"I presume," interrupted the professor, with a smile of satisfaction, "you allude to physiog-Bomy?"

"No, sir," replied the General, "my science

is degology."

"Dogology!" echoed the professor aghast "Dogology," said the General, with a win ning smile. "I can always tell, sir, by the appearance of a dog, what sort of a man his

"Sir." replied the phrenologist, drawing himself up stilly, "I see your intention is to cust ridicule upon my science."
"Pardon me," said the General, with a most

amiable expression of countenance. "I will convince you to the contrary. At the next town, where we stop for dinner, and which I have never visited before, I will tell you from the dogs in the atreet what sort of men their owners are: and, if I fail to do so, I will forfeit drinks for the whole stage load of passengers "

"Ob, yes! that you could readily make up a fanciful theory, I am convinced, and draw an, imaginary character for that of the master of every dog, I have tolerable good reasons for believing; but how am I to tell whether you are correct or not. I am a stranger here as well as yourself," said the wary professor.

We will leave the decision to the landlord of the tavern where we stop. He must know every person in the place," replied the General.
"Agreed," said the phrenologist, winking at the other passengers, and regaining his self-satisfied air; "I agree to that, and will forfeit the drinks if the landlord's account tallies with your descriptions.'

On arriving at the tavern, dinner was speedily discussed, the passengers being anxious to enjoy the exhibition of this novel science The General beckoned the landlord out of the bar-room. This drew all the idlers with him, so what with them and the passengers there was a tolerably large group in front of the tavern, and of course this attracted other persons to see what was going on, so that by the time the landlord had been made acquainted with his duties as arbiter, quite a res pectable audience was collected-in numbers, at

"The owner of that dog," mid the General, as a fine pointer, with a steel chain collar around his neck, passed, "is a gentleman of education and property. He lives well, dresses well; has a fise house, (the best house in town, quoth Ahe landlord,) is fond of society, a sportsman, (that he is,) is generally popular, and on good terms, with his neighbors. How is that, landlord?"

"True as a die," said the landlord; "the very "the true, as a die," said the landlord; "the very "he were standard on the said and the landlord."

"True as a die," said the landlord; "the very "he were standard on the landlord."

"True as a die," said the landlord; "the very "he were standard in our business career.

"" "B. A. BALDWIN.

Just then a little wiry Scotch terrier darted from under a garden gate opposite, and rushed up street after a flock of chickens. "The owner of that dog," said the speaker, "is a boy, about fourteen or fifteen years of age. A sly little rogue, always about some mischief; he is a spoil. ed child; perhaps the only one; he and the dog are constant companions, and neither is happy unless engaged in some scrape; and the neigh-borhood is, no doubt, in trouble all the time with their pranks."

"By jolly!" said the landlord, "there's something in this here dogology. That boy is just such a boy as you say he is, stranger!" "The owner of that dog, continued the General, as a pug-nosed bull dog, with great wrinkles on his cheeks, short, belligerent ears, heavy, thick eyes, broad cheet, bandy forelegs, and a fall that looked as if it had been gnawed off, made its appearance, "is an uneducated man. In disposition he is suspicious and obstinate; very

wrong headed, not likely to have many friendsif any, men like himself; not apt to take much interest in public affairs; close in his dealings, and not given to talk much." "By thunder!" said the landlord, "you've got him again. The owner of that bull dog is a

Dutch butcher. He don't talk, because he can't talk English good; he don't take no interest in public matters, 'cause he can't vote; and he's obstinate as a mule, as I know, for he always gets more pounds of meat on his bill than there is in his weight, and he won't take off a cent "That dog," said General Leslie, elévating

his voice, for he was very much elated at his spacess so far, and he saw a capital specimen of the bull terrier coming up the road—a union of fercelty and cunning, heavy headed, lank bodied, bread-breasted, eyes like coals of fire, ears and tail eropped for rough-and-tumble fightingprobably the worst man in this town, if not in the State of Kentucky. He is destitute of honor and principle, and would not hesitate to take the life of any man for the sake of a few dollars." Here he was interrupted by a voice in the

"Look here, stranger, you're making a little tee free with my character, by Gard! That dog belongs to me!" and the speaker pushed his way through the crowd, and confronted the dogolo-

"My friend," said the General, calmly, push ing back the hair from his forehead, "I want to ask you a question—where did you get that

"By Gard!" said the man, "I raised him!" "Then," said the General, "I've lost the drinks. I was only betting on dogology, and, my friend, you have swept me. Come in," said he to the phrenologist; "I ment you to feel the bumps of this gentleman. And I hope the rest of the crowd will join me in a drink to old Ken,-

Any person who has seen the great West, will know how cheerfully this last sentiment was approved of by the crowd generally.

