there should be not only great diversity of opinion, but that there should. at times, have been apparent inconsistencies on the part of incobers representing sections of the State, directly or indirectly interested in the premises.

To those tamiliar with the subject the cause of these apparent errors of position, is of easy comprehension, and it is therefore a subject of sincere congratulation that a compromise lof ininterested in the subject, was fixed on, which enabled all who desired anything like a fair and port of the bill proposed, mully by the Sunbur and Erie and the Cleveland, Proposith and Ashtabula Companies

A DEMOCRATIC VICTORY.—An election occurred in Iows on the 3d inst., for a State Superintendent of Public Schools. The contest was warmly contested on party grounds, the democrats advocating the Nebraska bill, and the whigs opposing it. The result was the choice of the Democratic candidate by 2,724 majority! Of all the northern States Iowa has been the soundest on the slavery question. Her democracy have never been infected in the slightest degree with abolitionism. ANOTHER STATE .- A bill has been introduced into Congress, providing for the admission of Oregon into the Union, as a State; and the Legislature of Oregon are taking the preliminary steps for calling a convention to form a constitution. In the year 1856, Oregon will probably be the thirty-second State of the Union. Its nonulation already exceeds forty thousand, and the emigration to it is likely to be very large this year Accounts from that territory represent the people as prospering; valuable gold mines and other minerals are discovered. As a farming region it is unsurpassed by any of the old States, even rivalling in wealth her southern Oragon was only 18,294. It is now over 40,000. In two years more it will contain a sufficient number of inhabitants, doubtless, to entitle it to admission as a State.
