NEW YORK.

(Correspondence of the Erie Observer.)

This has been a glorious week for voters and leaders. We have had a grand election of members of the Assembly in the vicinity of the City Hall, and all the pomp and circumstance of war, without the least shadow of a shadow...

The weather, after having had a most unprecedented blow-out of nearly a month's duration, has at last settled down decently and orderly.

The wheat crop of South Carolina, it is said, will be the largest, this season, ever harvested in that State. The same may be said of all the Southern and South western States.

Prof. Steiner has returned, after an unsuccessful trip to Canada in search of his lost balloon. He now proposes, we believe, to manufacture another, and try it over again.

The article of Female Dress called Dueters, that we noticed last week, can be found at Booth & Stewart's where they are manufactured. Go and leave your order for one and we will warrant they will do the fair thing.

We notice that the Erie County Agricultural Society have fixed upon the 7th of July, at 9 o'clock, A. M., for the trial of Mowing Machines, at the County Poor House Farm, about 4 miles west of the city.

Lafayette Darling, a young man in Webster, Monroe county, N. Y., went out shooting and did not return. A week after, his body was found. He had overlored his gun, and the breach pin had been driven through his head.

They had a strike for higher wages among the hands employed on the Sunbury and Erie road near Warren last week; but the Ledger says it didn't amount to much, as the Rail Road struck back and the professors of the wheel barrow and spade have gone to work again.

The Constitution says the "fring of a salute of ten guns at Girard on the receipt of the 'American nominations made at Lancaster, is 'much ado about nothing.' By the blood of our Irish ancestors, but that sounds very much like an Irish bull.

Ex-Speaker Banks, black republican, has received the know-nothing nomination for governor in Massachusetts. Southern know-nothing papers, as well as Northern Republican papers, are not expected to inform their readers of this fact.

It will be seen by advertisements in today's paper, that the firm of Clark & McCarter has been dissolved—and that the business is continued by the junior partner. We take great pleasure now in recommending the establishment to patronage of the public.

Yesterday morning there was an alarm of fire, proceeding from the stable of Wm. Kelley, Esq., in the rear of his residence on State Street. By prompt efforts, the fire was extinguished before much damage was done. It is supposed to have caught from one of those Celestial nuisances, a fire-cracker.

A young girl, declining under consumption, died suddenly in the car, a few days since, after the train had left Michigan City for the westward. She was attended by her mother and other friends, and when the fatal event occurred, a scene of the most harrowing description took place, the anguish of the mother making her almost frantic.

GODDY'S LADY'S BOOK for July is on hand, and, like its predecessors, is an excellent number. We consider it one of the first Magazines of the day, rich in illustrations and matter. Its plates of the fashions and embroidery are the finest kind, and for the use of the ladies are worth double the cost of the Book.

Pen and Scissors Items.

Strawberries and cream can be had at Perkins.

We are indebted to Dr. W. M. Wood, U. S. N. for late China papers.

We notice that the Female Teachers in our public schools have had their salaries raised \$50 per annum.

Strawberries are selling in Pittsburg at one cent a box—but how large the boxes are the papers don't inform us.