Physicians and their Modes of Treatment of Diseases.

There is no subject on which there is an unucle out oversy among its practitioners and profesors as that of the PIACTICE OF MITTICINE. One school of physicians will blater, there, administer raisonel and kindred drugs until the confiding patient sinks under their weight, and should be die, the practitioner will tell you that the patient's constitution entitle bear treatment, when the

under their weight, and should be die, the practizaner will tell you that the satient's constitution envision thear treatment, when the facts were the treatment was not to be borne even by one in perfect wealth. How then could resoon expect one in imperies health?

Another school of practitioners will tell you that water alone will care all the complaints of MAN. Still another administers herba, rosts, and so on to the end of the chapter. The different schools being as numerous as their theories.

When Benjamin Franklin, by the simple means of like kits, brought the electricity from the ileavens, the world wonderfed what use he could make of it. What did he do? He, the first think, as the benefactor of Manistad, applied it to the saving of human life from desirections by that saids fluid electricity. And in this there is a remarkable similarity pripress the experiments and results of the Great Tamer of Eighting and those of Prof. Charles De Grahm & speriments commenced with simple means years ago and have gone on until with years of toil and unremitted exertion he has produced, at Philadelphia, the scene of Franklin's success a wonder second only to that of his great fore runner.

EORGE H. KELSEL, M. D. Kerser stands in the next ranks of his profession in latte-

in the Clergy having themselves and some of their framines been to sited almost as miraculfusty as the miracies of Seripture, speak of complaints that made life a burden and impaired their usefulness in their calling, have not been backward in recommending thos alleviator of sindering to thing people. Fire leverend gentleman, whose letter we publish below, insisted on taking a number of frof. DeGrath's cards and pampiliets and handling them personality to members of his church and of the late Conference of the M. E. Church in Philadelphia.

I have been unable to waik two equares without stopping to rest, and/for tive years I have not ind a good night's rest, bring quable to sleep from pain. About the 2d of this month I commenced uning your Electric Oil, taking about ten drops internally and applied it evernally to the most painful parts. On the drest night I sleep better shan I had done for many years, and now, at the end on week, I am like a bew inan; gan alse's weil, saik any distance, and attend to my duties. Your Oil having, done for ma in this short thin erhat the satire Medical Faculties of the Negt Tork Celleges of Medicine and those of the Jefferson and Pennsylvania of Philadelphia have failed to do in 13 years.

CLIFFORD R. SCRANTON. From a Merchant in Alexau tria, Va -to takenjoff his ceutches AIRXANDRIA,)
July 11th, 1869.

Prof. DeGrath, —Dear Sir — M, son sink a nutla in infoot and as unable to walk without the read a crutch, when by the

application of Prof. Chars. In-Gratti. s. Electric (201), he was immediately relieved of pain and could walk without the use of the crutch it believe he was saved from becoming permanently lame there by i would therefore, recommend it to all whose class of complaint it makes the same. 7 FOHN ARNOLD, Hatter.

We might go on adinfinitum with these letters of testimony, but our space will not permit; and the above will convince all who have any doubts, and those who have some will try it for themselves. The sale of this Great Remeedy has been unprecedented, last year alone, over \$155,000 worth was sold, and wherever it is known, there it is used. Purcell, Ladd & Co., of Richmond, bought has year over \$1,200 worth; Barnes & Park of New York \$2,000 worth Seth S. Hance, of Baltimore, over \$4,000; J. D Park, of Cincinnati, \$1,000 worth, and other large Druggists all over the Finted States.

