Some Men in a Pillory. We copy in another column the proceedings of the meeting held at Girard on Saturday last, to demounce municipal and county subscriptions to railroads. In doing so, we take this opportunity to say that while we accord to every man the privilege and the right to oppose such subscrip tions-that while we confees that it is a question of doubtful propriety, upon which there is much to be said both in the affirmative and the negative-we caution our readers to look well at, and scrutinize the men who figure as the bell-weathers, resolution writers, and spokesmen of such demonstrations as that, the proceedings of which, we refer to. We have read somewhere the fable of the monkey using the paw of the cat to pull the hot chestnuts out of the fire; and we have seen some instances of gentlemen using the popular prejudice of the people to accomplish their own private aims or those of their employers -In either case it is presumed those who pull the chustnuts out of the fire (the people) get their fingers burnt, while those who cunningly push them forward, retire to their corner, like the monkey, to enjoy their feast or receive their reward. Keeping in view this fact, let us look at the present position, and antecedents, of some of the bell-weathers, spokesmen and resolution writers of this Girard Demonstration. By referring to the Constitution, we find that the principal speak ers were HENRY TELLER, GEORGE H. CUTLER, and William Griffith. With the latter gentleman we have nothing to do; but for the others we have a looking glass, which we wish them t look in, and see if they can see any chestnuts in

the fire, and any simple minded puss hauling them out for their benefit. Mr. TELLER, says

"The Sober Second Thought." From the very first inception of the Know Nothing epidemic, which we confess carried off pore victims than we believed it could last year, we have been impressed with the belief that the 'suber second thought" of all well disposed men would condemn and repudiate it, and that ulti mately the Democratic party would be stronger and healthier And already this belief is being realized. The "sober second thought" has been at work, and while the midnight conclaves of

his intolerant party may be gladdened by the ountenance of a few disappointed office seekers r ignorant bigots, from the ranks of the Demoracy, their place is more than supplied by intel igent and desirable recruits from the ranks of he whig party. If this 'sentiment requires denonstration, we have but to look at the result of the elections held this summer Virginia North Carolina, Alabama, Tennessee, Texas, and ven Kentucky, all confirm the truth of our

laim. And then there is Maine; last year, uu ler the banner of Know Nothingism, all the dis cordant elements of faction and fanaticism were combined, and the Democracy went down before t as chaff before the wind. But now the "sober econd thought" of the people has reversed all this, and Maine once more takes her place in the ranks of the Democratic States. The politician hen, who last year thought the Democratic par y was dead, because fanaticism ruled the hour new little of the recuperative character of itrinciples, and less of the intelligence of the American people As illustrative of this tendenev of the old line whigs to repudiate the doings of their brethren, and seek political fellowship n the ranks of our party, we have two most notable examples before us.
