We expected, from the language of the call, to hear some specific remedy suggested-some means pointed out whereby the supposed evils of that act of L gislation might be avoided; but nothing of this kind met our ear. Indeed, were we called up to state what specific object the meeting had in view, we could only answer that agitation, without aim, appeared to characterize it throughout, save the speeches of Mesers. Ball and Whallon, and that of Judge Thompson .-When we went in Mr Ball was recounting very succinctly the progress in the Legislature, and final passage of the Bill complained of Me did this in a calm and dispassionate manner, which we thought ought to convince all present that every thing possible was done by both himself and colleague to defeat the bill, and hence the aspersions which some have indulged in against them were unfounded. He closed without suggesting any course of action. Mr. Whallon immediately followed, and confirmed the statements of his colleague, adding some facts not enumeratel by the previous speaker. He, too, set down without pointing out any remedy Judge Thompson followed, and while he indulged in a very gloomy picture indeed, because of the passage of this bill, he impressed upon his hearers what will unquestionably have. every sousible man feels, that the law as it stands must be obeyed.
