"Fusion."

The prospects of a "fusion" of those who have life long been political antagonists, in order to to us outsiders, that mystery is now doubly mys- server. In these articles we are curtly admonishmye our, county and city from misrepresentation at Harrisburg, and more efficiently protect our interests before the Legislature, seems to become more flattering every day. Last year it was scouted; but it was adopted practically nevertheless, and the result proved eminently satisfactory. Hence it is, we suppose, that such communications as the following are admitted into der the same captains-why they should not oc- The only objection we have to it, is the fact that columns of the Gazette:

MESSERS EDITORS .- A fusion of parties on Assemblymen seems to be generally desired, on account of the nature and importance of our local interests. I can conceive of no method of carrying it out so completely and triumphantly as by sending back the old ones, Messre. THOMPSON and Ball. It is not too much to say they are the best mea, the most skilful and practiced, for the position to be found in the Co. I therefore trust that action will be speedily taken looking to a general rally upon them by men of all parties. This done, I think they can't any longer withhold decline, let a Whig of WILSON KING'S order of character and qualifications be associated with some Democrat occu-pying the same position on our local question, and the sup-port of all true friends of Erie invoked in their behalf. A FRIEND OF ERIE

In the same vein is the following upon the same subject from the editorial columns of that paper. There is a gratifying change in the tone of the Gazette since last Fall:

The suggestion of a correspondent that if there is to be a "finite" on A correspondent that if there is on Assemblymen, it can best be effected in the name of the geathemen above mentioned, is, doubt-less, well predicated. We have nothing to say in the spirit of distinguishing to say in the spirit less, well predicated. We have nothing to say in the spirit of distation—we have no desire to assume any sort of leadership in the matter—but we are satisfied that if our local interest demand such "a coming together" as is pro-posed, (and we incline to the opinion that they do,) the end contemplated wan most certainly be accomplished through the instrumentality of the gentlemen who represent d us so ably and efficiently in the House last Winter. I our citizens of all parties are convinced of this, they ought to send them back-we were going to say, "willing or not willing." We presume, however, that if put in the field, neither would peremptorily decline

So it appears "Ephaim is not joined to his idols," therefore let no democrat be captious or unreasonable. On the contrary, let all respond to the concession above in the same generous spirit it is extended. Democrats, after a proscription of twenty-five years, you are beginning to be appreciated, therefore bear your "blushing honors" meekly and courteously The dawn is breaking!

ABOUT RIGHT .- The Buffalo Commercial, in noticing the fact that Judge ELMORE, of Kan sas, recently removed by the President for his land speculations, has written to the Attorney General, in substance, that he holds his office independently of the Executive branch of the Government, and that he will invoke the action of the judiciary to maintain him in it, says it had previously regarded the removal ELMORE as an ill-advised and arbitrary act, suggested by considerations unworthy of the President of the United States, and it is still inclined to suppose that he was displaced in order to make a show of consistency, after Goy. Reeder had been sacrific ed to propiciate the slave power; but the Judge is manifestly unfit for his place, and ought to have been turned out, any way. We have a shrewd idea that John Van Buren was more than half right last week. when he said, in discussing this Kansas.

governed! There is much sound common sense in this. and it would we well if we in Pennsylvania would heed and practice it Charity in politics, as in every thing else, should begin at home. The Missourians have outraged the whole country by attempting to manage the affiairs of the people of Kansas for them; but why have they? Simply because they have carried out practically what almost every convention that ussembles now-a-days does theoretically. It was sensible remark, then, of Mr Van Buren that the duty of a Convention of New York Demoerats was to see that New York was well governed. and not that Kansas was well governed We never could understand what could be accomlished towards making any of the territories free States by the election of a State Prison Inspector in New York, or a Canal Commissioner

n Pennsylvania, favorable to such a result 1 t lways seemed to us very much like a false issue -a blind to some ulterior design, that was at least of doubtful propriety. We are pleased then with the position assumed by the Democracy of New York, to practically ignore a question like that of Kansas, and leave it for settlement with those to whom it belongs-the settlers of Kansas themselves! The following resolutions, we think, does this. While they endorse the Adminis tration, they also condemn the interference of the Missourians in Kansas, and reiterate in emphatic language the principle upon which the loctrine of Non-Intervention is founded; that "the people of a territory should be left perjectly free to frame and regulate their own domestic institutions in their own way." Resulved. That the National Administration has on

Judge Thompson is declaration to support a " wais, bench-crat, or Free Soiler, if he is only right on the railrond que-tum" Here is consistency with a vengeance. The re-marks of the Observer about "treachery" are more book. It will never do for it to assume the Diotatorship as to what is consistent, or Democratic. The least about (Auf the bet-ter for the Observer. We advise Mr. SLOAN to keep cool and good natured. The Democracy of this county are not week, when he said, in discussing this Kansas-Nebraaka humbug in the Soft convention, that he thought it was more important that the Con-vention should take measures that New York was well governed, than that Kansas was well "the best harbor on the Lake."

Now, with all due deference to the superior acuteness of our cotemporary, we can see nothing nconstant in the position of Judge Thompson or our acquiescing in it. It seems to us that af tet the fellowship of the Democracy of Erie had been repudiated by a regular convention of the Democracy of Crawford, there was nothing very nconsistent in Judge Thompson and ourself list ning to propositions of fusion from whigs or free soilers; especially as such a fusion was never roposed in any official form until after the "Erie uestion" had been made an issue before the peo-

ple of the district by the Democrat and its coadutors. As we said last week, the Democrat's political friends in Eric are where they have been forced by the treachery of itself and friendswhile our local quarrel with the railroad is made an issue in the district, not by the action of the people of Erie, but by the interference of the people of Crawford who, in reality, ought to have no part or lot in it. Suppose we should interfere in the location of a railroad through Meadville, and say it should run south of the town. when the entire community desired it to be build north of the town, what would the Demoerat call such interference? Impertinence, no doubt, it not something worse. Well, that is just what he Democrat and its coadjutors are doing in regard to our matters. They are interfering in a uestion in which they have no part or lot. This usrrel is none of their concern. It is between

he people of Erie and the railroad men; and the Democrat and its man Finney would both appear more consistent to mind their own business. We

JUST AS WE EXPECTED .- We suppose our readers have not forgot how, when the furor created by "Uncle Tom's Cabin" was at its height, the Duchess of Sutherland got up and circulated a petition, called the "Petition of the Women of England," for the abolition of Slavery in America. Like all humbugs, the great "Duchess" was the reigning deity among - the Sambo sympathisers, and political mountebanks of that school. in this country. Her philanthropy was ever in their mouths, while the sin and shame of the cruel slaveholders of the South in not listening to her "regal" appeal, was the theme of many a fory harrangue, and eloquent effort from the pulpit the press, and the stump. Well, time passed the philanthopic Duchess and her famous petition became, like "Uncle Tom," dead stock in the American market. Not so in England, for we notice among the items of news by the last arrival, that the Duchess of Sutherland, the great London friend of "Uncle Tom," and the leading subscriber to the petition of the "Women of England" for the abolition of slavery in America, has just permitted a poor bed-ridden woman, with her new-born babe, to be turned out into the open fields, for the non-payment to her husband's estate of a trifling amount of rent! Nor do they modestly solicit charity, but ask at once to be made members of our "happy family," without waiting to be mesmerised into a condition of affectionate unity.
