"China and the Rest of Mankind."

Under this hend the New York News has some specula tions upon the ultimate effect of the war now being wag ed by England upon the Celestials, which are well worth repeating, we therefore condense them for our columns.-The News, basing its orinion upon the last advices from England, thinks that the war policy of the Palmerston ministry will be anstained by the people, and that hence the war upon China will be prosesuted with all the energy certain. China must succumb, and the intercourse between the Celestials and the outside barbarians will be placed on a far different footing from what it has heretofore been. The surplus products of China will then be ready to be exchanged for those of the rest of the world, and the locks and bolts of Chinese jealousy will be at last thrown open for unrestricted intercourse. What such a result rould do for the commerce of the world, and perticularly for that of our own country, the News most glowingly come under our notice, is related by an Albany paper at the expense of a police officer of that city. The Unzette cannot have forgotten the fact that about two years since some three thousand of the Kalloch's of New Ragland, being greatly exercised in mind concerning the abominable sinfulness of all the world excopting themselves, presented an impudent memorial to the United States Senate, "protesting in the name of Almighty thad against the Nebraska-Kansas bill." NEW YORK

It has been a dull week for our Vanity Pair, and the state of the market for the principal articles of traffic may be quoted as follows. Demostic and political virtum are scarce but not in demand, Basy consciouses go off slowly at low prices, as the stack offering of this article is unusually large, the previous demand having stimulated an enormous importation. Wealth, bener and luxury are actively inquired for, but helders are very firm and not anxious to part with their dads. Warmer weather is in great request, but Merriam has been unable to supply the wants of the market, as the sun-cannot be stimulated into a vigorous shine. Rainwater is abundant, in fact we are quite flooded with this staple, which will not be wanted in large quantities by the community until about the mid-

To come down to particulars, intelligible to your noncommercial readers. We have had very little excitemen of any kind this week. Yesterday your correspondent found himself embedded in the largest and dearest growd of the season, which had gathered about the corner of Nassau and Fulton streets, in the hope of catching a glimpee of some of the returned Nicaraguans, who were reperted be refreshing themselves in a lager beer saloon some where in that vicinity. They were well known condjutaors of Gen. Walker, and had a vast number of friend about town, who were all anxious to share a drink with their old familiars. The patriots looked rather used up. and did not appear to have brought back a considerab stock of any desirable equimodity, with the exception of bair, of which they carried a perfect jungle on heads, chins and arms. Nicarangua is a better remedy for the beardless than any of your "Orguents," "warranted to ensure a full growth in six weeks."

Business has been very quiet. Teas continue to bring very high prices, though there is no doubt that they have been raised by speculation to the highest point they can prices up further, but we have reliable information from the China correspondence of a large house, which convin ces us that the deficiency in supply will not be so great as ers of "the cup that cheers, but not inebriates." A vigorous investigation is now going on of a failure in the dr goods trade alleged to have been fraudulent. The long credits given in the dry goods trade and the careless way prevalent of trusting out large amounts to parties fo those responsibility there is little security, offers unusual inducements to the dishanest. Business, too, is done here on too little capital. We know of houses coing a trade of about \$350,000 per annum, of which they would clear about \$5,000 if all their debtors paid them, who, on a capital of \$6,000, hire a store at \$3,000, pay about \$2,000 to help of all kinds and manage to live dashingly on the remainder' such a state of things, it is evident, must bring about disasterone results. The heaviest part of the dry goods business, however, is illustrated houses, where capital and or lit would keen their affast in the dullest of seasons.