At the late Railroad sendent on the North Pennsylvania Railroad near Philadelphia, when so many were hopelessly mangled, Prof. DeGrath offered his services and many were saved from having them limbs amounted and being concept yor life, by the timely Prof. DeGrath offered his services and many were saved from having them limbs amputated anchoring crapples for life, by the timely application of his great Electry (th).

It is needless to say their thanks were overscholming, and the Olican scarce to manufactured fast enough to need the present dem. and.

This Electric Oil takes the pain from a burn in twenty minutes and leaves no scar. Don't use any thing eyes for this, Wallace Elliott, Enq., Washington, extensive druggist says, it immediately, cured a gautheman's lame leg, and Mesara, harnes & Park, N. W. Ward, key, large Furnishing Store, Chemut street, it is cured him. The Haton of Pitiabottyh, says it acted like a charm with him, and man, Phissicans use it, and many editorial notices have been reduntarily given this meritorious Balm—instance "Washington Star. "Cleve Land Lapreas." Philadelphia, New York and Boston papers, although we have preferred not to see such notices, relying on the medicinquised, because we know that if it has no merit, like sarsaparillas, it would go down sooner by having it noticed beyond it merita. This is an expensive preparation to combine and put up, and we cannot afford to pay for push, like those Doctors whose medicines are mostly composed of water. This Oil cannot be adult-rated on with any thing that would cheapen it, without spuiling it. Capt. Jos. M. Turner of N. York city fall and harr his back, could not walk—wrote us one effectual rubbing with this Oil cared him.

As there have lately aprung up many base imitations of my article, which the makers dare call k-jectric Oil, I deem it well to put the public on their guard. Descrath's Electric Oil is harmeless, weet as cologue, and always haves you be iter than it found you. One bottle always produces an effect, often a complete cure. You must be sure therefore, that you ask for and get DefiRATIF's 111-TEIC Oil., the name is blown in every bottle—thus, Frof PeGrath's Electric Oil Philadelphia.

Choiers Motbus, Dysentery and Diarrhous, "h.p., Typhub, Yeliow and all Fevurs are produced by foul humors of a poisonous and malignant character, which endangers the existence of life while the least particle of this corrupt matter romains in the bowels or vital flains. The Jepanese Life Print have cured these frightful diseases when all other means had failed, and we have abundant proof of this fact from eminent physicians, as well as others. Indeed, it is anwise and improdent for any exsel to go to sea without a good supply of them on beard. Sailors and others who travel to those ports where the very sirje putrid with corruption, abould by all means have them in their chests, ready for any emergency which may arise. The foul, malignant matter—that death agent—within them, is forced to leave its stronghold, is driven out from the bowels, blood, and vital fluids, and replaced with the rich and healthy principles of life. In all malignant diseases they must be used in powerful and frequent doses.

Persons who have passed the meridian of life well know the peculiar qualities and life principles of the Magic Compound and Ancient Japanese Lie Pills for restoring a lively sense of youthful invigoration and a safe-guard against the infurmities of old age—We candidly believe that if the young would drive out the poison-ous humous, and porify their blood with these remedies, and follow-up the treatment at intervals through life, they would all arrive fit the ryse eld age of an Anadred years, unless taken of by accident. These Pills are already meeting with success unprecedented in the history of medician. Thousands are being saved from lingering diseases which were more terrible to them than death irielf—We are adving all other pills, which contains so much mercury, from the market—those pills which leave their horti

A NEW REMEDY FOR

THE manner in which this Liniment operates on the system is soothing, yet powerful and effectual, without in any way whatever endangering it. It is a perfect anodyne and antidots to pain, operating almost instantly upon the entire nervous system: it is powerfully penetrating even to the very bone, it rejects contracted muncles and restores them to their wonted power, it has proved itself in all cases that require an external remedy—such as Rhewmatism, both chronic and acute. Sorence and Specifings of all kinds. Pains and Weckness in the back, and and limbs, Cramps and sumbness; also, for challelman, burns, scalds, sounds or cale. Many important cures have feen performed with the use of this Liniment on Hornes—ill swellings and inflamations, lameness, recent spavins, scurry, gailed necks and shoulders, &c., &c.—and all other diseases in which a Liniment can be benficial.

It is but a short time since this remeily was first introduced to the notice of the public, and in that short time it has gained a reputation that ranks it among the very best of all existence literal dies.
